STATE AND CITY DEPARTMENT

BOND PROPOSALS AND NEGOTIATIONS

ALABAMA

Florence, Ala.

Bond Call-S. B. Howard, City Clerk, states that general refunding, series A, bonds, Nos. 4, 25, 58, 94, 101, 108, 112, 114 and 123, drawn by lot, are called for payment on Jan. 31, 1942, with coupons due Feb. 1, 1942, and all subsequent coupons attached.

Dated Feb. 1, 1937. Due Feb. 1 1957. Holders of said bonds will present them on Jan. 31, 1942, at the First National Bank, Florence, for payment.

Tuscumbia, Ala.

Bonds Purchased—We under-stand that the First National Bank of Birmingham, which is the sinking fund agent and depositary for the above city, has stated that as a result of the recent call for tenders the city purchased \$34,000 public improvement refunding bonds at prices ranging from 62.50 to 69.75, and \$13,000 general refunding bonds at prices ranging from 63.00 to

ARKANSAS

Fordyce Spec. Sch. Dist. No. 39
(P. O. Fordyce), Ark.

Bond Call—Imon E. Bruce,
Secretary of the Board of Education, calls for payment on Jan. 1,
1942, at par and accrued interest, the above district bonds Nos. 1 RB the above district bonds Nos. I RB to 297 RB, 300 RB to 317 RB, 320 RB to 327 RB, 342 RB to 349 RB, and 365 RB to 417 RB. Dated Jan. 1, 1935. Due Jan. 1, 1960. Said bonds must be presented with Jan. 1, 1942, and all subsequent courses attached to subsequent coupons attached, to the Commercial National Bank, Little Rock.

North Little Rock Special School District (P. O. North Little Rock), Ark.

Additional Information - In connection with the \$1,090,000 (not \$1,035,000) refunding bonds that T. J. Raney & Sons of Little Rock, have contracted to exchange—v. 154, p. 1473—it is now reported that the bonds bear interest at 3%, are dated Oct. 15, 1941, and mature Jan. 1, 1975, callable at par on July 1, 1942, or any interest paying date there-after. Prin. and int. payable at the Commercial National Bank, Little Rock. These bonds constitute the entire direct indebtedness of the district, and are in the opinion of counsel, direct obligations of the district, secured by: a voted, continuing tax of 7 mills to be levied on all taxable property within the district throughout the life of the issue; a pledge of that part of the State apportionment derived from sources other than the sales tax to guarantee annual interest, and a first mortgage on all real property owned by the district. Wallace Townsend of Little Rock.

CALIFORNIA

Alameda County (P. O. Oakland), Calif.

Bond Issue Discussed-G. E. Wade, County Clerk, states that the County Board of Supervisors that been discussing the possible ruled Dec. 15 that maintenance been discussing the possible ruled Dec. 15 that maintenance bear aggregating below the county Board of Supervisors aggregating below to the county

Bond Sale Details—The City Clerk states that the \$39,800 coupon fire department improvement bonds sold to the Bank of America, N. T. & S. A., of San Francisco, as 1½s, at a price of 100.07—v. 154, p. 1361—are dated Oct. 15, 1941, and mature on June 15, as follows: \$4,000 in 1942 to 1950, and \$3,980 in 1951, giving a basis of about 1.49%. Interest payable J-D 15

Paradise Irrigation District (P.O. Paradise), Calif.

Bond Sale Details-The District Secretary now states that the \$140,000 4% semi-ann. pipe line bonds sold to the RFC at par, as noted here on Nov. 8, are dated Sept. 15, 1941, in the denominations of \$1,000 and \$500, and mations of \$1,000 and \$500, and mature July 1, as follows: \$2,500 in 1945 to 1947, \$3,000 in 1948 to 1951, \$3,500 in 1952 to 1955, \$4,-000 in 1956 to 1958, \$4,500 in 1959 to 1961, \$5,000 in 1962 and 1963, \$5,500 in 1964 to 1966, \$6,000 in 1967 and 1968, \$6,500 in 1969 and 1970, \$7,000 in 1971 and 1972, \$7,-500 in 1973, and \$8,000 in 1974. Legality approved by Orrick, Dahlquist, Neff & Herrington of San Francisco. San Francisco.

CONNECTICUT

Darien (P. O. Darien), Conn.

Note Offering—J. Benjamin Corbin, First Selectman, will re-ceive sealed bids until 10:30 a.m. on Jan. 12, for the purchase of \$150,000 tax anticipation notes. Dated Jan. 14, 1942, and payable May 14, 1942, in New York City. Satisfactory legal opinion will be furnished the successful bidder.

DELAWARE

New Castle Special School District, Del.

Bond Offering-Jacob H. Speicher, President of the Board of Education, will receive sealed bids until 10 a.m. on Dec. 29, for the purchase of \$55,000 not to exceed 2½% interest coupon school bonds. Dated Feb. 1, 1942. Denom. \$500. Due \$2,500 on Feb. 1 from 1943 to 1964 incl. Rate of interest to be expressed in multiples of 1/8 of 1% and the bonds are subject to registration. Prin. and int. (F-A) payable at the Farmers Bank, Wilmington. Bids may be William Poole, Esq., of Wilmington. Subject to the statutory provision that the bonds shall not be sold at less than their face value, the bonds will be awarded to that bidder naming the best offer in the opinion of the Board of Education after considering the lowness of the interest rate named in such bid and the further fact that a bid will be acceptable to the Board only if it is in an amount of not less than \$2,000 above the face value of the issue. A certified check for 5% of the amount bid must accompany each proposal.

DISTRICT OF COLUMBIA

Columbia from paying the District's income tax. The Court's unanimous opinion, delivered by Justice Robert H. Jackson, reversed a District of Columbia Court of Appeals decision holding that the district income tax could not be applied to Federal workers who maintain a domicile in one of the States. Chief Justice Harlan F. Stone and Associate Justices Owen J. Roberts and Stanley F. Reed did not participate.

Justice Jackson's opinion did

not seem to lay down any general rule, but appeared rather to hold that each individual case should be decided on its own merits—that is, whether the individual worker actually makes

Washington his home.
"We hold," he said, "that persons are domiciled here who live here and have no fixed and definite intent to return and make their homes where they were formerly domiciled."

FLORIDA

Hillsborough County (P. O. Tampa), Fla. Certificates Voted—We under-

stand that the County Commis-sioners recently voted to issue \$763,450 not exceeding 3% paving certificates.

Indian River County Special Road and Bridge District No. 4 (P. O. Vero Beach),

Fla.
Bond Sale—The \$148,000 4% semi-ann. road and bridge re-funding, series of 1941 bonds offered for sale on Dec. 23-v. 154, p. 1577—were purchased by R. E. Crummer & Co. of Orlando, at a price of 103.00, a basis of about 3.54%. Dated Jan. 1, 1941. Due on Jan. 1 in 1944 to 1955. No other bid was received, according to the Clerk of the Board of County Commissioners.

Panama City, Fla. Bankruptcy Case Pending-It is stated by Giles J. Patterson, of Jacksonville, that the municipal bankruptcy case for the above city has been referred to a master and hearings are in process. It will probably be some time before any final decision is rendered.

St. Lucie County and Special Road and Bridge District No. 5 (P. O. Fort Pierce), Fla. Bond Sale—W. R. Lott, Clerk

of the Circuit Court, states that R. C. Crummer & Co. of Orlando, were the successful bidders for only \$266,000 of the 4% semiann. bonds aggregating \$344,000, offered for sale on Dec. 20—v. 154, p. 1577—paying 103.50 for the following bonds:

\$71,000 county road and bridge refunding, issue of 1940 bonds.

191,000 Special Road and Bridge District No. 5, refunding, issue of 1940 bonds. No other bids were received.

Sumter County and Special Road & Bridge District No. 6 (P. O. Bushnell), Fla.

issuance of \$7,000,000 tube construction bonds.

Daly City, Calif.

Bond Sale Details—The City Clerk states that the \$39,800 course.

On the document of a residence in his home State does not necessarily exempt a Federal worker in the District of Columbia from paying the District's income tax. The Court's price of 103.00, a basis of about 255%.

\$363,000 county road and bridge refunding bonds. Issue of 1940. Due July 1, as follows: \$25,000 in 1942 to 1945, \$26,-000 in 1946, \$25,000 in 1947, \$30,000 in 1948, \$24,000 in 1949, \$29,000 in 1950, \$34,000 in 1951, \$29,000 in 1952, \$50,-000 in 1953, and \$16,000 in 1954

33,000 Special Road & Bridge District No. 6 refunding bonds. Issue of 1940. Due July 1, as follows: \$2,000 in 1942 to 1944, and \$3,000 in 1945 to 1953.

Dated July 1, 1940. Denom. \$1,-000. Prin. & int. payable at the First National Bank, Chicago.

IDAHO

Camas County (P. O. Fairfield),
Idaho

Bond Offering — Sealed bids
will be received until Jan. 6, by
the Clerk of the Board of County Commissioners, for the purchase of the following bonds aggregating \$25,000: \$16,000 court house, and \$9,000 hospital bonds. (These bonds are being offered, subject to the outcome of an election scheduled for Jan. 3.)

Grangeville, Idaho Bond Sale-The \$70,000 semiann. water works revenue bonds offered for sale on Dec. 19-v. 154, p. 1362-were awarded to a syndicate composed of Richards & Blum, Murphey, Favre & Co., both of Spokane, and Power & Marshall of Seattle, paying a premium of \$216, equal to as follows: \$33,000 as 3s, due on Dec. 1; \$2,000 in 1943, \$3,000, 1944 foreign Exchange Rates. 1679 to 1946, \$4,000, 1947 to 1949, \$5,000, 1950 and 1951; the remaining \$37,000 as 2\frac{3}{4}s, due on Dec. 1; ing \$37,000 as 23/4s, due on Dec. 1; \$5,000 in 1952 to 1954, \$6,000,

1955 to 1957, and \$4,000 in 1958. ILLINOIS

Barr Township (P. O. Hettick), Ill.

Proposed Election-An election will be held shortly on the ques-tion of issuing \$18,000 road improvement bonds.

Bethalto School District, Ill. 000 school building bonds was approved by the voters at an election on Dec. 14. Additional facilities were made necessary due large influx of defense workers.

Calumet City, Ill.

School Bonds Defeated—At a recent election the voters defeated a proposal to issue \$40,000 school building addition bonds.

Dongola, Ill.

Bonds Authorized - Village Council passed an ordinance authorizing an issue of \$25.000 water system revenue refunding bonds.

FINANCIAL NOTICE

NOTICE TO THE HOLDERS OF:

Kingdom of Denmark

Twenty Year 6% External Gold Bonds, Due January 1, 1942

Twenty Year 6% External Gold Bonds,
Bue January 1, 1942

The undersigned Minister of Denmark in
Washington makes the following statement
for the information of bondholders of the
above-described issue (hereinafter referred
to as the "6% Loan"):
Under existing conditions the Kingdom
of Denmark is not at this time in a position to meet the maturity on January 1,
1942 of \$30,000,000 principal amount of
the 6% Loan.
For the purpose of paying January 1,
1942 coupons of the 6% Loan, I propose to
put The National City Bank of New York,
55 Wall Street, New York City, Fiscal
Agent, in funds so far as it is estimated to
be necessary to make coupon payments to
holders of bonds other than those held for
account of residents of Denmark. The purpose of so excluding residents of Denmark
is to conserve, to the greatest extent possible, dollar exchange available to Denmark
for possible future use in connection with
external debt service. January 1, 1942 coupon payments will be made subject to such
licence as may be granted to the Fiscal
Agent by the United States Treasury.
It is contemplated to make subsequent
pertinent announcements in due course
with a view to informing bondholders of
the future status of the Loan.

HENRIK KAUFFMANN
Envoy Extraordinary and

HENRIK KAUFFMANN Envoy Extraordinary and Minister Plenipotentiary of His Majesty the King of Denmark Washington, D. C., December 24, 1941.

MICHIGAN

Detroit, Mich.

City Officials Confer On Proposed Refunding-The city's finance committee, consisting of Mayor Edward J. Jeffries, Jr., City Controller Charles G. Oak-man, Council President John W. Smith and Councilman John C. Lodge, was scheduled to take action this past week in the matter of arranging for sale of a large issue of refunding bonds.-V. 154, p. 1579. Previous reports placed the amount of the projected issue at about \$35,000,000. Mayor Jefferies is quoted as saying that he and Mr. Oakman had been assured by financial leaders in New York of the probable success of any new borrowing and that confidence in the future of the city prevailed in the investment field. The proposed financing would be effected under the provisions of recently adopted legislation which becomes fully effective on Jan. 9, 1942, permitting a more elastic schedule of maturities on refunding issues. It is designed to level the city's debt service from \$19,-000,000 annually to \$17,500,000 through a reduction of the current interest charge of 41/2 % on the outstanding bonds to 21/4%. The average maturity under the plan would be on a 15-year basis, it was said.

Offerings Wanted—Charles G. Oakman, City Controller, will receive sealed offerings of city noncallable bonds until 10 A. M. (EST) on Jan. 6 in the amount of approximately \$425,000 for investments for the city sinking fund, under the following conditions: Offerings shall remain firm until 1 P. M. on Jan. 7, and shall show the purpose of the bonds, rate of interest, date of maturity, the dollar value and the yield. Offerings will be accepted on the basis of the highest net yield to the city as computed from the dollar price, as of Jan. 6, 1942. Bonds maturing up to 1959 will be accepted in the amount of \$375,000. and bonds maturing up to 1962 will be accepted in the amount of \$50,000. City reserves the right to reject any or all offerings and for bonds purchased which are delivered subsequent to Jan. 13, 1942, to pay accrued interest up

to that date only. Bonds Purchased-Charles G. Oakman, City Controller, reports that as a result of the call for tenders on Dec. 17 of non-callable city bonds-v. 154, p. 1474-an aggregate of \$337,000 bonds were purchased as investments for the Water Board Division sinking fund at an average yield of 2.457%

Bonds Purchased-In connection with the call for tenders on Dec. 22 of non-callable city bonds, Charles G. Oakman, Secretary of the Board of Trustees Retirement System, reports that the board purchased \$450,000 bonds at an average yield of

Ecorse, Mich.

mann, Village Clerk, will receive 1941.

sealed tenders of certificates of in-debtedness, due Feb. 1, 1943, in the amount of \$22,000, until 7:30 P. M. on Jan. 6. Bidder to specify the lowest prices at which the certif-icates will be sold to the sinking fund for cancellation.

Erin Township, Macomb County, Mich.

Bond Offering-Alfred Schott, Township Clerk, will receive sealed bids until 8 P. M. (EST) on Jan. 9 for the purchase of \$125,000 not to exceed 6% interest coupon non-callable water supply system revenue bonds. Dated Jan. 1, 1942. Denom. \$1,000. Due Jan. 1 as follows: \$3,000 from 1947 to 1950 incl.; \$4,000, 1951 to 1955 incl.; \$6,000 from 1956 to 1967 incl. and \$7,000 from 1968 to 1970 incl. Rate or rates of interest to be expressed in multiples of ¼ of 1%. Principal and interest (J-J) payable at the Detroit Trust Co., Detroit, or at its successor paying agent named by the district which shall be a responsible bank or trust company in Detroit. Both principal and interest of the bonds will be payable solely from revenues of the water system. A certified check for 2% of the bonds, payable to order of the Township Treasurer, is required. Bids shall be conditioned upon the legal opinion of Claude H. Stevens of Berry and Stevens, atorneys, Detroit, approving the legality of the bonds. The cost of said legal opinion and of the printing of the bonds will be paid by the township. Bonds will be delivered at Detroit.

MINNESOTA

Breckenridge, Minn.

Bond Offering - Sealed bids will be received until 8 p.m. on Jan. 5, by Ruth Hamilton, City Clerk, for the purchase of \$30,000 sewer bonds. Interest rate is not to exceed 4%, payable F-A. Dated Feb. 1, 1942. Denom. \$1,000. Due \$3,000 Feb. 1, 1944 to 1953. Wisconsin (State of)

Larger 1942 Tax Yield Ex-pected—Taxes levied and collected by Wisconsin State and local units of government will probably yield larger amounts of revenue in 1942 than in 1941, the Wisconsin Taxpayers Alliance said today in its annual survey of the tax year.

"Tax yields in the State rose substantially in 1941 without any material increase in rates except for property taxes," the alliance amounted to \$214,854,000, about dicates that the trend toward increased yields will continue dur-ing 1942."

Among reasons listed for higher tax yields next year were: increases in business and industrial activity and increases in farm income; and the fact property tax levies to be collected next year will be higher than last year's levy.

The survey pointed out factory payrolls in selected cities were 45% higher in October, 1941, than in October, 1940, and State farm prices were up 44%. The bulletin says:

"Total state and local taxes levied in Wisconsin in the fiscal year ended June 30, 1941, amounted to \$214,84,000, or about \$68.03 for each man, woman and child in the State.

"The 1941 Wisconsin State and local taxes were the highest in the history of the State, representing an increase of 36% in the last seven years and a jump of about 4% over per capita taxes in 1940."

THE COURSE OF BANK CLEARINGS

Bank clearings this week show an increase compared with a year ago. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ended today, Saturday, Dec. 27, clearings from all cities of the United States from which it is possible to obtain weekly clearings will be 12.1% above those for the corresponding week last year. Our preliminary total stands at \$6,804,784,064 against \$6,072,643,183 for the same week in 1940. At this center there is an increase for the week ended Friday of 8.9%. Our comparative summary for the week follows:

Clearings—Returns by Telegraph Week Ending Dec. 27	1941	1940	%
Week Ending Dec. 21	\$	8	
New York	2,715,663,092	2,492,753,891	+8.9
Chicago	338,832,000	259,221,945	+ 30.7
Philadelphia	441,000,000	345,000,000	+27.8
Boston	210,355,703	188,475,158	+11.6
Kansas City	*105,000,000	78,116,799	+ 34.4

Total all cities for week	6,804,784,064	6,072,643,183	+ 12.1

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends today (Saturday) and the Saturday figures will not be available until noon today. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results for the week previous—the week ended Dec. 20. For that week there was an increase of 17.3%, the aggregate of clearings for the whole country having amounted to \$9,595,498,231 against \$8,249,423,708 in the same week of 1940. Outside of this city there was an increase of 36.5%, the bank clearings at this center having recorded an increase of 1.0%. We group the cities according to the Federal Reserve districts in which they are located and from this it appears that the New York Reserve District (including this city), recorded an increase of 2.4%, the smallest in any District. The greatest improvement was recorded by the Cleveland and the Minneapolis Federal Reserve Districts with gains of 45.3% and 45.1%, respectively. A 42.1% increase was shown by San Francisco, a 41.9% by Kansas City and 41.0% by the Chicago Federal Reserve District. Boston and Dallas were not far apart with gains of 39.6% in the first and 38.5% in the latter. All the remaining Districts also showed gains: St. Louis 36.4%, Atlanta 33.4%, Richmond 28.3% and Philadelphia 25.7%.

In the following we furnish a summary by Federal Reserve districts.

Non-Ferrous Metals-Full Control Of Tin Stocks Ordered-Copper Prices Unchanged

"Metal and Mineral Markets" in its issue of Dec. 25 reported that control of all tin supplies in this country by the Government became effective during the last week. The copper conference held in Washington on Dec. 18 disclosed that there has been no change in the views entertained by OPA in reference to copper prices. OPM has revised Priorities Regulation No. 1 to conform with current practice

nese antimony sold at 161/2c. a price stability at a time when rispound. The publication further reported as follows:

Copper

The job of speeding up allocations of copper is receiving attention in Washington and the industry hopes that January metal will begin to move to fabricators soon after the first of the month. Sales for last week to the domestic trade totaled 10,423 tons, making the total for the month so far 63,507 tons.

The Government-managementlabor conference, held in Washington on Dec. 18, apparently accomplished little except to again emphasize the complexity of the job of producing copper in this country under varying conditions. Labor policy was examined, but, according to observers, nothing came out of this phase of the dis-Misinterpretation of what Donald Wallace, of the price division, said about copper prices appeared in the "Wall Street Journal," which brought out a strong statement on price policy from Price Administrator Henderson that clarified that situa-

tion as follows:

"The position of the Office of Price Administration is that 12c. a pound is an adequate price for by far the bulk of the copper being produced in the United States. Copper output is increasing substantially at 12c. Only a small part of the country's current and potential output requires prices above 12c. OPA will approve prices above 12c. for additional copper that cannot be produced profitably at this price. Approval has already been given in a number of cases. This system of differential pricing permits maximum production without the serious inflation which would atprice of all copper. . . . Efforts, apparently by trade informants, prior month. make it appear that OPA is willing to permit a general rise

requiring producers to accept alleorders bearing priority rating on someone's part to sabotage the before taking other business. Chi-Government's effort to maintain ing prices for such an important commodity as copper would seriously hamper success of the war effort."

Lead

Consumers of lead are expected to obtain between 70,000 and 75,-000 tons of lead during January. Requests for lead for January delivery exceeded 100,000 tons. The price of common lead continued at 5.85c., New York, and at 5.70c., St. Louis. Sales of common lead for the last week involved 5,481

Statistics for November covering lead refined in this country showed deliveries of 45,980 tons, againt 43,537 tons in October. Total production was 48,930 tons, of which 41,566 tons was obtained from domestic ore.

Zinc

The Prime Western division sold 3,964 tons of the common brands of zinc during the week ended Dec. 20. Shipments in the same week totaled 5,521 tons. The backlog dropped to 73,507 tons. The feeling obtains in the trade that the present plan of regulating the zinc industry will be continued for at least 60 days. Recently, it was thought that the plan might be changed at the turn of the year. The "pool" for January will probably bet set at 31% of October production. The price situation was unchanged.

Production of zinc at domestic mines, in terms of recoverable metal, amounted to 64,135 tons during October, which compares with 62,339 tons in September, the Bureau of Mines reports. Preliminary figures for November point to an output of about 62,100 tons, a decrease of 3% from the October level. However, the daily tend a rise of several cents in the rate of production for November was virtually the same as in the

Tin

Control of tin supplies was an-

Washington, and receipt of official word on just how the use of tin is to be restricted to conserve the rumors that the price is to be supply, the market is doing noth-regulated soon; (2) reports that ing. The ceiling of 52c. for Straits consumers working on defense tin effectively controlled what orders are obtaining metal at \$193

was as follows:

		Dec.	Jan.	Feb.	Marc
Dec.	18	52.000	52.000	52.000	52.00
Dec.	19	52.000	52.000	52.000	52.00
Dec.	20	52.000	52.000	52.000	52.00
Dec.	22	52.000	52.000	52.000	52.00
Dec.	23	52.000	52.000	52.000	52.00
Dec.	24	52.000	52.000	52.000	52.00
C	hinasa	4im	000	anat	****

Chinese tin, 99%, spot, was nominally as follows: Dec. 18, 51.125c.; 19, 51.125c.; 20th, 51.125c.; 22, 51.125c.; 23, 51.125c.; 24, 51.125c.

London Market-Dec. 18 to Dec. 24, inclusive, no quotations. Last was £259 for spot and £262 for three months.

Quicksilver The trade is confused about (1) ing. The ceiling of 52c. for such tin effectively controlled what would otherwise have been a bad (3) the supply situation is as stances, some sellers have virtually withdrawn from the market and others are limiting sales to their regular customers at around \$200 per flask. On "drug-store" lots as high as \$215 has been

> San Francisco quotations on nearby quicksilver range from \$196 to \$200 per flask.

Silver The silver market in London was quiet during the last week, with the prise unchanged quotation on Dec. 8, per long ton, 231/2d. The New York Official continued at 35 %c., and the U.S. Treasury price held at 35c.

	DAILY PRICES OF METALS ("E. & M. J." QUOTATIONS)					
	-Electrolytic	Copper-	Straits Tin,	-Le	ad-	Zinc
Dec.—	Dom., Refy.	Exp. Refy.	New York	New York	St. Louis	St. Louis
18	11.775	11.200	52.000	5.85	5.70	8.25
19	11.775	11.200	52.000	5.85	5.70	8.25
20	11.775	11.200	52.000	5.85	5.70	8.25
22	11.775	11.200	52.000	5.85	5.70	8.25
23	11.775	11.200	52.000	5.85	5.70	8.25
24	11.775	11.200	52.000	5.85	5.70	8.25
Average	11.775	11.200	52.000	5.85	5.70	8.25

Average prices for calendar week ended Dec. 20 are: Domestic copper f.o.b. refinery, 11.775c.; export copper, f.o.b. refinery 11.200c.; Straits tin, 52.000c; New York lead, 5.850c.; St. Louis lead, 5.700c.; New York lead, 5.850c.; St. Louis lead, 5.700c.; New York lead, 5.850c.; St. Louis lead, 5.700c.; New York lead, 5.850c.; St. Louis zinc, 8.250c.; and silver, 35.125c.

The above quotations are "M. & M. M.'s" appraisal of the major United States markets, based on sales reported by producers and agencies. They are reduced to the basis of cash. New York or St. Louis, as noted. All prices are in cents per pound.

Copper, lead and zinc quotations are based on sales for both prompt and future deliveries; tin quotations are for prompt delivery only.

In the trade, domestic copper prices are quoted on a delivered basis; that is, delivered at consumers' plants. As delivery charges vary with the destination, the figures shown above are net prices at refineries on the Atlantic seaboard. Delivered prices in New England average 0.225c. per pound above the refinery basis.

Export quotations for copper are reduced to net at refineries on the Atlantic seaboard. On foreign business, owing to the European War, most sellers are restricting offerings to f.a.s. transactions, dollar basis. Quotations for the present reflect this change in method of doing business. A total of .05c. is deducted from f.a.s. basis (lighterage, etc.) to arrive at the f.o.b. refinery quotation.

Agricultural Dept. Is Reorganized

Secretary of Agriculture Claude R. Wickard announced on Dec. 13 a reorganization of the Department of Agriculture's administrative machinery and the formation of an Agricultural Defense Board, composed of Department officials to assist in directing vital war-time proof the Department. Through the reorganization, 19 line agencies of the Department are being placed in eight groups headed by administrators.

"Through this Board and the reorganization," Secretary Wickin copper prices are entirely nounced by OPM at the beginning without justification and, in my of the week. Pending action on ard said, "we hope to contribute opinion, represent a wilful attempt actual allocation of metal through our maximum effort toward help-

ing farmers discharge the primary responsibility of American agriculture during the emergency—the production of the food and fiber needed by this country and her allies. To this task, all others must be subordinated."

The group administrators who will be members of the Agricultural Defense Board and the agencies which will be under the general supervision of each fol-

R. M. Evans, Administrator of the Agricultural Adjustment Administration, becomes Administrator, and Dillon S. Myer, Assistant Chief, Soil Conservation Service, becomes Assistant Administrator of the Agricultural Adjustment and Conservation Group. Under the supervision of the Administrator of Agricultural Adjustment and Conservation will be grouped the activities of the Agricultural Adjustment Administra-tion; the Soil Conservation Service; the Federal Crop Insurance Corporation, and the Sugar Division.

Roy F. Hendrickson, Administrator, Surplus Marketing Administration, becomes Administrator and C. W. Kitchen, Chief, Agricultural Marketing Service, becomes Assistant Administrator of Agricultural Marketing. Under the supervision of the Administrator of Agricultural Marketing will be grouped the activities of the Surplus Marketing Administration; the Commodity Exchange Administration, and the Agricultural Marketing Service, except for the Division of Agricultural Statistics.

E. C. Auchter, Chief of the Bureau of Plant Industry, becomes Administrator of Agricultural Research. Under the supervision of the Administrator of Agricultural Research will be grouped the activities of the Bureau of Animal Industry; Bureau of Dairy Industry; Bureau of Plant Industry; Bureau of Agricultural Chemistry and Engineering; Bureau of Entomology and Plant Quarantine; Office of Experiment Stations; Beltsville Research Center, and Bureau of Home Economics.

J. B. Hutson, President, Commodity Credit Corporation; C. B. Baldwin, Administrator, Farm Security Administration; A. G. Black, Governor, Farm Credit Administration; Harry Slattery, Administrator, Rural Electrification Administration, and Earle H. Clapp, Acting Chief, Forest Service, are administrators but there have been no additions to their groups. Other Board members are M. Clifford Townsend, Director, Office of Agricultural Defense Relations; H. R. Tolley, Chief of the Bureau of Agricultural Economics; and M. L. Wilson, Director, Extension Service.

Discount Rates of Foreign Central Banks

There have been no changes during the week in the discount rates of any of the foreign central banks. Present rates at the leading centers are shown in the table which follows:

New York Money Rates

Dealing in detail with call loan rates on the Stock Exchange from day to day, 1% was the ruling quotation all through the week for both new loans and renewals. The market for time money continues quiet. Rates continued nominal at 11/4% up to 90 days and 11/2% for four to six months maturities. The market for prime commercial paper has been very active this week. There has been no change in rates as yet, but the market continues to show signs of stiffening. Rates are 5% %-3/4% for all maturities.

Discount Rates of the Federal Reserve Banks

There have been no changes this week in the rediscount rates of the Federal Reserve banks; recent advances on Government obligations are shown in the footnote to the table. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:

	tes of Federa ate in Effect	l Reserve Banks Date	Previous
Federal reserve banks	Dec. 26	Established	Rate
Boston	1	Sep 1, 1939	1 1/2
New York	1	Aug 27, 1937	11/2
Philadelphia	11/2	Sep 4, 1937	2
Cleveland	11/2	May 11, 1935	2
Richmond	11/2	Aug 27, 1937	2

Manager's Assessment Of

Member Bank Condition Statement

In the following will be found the comments of the Board of Governors of the Federal Reserve System respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of business Dec. 17.

The condition statement of weekly reporting member banks in 101 leading cities shows the following principal changes for the week ended Dec. 17: Increases of \$94,-000,000 in commercial, industrial and agricultural loans, \$355,000,000 in holdings of United States Government bonds, and \$571,000,000 in United States Government deposits, and decreases of \$631,000,000 in reserve balances with Federal Reserve Banks and \$622,000,000 in demand deposits-adjusted.

Commercial, industrial and agricultural loans increased \$35,000,000 in New York City, \$23,000,000 in the Chicago district, \$10,000,000 in the Cleveland district and \$94,000,000 at all reporting member banks.

Holdings of Treasury bills increased \$28,000,000 in the Chicago district and \$5,000,000 at all reporting member banks, and declined \$37,000,000 in New York City. Holdings of Treasury notes declined \$26,000,000 in the Cleveland district and at all reporting member banks. Holdings of United States Government bonds increased in all districts, the principal increases being \$118,000,000 in New York City, \$67,000,000 in the Cleveland district and \$66,000,000 in the Chicago district.

Demand deposits-adjusted declined \$397,000,000 in New York City, \$71,000,000 in the Chicago district, \$40,-000,000 in the Philadelphia district and \$622,000,000 at all reporting member banks. United States Government deposits increased \$361,000,000 in New York City and \$571,000,000 at all reporting member banks.

Deposits credited to domestic banks declined \$27,000,-000 in New York City, \$25,000,000 in the Richmond district, \$24,000,000 in the Boston district and \$55,000,000 at all reporting member banks.

A summary of the principal assets and liabilities of reporting member banks together with changes for the week and the year ended Dec. 17, 1941, follows:

IN THOUSAND - IN THE		Increase (+)	or Decrease (—)

Bankers' Acceptances

The market for prime bankers' acceptances has shown some slight improvement this week, but the supply is still very light and the market has been quiet. Dealers' rates as reported by the Federal Reserve Bank of New York for bills up to and including 90 days are ½% bid and 7/16% asked; for bills running for four months, 9/16% bid and ½% asked; for five and six months, 5%% bid and 9/16% asked. The bill buying rate of the New York Reserve Bank is ½% for bills running from 1 to 90 days.

Course of Sterling Exchange

The market for sterling exchange is quiet and the free pound is steady in dull trading. The range for sterling this week has been between \$4.03\(^1\)4 and \$4.03\(^3\)4 for bankers' sight, compared with a range of between \$4.03\(^1\)4 and \$4.03\(^3\)4 last week. The range for cable transfers has been between \$4.03\(^1\)2 and \$4.04, compared with a range of between \$4.03\(^1\)2 and \$4.04 a week ago.

Official rates quoted by the Bank of England continue unchanged: New York, \$4.02½-\$4.03½; Canada, 4.43-4.47 (Canadian official, 90.09c.-90.91c. per United States dollar); Australia, 3.2150-3.2280; New Zealand, 3.2280-3.2442.

In London exchange is not quoted on Germany, Italy, or any of the invaded European countries. Since July 26 exchange on China and Japan has been suspended by Government order. In New York exchange on China and Japan was similarly suspended on July 26, but trading in the Shanghai yuan was resumed under special license on Aug. 4. The unit has been superseded by the Chungking dollar.

Coordination of the war strategy and productive efforts, and pooling of resources of the United States, Britain, Russia, and China is being studied in the Anglo-American war conversations started this week in Wash-

ington. The conferences between President Roosevelt and Prime Minister Churchill on broad questions of policy will be implemented by consultations by the high military, naval, and aviation representatives of both nations and their large staffs of feehnical and economic experts. As soon as possible the joint planning will be extended to the other anti-Axis nations. In response to questions by reporters at the White House on Tuesday, Prime Minister Churchill stated that production will be intensified to the point where the prompt and effective delivery of war supplies, including lend-lease aid, wherever needed will be the chief problem. The importance of this problem is attested by the inclusion of Lord Beaverbrook, Britain's Minister of Supply, in the Prime Minister's party. However, Mr. Churchill indicated that an Allied Supply Command is unlikely in view of the large British staff already functioning here.

By the enactment of H. R. 6233, a bill to expedite the war effort, Congress has authorized the President to order the use of alien property for the benefit of the United States, thereby permitting the control, sale, or other disposition of some \$7,000,000,000 of frozen alienowned property.

In a recent radio address urging a vast, united effort to outstrip the Axis in production, Wendell L. Willkie said that Germany is spending between \$25,000,000,000 and \$30,000,000,000 a year on war weapons, against an annual expenditure of about \$20,000,000,000 by Great Britain and her dominions. Total United States war expenditures in 1941, including food, new facilities, and quartermaster supplies, are only \$12,500,000,000, and actual fighting materials represent only one-fifth of the German effort, he asserted. OPM Research Chief Stacy May pointed out recently that the United States spent \$16,000,000,000 or 17% of its \$92,000,000,000 income in 1941 on the war, while Britain spent 60% of a national income of only \$24,000,000,000. He said this country could spend \$45,000,000,000 a year without strain.

Under a Treasury Department ruling issued on Dec. 18 income from British "blocked accounts" is not includable in the income of an American taxpayer unless it is actually realized. Where income has been realized from a blocked account, the tax is computed at the official sterling exchange rate prevailing at the date of the transaction. The ruling of the Bureau of Internal Revenue stated that blocked accounts were established on Nov. 23, 1940. It is explained that except by special permission from the Bank of England, the only way a non-resident of the United Kingdom may realize on a blocked account is "by conversion with permission into specified governmental securities from which such non-resident may receive interest in sterling which, as income, is available to him through registered account at the official exchange rate established by the British Treasury. The official rate would also apply to conversion of British income tax paid with respect to this item." The items which may be credited only to blocked accounts covering payments to nonresidents of Great Britain and which are therefore not realizable for Federal income tax purposes, are listed as:

"(A) Sterling proceeds of securities drawn for repayment or maturing after the date of notice from the Bank of England, or surrendered after the date thereof for cashing before maturity. This does not apply to national savings certificates, 3% defense bonds, or treasury bills issued by the British Government.

"(B) Amount to be distributed following the sale or winding up of companies or the dissolution of partner-ships.

(C) Legacies and similar payments.(D) Capital payments arising out of settlements,

and
"(E) Proceeds of the sale of real estate, furniture, pictures, jewelry or other movable assets situated in the United Kingdom other than goods imported for sale in the ordinary course of trade."

British holders of the bonds affected by the recent Argentine conversion offer were required to elect payment in cash. The Argentine issues were restricted securities and were therefore already registered with the Bank of England, which arranged to pay for them in bulk, taking over the foreign exchange and crediting the accounts of the bondholders with sterling.

Japan's entry into the war increased the British blacklist of enemy firms by 368, bringing to more than 6,000 the number of commercial firms, banks and shipping companies with which Britons are forbidden to

Steadily mounting circulation of the Bank of England, which rose during the week ended Dec. 17 to £13,-467,000, the largest weekly increase since the beginning of the war, is ascribed to a combination of seasonal demand and inadequate public response to Government appeals to save. It is thought that the Government will soon announce a revised wage policy to curb excessive spending. According to the economist, John Maynard Keynes, the total daily income of Britons exceeds the value of available consumer goods by £4,000,000, as salaries and other income amount to £16,000,000 a day, while only £12,000,000 of consumer goods are available daily. He urged the people to save by lending the Government at least £2,000,000 a day.

OPM experts stated on Dec. 19 that Congressional appropriations, contract authorizations, and Reconstruction Finance Corporation commitments to date bring the total authorized United States war funds to \$74,440,000,000. Owng to our entry into the war, the previous estimate of \$10,400,000.000 for 1942 construction has been raised to about \$11,250,000,000, which will be expended entirely for construction essential to defense or to health and safety. The war is already costing the United States 1 1/3 times the current British expenditure. At \$63,000.000 a day, against Britain's \$47.000,000, the United States is spending \$2,625,000 an hour,

compared with \$1,958,333 by Britain, or \$43,750 a minute against \$32,638, which comes to \$729 every second against \$544 similarly expended by Great Britain. However, a daily expenditure of about \$122,000,-000 would be required to bring our war expenditures to the same scale as Britain's, in proportion to population.

The Census Bureau reported on Dec. 21 that the total debt burden of the United States on June 30 reached a record high of \$69,162,000,000, equivalent to a per capita debt of \$521, despite a slight decrease in State and local indebtedness of \$42,000,000 to \$20,183,-000,000. The Federal debt on June 30 was \$48,979,-000,000 but by Dec. 18 it had increased to \$57,251,209,-249, owing to the accelerated pace of war spending.

Representative Patman of Texas, a member of the House Committee on Banking and Currency, last week urged legislation to compel the use of idle gold reserves to finance the war. He said the Federal Reserve Banks could create the necessary credit without cost to the Government, and thus could save the taxpayer from \$2,-500,000,000 to \$4,000,000,000 a year in interest charges and pay the anticipated \$100,000,000,000 war debt in 40 years. "The banks now have loaned approximately \$10 to every \$1 of their capital and assets," he asserted. "Why permit them to make loans of \$15 to \$1, or \$30 to \$1, through the purchase of government bonds, and thereby collect tribute from the Government? Inflation can be prevented and our national debt can be paid without too burdensome taxes if Congress will compel the use of idle gold to finance the extra \$100,-000,000,000."

Extension of export control to all goods leaving the country became effective on Dec. 23. As in the case of the 80% previously subject to control by the Economic Defense Board, now the Economic Warfare Board, licenses will be issued for most of the new items affected. As these are of little strategic importance, they will probably be covered by short-range general licenses, permitting their shipment to Canada, Great Britain and Northern Ireland, Newfoundland, Iceland, and the Philippine Islands, indicated respectively by the symbol G 1, 2, 47, 62, and 63. Commodities issued under a general long-range license are designated by the symbol G 1 to 81 and may be shipped wherever United States exports are allowed to go. Materials or products of vital strategic importance require individual licenses. With the progressive elimination of non-military exports due to war restrictions, private exporting agencies may be forced out of business unless some licensing system is provided under which the exporters would be permitted to handle military and lend-lease shipments. While the established foreign trade agencies handle much of the Government's imports of strategic materials, exports have been routed largely through United States and British Government agencies. Another serious threat to United States export business is seen in the pending price control legislation, since foreign traders assert that either ceilings or floors for export goods would make it impossible for American exporters to compete successfully in world markets.

Eugene P. Thomas, President of the National Foreign Trade Council, stated recently that present methods of procurement under the lend-lease program fail to utilize the selling and distribution machinery built up by American exporters during the past hundred years, and urged that the lend-lease program should not be permitted to disrupt the processes and machinery which have created an American export trade of approximately \$5,000,000,000 a year. Mr. Thomas pointed out that the present procurement system tends not only to divert foreign purchases from established American agencies, but to deprive the British Purchasing Commissions of their associations with American manufacturers, which have been of great mutual benefit in providing essential information respecting British technical requirements and American manufacturing procedure. He noted that exporters are expecting modification of the new export prices on iron and steel so as to permit a reasonable margin over the domestic ceilings for the higher costs on exports due to higher operation costs, credit risks, financing, demurrage, etc.

A boom in South African silver mining is reported, due to hoarding, which is rapidly absorbing the available supply of minted coins. Since the Rand refinery produces some 3,000 ounces of silver a day, there is no fear of a shortage of coins.

New Australian taxes, in addition to those provided in November in the record \$1,056,136,000 war budget, have been adopted to raise an estimated \$79,625,000 during 1941-42 for the mobilization of the militia and ARP services. Between \$150,000,000 and \$160,000,000 will be spent by Australia because of the war in the Pacific. A war levy of 2½c. per dollar is imposed on incomes of \$510 to \$975 and of 5c. per dollar on incomes in excess of \$975, with a rebate of 16c. a week allowed for wife and child. The company tax rate is increaesd from 15c. to 20c. per dollar.

The Canadian dollar continued its downward trend, declining in a thin market from its closing price of 86.75c on Friday last to 86.12c on Wednesday. The Dominion Bureau of Statistics reported that Canadian gold production increased during October to 461,168 ounces, compared with 445,085 ounces in September and 468.170 ounces in October, 1940. At 4,466,373 ounces, production during the 10 months of 1941 was 1.3% higher than in the corresponding 1940 period.

Elimination of tariff and all other barriers to the free flow of necessary munitions and war supplies between Canada and the United States is to be effected as rapidly as possible and will continue for the duration of the war, in the interests of maximum speed and efficiency in war output. The Joint War Production Committee of Canada and the United States recommended a 7-point statement of policy designed to integrate the resources and productive facilities of the two countries which has received the approval of President Roosevelt and the

Canadian war cabinet.

Kenneth W. Taylor, Secretary of the Wartime Prices and Control Board, said in a recent address that Canada's new price ceiling has already had an important effect in tending to check inflation by easing the previous demand for basic commodities and for industrial and other supplies to build up inventories against expected price advances. The real test will come, he said, when consumer spending power and demand encounter increasing supply shortages and rationing, because then buying will tend to seek black markets and so relax price control. In Britain, he said, prosecutions for violation of rationing and price control regulations are averaging around 3,000 a month, and the Government is spending about \$10,000,000 a week for losses on controlled marketing of essential commodities and in subsidies to keep down consumer prices. Canadian measures to combat inflation, cited in addition to the price control method, include the wage and salary ceiling, agricultural subsidies, industrial priorities and rationing, and curtailment of public spending power by war taxes, loans and

Montreal funds ranged during the week between a discount of 144% and a discount of 133/16%.

Continental and Other Foreign Exchange

Strain on the German economy is indicated, according to a recent Department of Commerce article, by an increasingly acute labor shortage, despite the use of about 1,700,000 foreign workers and a million German women, which is due to the need for reserves to replace the huge losses on the Russian front. In addition, rising production costs in steel, coal, textile, and leather industries and growing raw material shortages with consequent diminished production are reflected in reduced clothing and other rations. Slowdowns in Czech factories under German control are reported to have reduced output by 40% to 50% in the last few months.

Trading in all Bulgarian and Hungarian securities has been suspended by the New York Stock Exchange. Similar action was taken with respect to German, Italian,

and Japanese issues a week earlier.

In order to prevent transfers of dollar exchange to Denmark, Secretary Morgenthau on Wednesday revoked outstanding licenses governing payment of the Danish Government obligations from frozen funds. Because of war conditions the \$30,000,000 6% loan of the Kingdom of Denmark, which matures on Jan. 1. will not be met, it was announced on Wednesday by Henrik Kauffman, Minister at Washington. Jan. 1 interest will be paid to holders of bonds other than residents of Denmark. The exclusion of Danish residents is intended to conserve dollar exchange available to Denmark for possible future use in external debt service. The fiscal agent is the National City Bank of New York.

Exchange on the Latin American countries was mixed. The Cuban peso showed continued strength, reflecting currency shipments from New York banks in recent months for hoarding. A new trade agreement concluded with Cuba on Dec. 23 provides for reduction of certain import duties by both countries. The principal United States tariff concessions are on sugar and tobacco, while Cuba agrees to lower import duties on 30 American products, including automobile and truck parts and ac-

cessories, tires and tubes.

Mexican iron and steel exports to Canada are expanding under the stimulus of war requirements, and it is thought that oil needs of the anti-Axis nations will induce the United States to provide the necessary equipment to step up Mexican oil production. Revival of confidence in Mexican investment opportunities is indicated by the fact that more than half the Mexican capital lodged in United States banks some years ago has returned to Mexico, it was asserted recently by Salvador Ugarte, President of the Banco de Comercio of Mexico City. Nearly 400 Axis firms in Mexico are on the American blacklist. Frozen funds of nationals of belligerent countries with which Mexico has severed diplomatic relations are placed at about 2,000,000 pesos in bank reports published on Wednesday.

The Argentine unofficial or free market peso closed at 23.65 against 24.00 on Friday of last week. The Brazilian milreis closed at 5.20, against 5.20. Chilean exchange is quoted nominally at 5.17, against 5.17. The Chilean export peso is quoted nominally at 4.00, against 4.00. Peru is nominal at 15.75, against 15.75. The Mexican peso is quoted nominally at 20.70, against 20.70.

Exchange on the Far Eastern countries is quiet. Owners of United States Government securities, checks and currency in the Philippine Islands will be permitted to register any amount with the High Commissioner's office during the emergency, it was announced on Dec. 23. Funds will be held by the Treasury Department in Washington or delivered to a designated bank, corporation, or individual in the continental United States. United States investments in the Philippines are estimated by the Department of Commerce at \$156,800,000. Taxes on Philippine products exported to the United States have been suspended for one year from July 1, 1941.

The United States Treasury's agreement with the Central Bank of China, under which it has been able to obtain dollar exchange, has been extended for six months from Dec. 24. Successive extensions have been made since the original arrangement of July 14, 1937, and should not be confused with the stabilization agreement made earlier this year.

Public Circular No. 8A, issued on Dec. 21, authorizes Japanese nationals to pay taxes and fees to the Federal and State Governments, to deposit their funds in blocked accounts in banks, and to engage in certain other lim-

Foreign Exchange Rates

Pursuant to the requirements of Section 522 of the Tariff Act of 1930, the Federal Reserve Bank is now certifying daily to the Secretary of the Treasury the buying rate for cable transfers in the different countries of the world. We give below a record for the week just passed:

FOREIGN EXCHANGE RATES CERTIFIED BY FEDERAL RESERVE BANK TO TREASURY UNDER TARIFF ACT OF 1930 DEC. 19, 1941, TO DEC. 25, 1941, INCLUSIVE

In 1939, the Oriental Consolidated Mining Co., an American firm with many British and American stockholders, sold its Korean properties to a Japanese mining concern for \$8,175,000, payable in installments by the end of 1943. On Dec. 2 of this year, when a balance of \$6,000,000 was still outstanding, the New York Agency of the Yokohama Specie Bank, as guarantor of the Japanese company's payments, offered to settle the claim immediately for \$4,428,750 in cash. The American firm accepted the offer on Dec. 5. The Japanese banking agency was taken over by the State Superintendent of

Banks for liquidation on Dec. 8, following the declara-

ited types of transactions under proper safeguards.

tion of war. On Dec. 23 the State Superintendent of Banks was authorized to carry out the settlement agreement by paying by Dec. 29 \$4,428,750 from the funds of the New York Agency of the Yokohama Specie Bank, plus interest of \$5,905,000 from Sept. 1 to the date of payment. A United States Treasury license was issued for the transfer of the funds, and the balance of the Agency's \$17,000,000 available cash will be impounded by the United States Government.

The Hong Kong dollar closed at 25 5/16, against 25 5/16 on Friday of last week; Manila at 49.80, against 49.80; Singapore at 47.48, against 47.48; Bombay at 30.35, against 30.35; and Calcutta at 30.35, against 30.35.

Commercial Paper Outstanding

The Federal Reserve Bank of New York announced on Dec. 15 that reports received by the bank from commercial paper dealers show a total of \$387,100,000 of open market paper outstanding on Nov. 29, 1941. This amount represents an increase of 2.5% over Oct. 31, 1941, when \$377,700,000 was outstanding, and an increase of 67% over Nov. 30, 1940, when there was \$231,800,000 outstanding. standing. The Reserve Bank reports that this is the first uninterrupted increase from January to November noted in the bank's records which go back to 1918. It was also pointed out that the commercial paper market has shown marked improvement since the 1933 low, when on May 31 there was only \$60,100,000 out-

President's Pre-War Proposals To Japan **And Text Of Appeals To Emperor Hirohito**

President Roosevelt, in his last-minute appeal to Emperor Hirohito of Japan on Dec. 6, expressed a "fervent hope" for peace and warned that developments in the Pacific area "contain tragic possibilities." The White House released the text of the message on Dec. 7. Recalling the "beneficial influence" of the long peace between the

two countries, the President cited as high objectives in the conversations for peace the hope of the United States for a termination of the conflict between Japan and China and the hope that "nationalities of many diverse peoples could exist side by side without fear of invasion." His message

also said:

I am certain that it will be clear to your Majesty, as it is to me, that in seeking these great objectives both Japan and the United States should agree to eliminate any form of military threat.

Stating that the heavy movement of Japanese troops into French Indo-China constituted a "legitimate threat" to the peoples of the Philippines, East Indies, Malaya and Thailand, the President declared that "continuance of such a situation is unthinkable." He added that withdrawal of the Japanese forces would result in the assurance of peace throughout the whole of the south Pacific and closed his message with a direct appeal to the Emperor to help restore traditional amity and prevent further death and destruction in the world.'

The text of his appeal was as

follows:

Almost a century ago the President of the United States addressed to the Emperor of Japan a message extending an offer of friendship of the people of the United States to the people of Japan. That offer was accepted and in the long period of unbroken peace and friend-ship which has followed, our respective nations, through the virtues of their peoples and wisdom of their rulers, have prospered and have substantially helped humanity.

Only in situations of extraordinary importance to our two countries need I address to your Majesty message on matters of state. I feel I should now so address you because of the deep and far-reaching emergency which appears to be in forma-

Developments are occurring in the Pacific area which threaten to deprive each of our nations and all humanity of the beneficial influence of the long peace between our two countries. Those developments contain tragic possibilities.

The people of the United States, believing in peace and in the right of nations to live and let live, have eagerly watched the conversations between our two Governments during these past months. We have hoped for a termination of the present conflict between Japan and China. We have

hoped that a peace of the Pacific could be consummated in such a way that nationalities of many diverse peoples could exist side by side without fear of invasion, that unbearable burdens of armaments could be lifted for them all, and that all people would resume commerce without distrimination against or in favor of any nation.

I am certain that it will be clear to your Majesty, as it is to me, that in seeking these great objectives both Japan and the United States should agree to eliminate any form of military threat. This seemed essential to the attainment of the high objectives.

More than a year ago your Majesty's Government concluded an agreement with the Vichy Government by which five or six thousand Japanese troops were permitted to enter into northern French Indo-China for the protection of Japanese troops which were operating against China further north. And this Spring and Summer Vichy Government permitted further Japanese military forces to enter into southern French Indo-China for the common defense of French Indo-China. I think I am correct in saying that no attack has been made upon Indo-China, nor that any has been contemplated.

During the past few weeks it has become clear to the world that Japanese military, naval and air forces have been sent to southern Indo-China in such large numbers as to create a reasonable doubt on the part of other nations that this continuing concentration in Indo-China is not defensive in its character.

Because these continuing concentrations in Indo-China have reached such large proportions and because they extend now to the southeast and the southwest corners of the peninsula, it is only reasonable that the people of the Philippines, of the hundreds of islands of the East Indies, of Malaya and of Thailand itself are asking themselves whether these forces of Japan are preparing or intending to make attack in one or more of

these many directions. I am sure that your Majesty will understand that the fear of all these peoples is a legitimate fear, inasmuch as it involves their peace and their national existence. I am sure that your Majesty will understand why

manned and equipped so greatly as to constitute armed forces capable to measures of offense.

It is clear that a continuance of such a situation is unthink-

None of the peoples whom I have spoken of above can sit either indefinitely or perma-nently on a bek of dynamite.

There is absolutely no thought on the part of the United States of invading Indo-China if every Japanese soldier or sailor were to be withdrawn therefrom.

I think that we can obtain the same assurance from the governments of the East Indies, the governments of Malaya and the Government of Thailand. I would even undertake to ask for the same assurance on the part of the Government of China. Thus a withdrawal of the Japanese forces from Indo-China would result in the assurance of peace throughout the whole of the South Pacific area.

I address myself to your Majesty at this moment in the fervent hope that your Majesty may, as I am doing, give thought in this definite emergency to ways of dispelling the dark clouds. I am confident that both of us, for the sake of the peoples not only of our own great countries, but for the sake of humanity in neighboring territories, have a sacred duty to restore traditional amity and prevent further death and destruction in the world.

Prior to the transmittal of this appeal the United States, in a note to the Japanese Government on Nov. 26, had outlined a proposed basis for agreement between the two countries. This proposal as a basis of negotiation was rejected by Japan in a note delivered to the State Department on Dec. 7. after the "treacherous attack upon the United States had taken place," according to Secretary Hull's words. Both the United States note and the Japanese reply were made public by the State Department on Dec. 7.

The American note had proposed that the two governments draft (1) a mutual declaration of policy, to include the principle of inviolability of territorial integrity and sovereignty of each and all nations; the principle of noninterference in the internal affairs of other countries; the principle of equality, including equality of commercial opportunity and treatment; and the principle of reliance upon international cooperation and conciliation for the prevention and pacific settlement of contro-versies and for improvement of international conditions by peaceful methods and processes; and five principles concerning economic relations, and (2) that various steps be taken by both countries, among them being, a multilateral non-aggression pact in the Pacific; withdrawal of Japanese troops in China and Indo-China; giving-up of extra-territorial rights in China; support of the National Chinese Govern-ment of Chungking, and the conclusion of a reciprocal trade pact between Japan and the United States.

The Japanese reply was a flat rejection of the proposal and ter-mination of negotiations. While saying that Japan is ready to accept some of the principles, mostly concerned with commerce, the note stated that in view of world conditions "it seems only a utopian ideal on the part of the American Government to attempt to force their immediate adoption." The note charged the United States and Great Britain with "interfering with Japan's constructive endeavors toward the stabilization of East Asia" and, with other powers, of endangering the very existence of her empire. It also said that the American Govern-

askance at the establishment of military, naval and air bases Nov. Department Store Sales In New York Federal Reserve District 6% Above Year Ago

Sales of department stores in the Second (New York) Federal Reserve District increased 6% during November as compared with a year ago, according to an announcement issued Dec. 17 by the Federal Reserve Bank of New York. Stocks of merchandise on hand in department stores at the end of November were 32% more than at the end of November, 1940.

The apparel stores in the New York Reserve District reported a gain of 1% in net sales in November as compared with a year ago. Apparel stores' stock on hand at the end of the month was 34% above a year ago.

The following is the bank's tabulation:

Automobile Financing In October Again Lower

October figures on automobile financing, announced Dec. 16 by Director J. C. Capt, Bureau of the Census, Department of Commerce, showed that the dollar volume of retail automobile financing for 400 organizations amounted to \$106,680,347, an increase of 2.5%, as compared with September, 1941, a decrease of 29.8% as compared with October, 1940, and a decrease of 2.8% as compared with October, 1939. The volume of wholesale financing for October, 1941, amounted to \$198,874,483, an increase of 122.6% compared with September, 1941, a decrease of 10.1% as compared with October, 1940, and an increase of 52.6% as compared with October, 1939.

The volume of retail automobile receivables outstanding at the end of October, 1941, as reported by 214 organizations amounted to \$1,435,361,363. These 214 organizations accounted for 94.5% of the total volume of retail financing, \$106,680,347, reported for that month by 400 organizations.

The table below presents statistics on wholesale and retail financing for 400 organizations in Octber; figures of automible financing for the month of September, 1941, were published in the Nov. 27, 1941 issue of the "Chronicle," page 1234.

United States Declares A State Of War Exists Between It And Germany And Italy as to Germany at 3:05 p.m. and

The United States formally declared on Dec. 11 that a state of war exists between the Governments of Germany and Italy and the people of the United States. Congress acted unanimously soon after Germany and Italy had joined its Axis partner, Japan, in the war upon the United States.

In a brief message to the Congress shortly after noon on Dec. 11

President Roosevelt said that the "long-known and the long-ex-pected has thus taken place" and warned that the "forces en-deavoring to enslave the entire completed the war resolutions

Acreage And Production Of Crops, 1941

The year 1941 was unusually favorable for crop production, primarily because of above-normal rainfall in the western half of primarily because of above-normal rainfall in the western half of the country where low rainfall limited crop production during much of the 1930-39 period. Crop yields per acre were the highest on record, averaging 2% above yields secured in 1940 and 21% above the 1923-32 or predrought average. Yields appear to have been at least fairly good in practically all parts of the country except in the Western Gulf Coast region, in South Carolina and in some smaller scattered areas, including southeastern Nebraska, southeastern South Dakota and northern New York Wheat average eastern South Dakota, and northern New York. Wheat, averaging 16.9 bushels per acre, seems to be the only important crop that set a new high record of yield this year but this year's yields of corn, tobacco, potatoes, sugar beets, beans and soybeans have been exceeded only once or twice in the last 70 years and the yields of oats, barley, grain sorghums, rye, buckwheat, flaxseed, cotton, hay and peanuts were at levels reached only in unusually favorable seasons. Rice was about the only important field crop showing below-average yield per acre.

The acreage planted or used for the 46 principal field crops was about the same as in 1940 but the acreage lost from crop failure was the lowest in more than 10 years. This left for harvest about 338 million acres, 1% more than were harvested in 1940 but still 7% below the peak of 364 million acres harvested in 1932 when the crops included 24 million more acres of corn and 14 million more acres of cotton than in 1941. Notwithstanding the smaller more acres of cotton than in 1941. Notwithstanding the smaller acreage in these intensively cultivated crops, the exceptionally high level of crop yields per acre this season resulted in a near-record volume of crop production, about 11% in excess of the 1923-32 or predrought level. In comparison, aggregate production last year was 8% above the predrought level and in the highest year (1937), production was 12.6% above that level.

Present estimates of crop production in 1940 include revisions made after compilation of available records on crop movements, marketing and processing. The estimates for 1941, unlike those (Continued on Page 1682)

less than an hour after receiving the President's request. President Roosevelt signed the resolution one minute later put his signature to the Italian document.

The vote in the Senate for war with Germany was 88 to 0 and 90 to 0 for war with Italy. In the House the vote on the war resolution against Germany was 393 to 0 while the vote for war against Italy was 399 to 0. The larger Congressional war vote against Italy was due to the fact that some members arrived too late on the floor to vote on the German war resolution. In the House, Representative Jeannette Rankin, Republican of Montana, who cast the only dissenting vote against declaring war against Japan on Dec. 8, voted "present" on both the German and Italian declarations.

The two resolutions were identical in text save for the names of the countries involved. The following is the joint resolution of war with Germany:

Declaring that a state of war exists between the Government of Germany and the Government and the people of the United States and making provision to prosecute the same.

Whereas the Government of Germany has formally declared war against the Government and the people of the United States of America:

Therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, that the state of war between the United States and the Government of Germany which has thus been thrust upon the United States is hereby formally declared; and the President is hereby authorized and directed to employ the entire naval and military forces of the United States and the resources of the Government to carry on war against the Government of Germany; and, to bring the conflict to a successful termi-nation, all of the resources of the country are hereby pledged by the Congress of the United States.

In his brief message to Congress asking for the war declarations, President Roosevelt re-marked that "never before has there been a greater challenge to life, liberty and civilization," adding that united effort by all peoples determined to remain free "will insure a world victory of the forces of justice and of righteousness over the forces of righteousness over the forces of savagery and barbarism."

The text of the President's message follows:

To the Congress of the United States:

On the morning of Dec. 11 the Government of Germany, pursuing its course of world conquest, declared war against the United States.

The long-known and the long-expected has thus taken place. The forces endeavoring to enslave the entire world now are moving toward this nemisphere.

Never before has there been a greater challenge to life, liberty and civilization.

Delay invites greater danger. Rapid and united effort by all of the peoples of the world who are determined to remain free will insure a world victory of the forces of justice and of righteousness over the forces of savagery and of barbarism.

Italy also has declared war against the United States.

I therefore request the Congress to recognize a state of war between the United States and Germany, and between the United States and Italy.

FRANKLIN D. ROOSEVELT. The White House, Dec. 11, 1941.

Strengthening Of Life Insurance Seen As A Major Contribution To Defense

Strengthening the life insurance agency system would constitute "a major contribution" to the defense of democracy, Frank F. Weidenborner, Agency Vice-President of The Guardian Life Insurance Co. of New York, told the 35th Annual Convention of The Association of Life Insurance Presidents in New York on Dec. 11. With democracy now facing the gravest of threats, Mr. Weidenborner declared, "life insurance,"

as an integral part of that democracy, willingly and eagerly shoulders its full share of the responsiblity for its defense.

Suggestions already advanced for consideration in that connection, said Mr. Weidenborner, include the combating of inflationary elements through the sale of life' insurance, at the same time making available more premium dollars for the purchase of Government bonds to provide physical defense materials, and utilization of the life insurance sales organization in the sale of defense bonds to the public. In addition, "the contribution which agency leadership, and company management in general, can make to the strengthening of our agency system, and thereby to the whole institution of life insurance, will constitute a major contribution to the defense of democracy," he declared.

Executives of the country's leading life insurance companies were urged on Dec. 12 to oppose influences hampering or discouraging private insurance, in an address by Dr. Douglas S. Freeman, Editor of "The Richmond News Leader," who told the life com-pany officials that "when you con-tinue to combat every influence that would hamper or discourage private insurance you are not working for your corporate policyholders only but for your national policy makers also, and for your national traditions and your national ideals." Dr. Freeman maintained that life insurance has contributed "in immense, unrealized measure" to American progress and to the preservation of ideals, and declared with reference to present economic and social trends that "change will be violent and revolution as heretofore will be blunted in its effect if, within his means, on his own initiative and at his own sacrifice, the father is encouraged to carry sufficient insurance to make decent provision for his

Declaring that a majority of those best qualified have ne-glected government, Francis V. Keesling, President and General Counsel of the West Coast Life Insurance Co. of San Francisco, urged on Dec. 11 that government be the primary concern of every citizen. He expressed the opinion that there is no substitute for the party system as a means of selecting competent government officials and called for modification of the direct primary system as an aid toward that end. Speaking on "Moral Hazard in Relation to Democracy," he said: "I have found during 40 years of experience that a majority of our best qualified citizens have negovernment-some because they minimize - others because they think they are too busy or participation would hurt business—and all because they are selfish. "Consequently, government is the business of politicians.

The part which life insurance plays in the national economy was described on Dec. 11 by A. J. McAndless, President of The Lincoln National Life Insurance Co., of Fort Wayne, Ind. He presented the Greetings of the American Life Convention, of which he also is President, at the convention of the Association of Life Insurance Presidents, saying:

At this time we should not overlook the part which the business of life insurance plays in the national economy. We stand in a peculiar position as

source. This is most desirable in the present emergency. We canalize off a large volume of capital funds, initially intended for protection, into uses which serve other purposes. A large part of these funds will flow into Government obligations. When this is done we cut down public demand for consumption goods and services and thus release materials and labor for the defense effort. In this fashion we play a large part in keeping the price level stable. An observing governmnt should take these facts into consideration, and we should press the peculiar part we play in connection with any pro-posals which are made to burden us with additional taxes. It is not only in times of war and emergency that our relashould be pressed, but also in times of peace, for we stand in an important relation in regard to national welfare at all times. Farseeing management in this business should be alert as to how we may best promote, through our investment operations, the productive effort of the nation. We are, after all, the largest single channel for savings accumulation in the country.

Canada sympathized with Great Britain, but went into the war to protect her own freedom, A. N. Mitchell, President of the Canada Life Assurance Co., Toronto, told the convention on Dec. 12. Now, he stated, Canada, is devoting about 43% of its national income to its war expenditures and to supplying Great Britain with materials for which she no longer can pay Canadian dollars. knew that if Hitler subjugated Britain, our lives and liberties were at stake," Mr. Mitchell said. We were faced with a clear-cut decision. The choice was immediate and completely unanimous, nor has there been at any time since the slightest evidence of regret about the choice made."

Various other speakers adtion to the national economy dressed the convention.

General Crop Report, December, 1941, Of The U. S. Department Of Agriculture

(Continued from Page 1681)
issued during the growing season from July to November, are based in part on the findings of the post-harvest surveys of acreages, yields and production on a large number of individual farms. With the exception of fruits and vegetables, the estimates for both 1940 and 1941 have also been adjusted for the results of the 1940 Census enumeration of crops harvested in 1939. Estimates for 1939 and earlier years have not yet been revised to allow for changes indicated by the Census; present indications are that the changes in the estimates of production will be less than 1% for most major crops but may be important in some States and for some of the minor crops, particularly for some crops which, during the depression years, were extensively grown for home consumption on part-time or subsistence farms. Between the Census of 1935 and 1940, the number of farms enumerated decreased 10.5%, the number of farmers reporting that they had grown potatoes decreased 15% and the number reporting sweetpotatoes decreased 34%

Th 1941 harvest included only small crops of cotton and tobacco and slightly below average crops of potatoes and sweet-potatoes but large production of nearly all other groups of crops. Only 5 cotton crops in 30 years have been smaller but tobacco was only moderately below average. Total grain production was larger than in other seasons since 1920. New high production records were established for hay and forage as a group, for fruits and for vegetables other than potatoes and sweetpotatoes. The list of individual crops which exceeded previous production totals includes barley, grain sorghums, sweet sorghum for forage, beans, soybeans, oranges, the principal vegetables grown for canning, carrots, celery and a few other vegetables for fresh market. The corn crop was the largest since 1932. The wheat crop was the largest since the big crop of 1919 which was mostly planted before the Armistice in 1918. Rice production was probably within 1 or 2% of the record crop. The flaxseed crop was the largest since 1902 and the second largest on record. The peanut crop was smaller than that of last year but larger than the crops of other years. Considering the whole range of crops and the supplies on hand, the outturn of crops this season appears not only of near-record volume but rather closely apportioned to meet current needs.

When the production of corn, oats, barley and grain sorghums are combined, the indicated production of feed grains was about 106.6 million tons. This is nearly 7% more than production last year and the largest production of feed grains since 1932, yet present indications are that more than this will be utilized and that the reserve of corn and oats carried over on farms next summer will be reduced from the near-record total of 24 million tons on hand last July. Recent reports indicate about a 10% increase in chickens on farms and the number of units of grain-consuming livestock and poultry fed this winter is expected to be about 6% above the number in the corresponding period a year ago. Farmers have also been feeding milk cows and probably some other kinds of livestock much more liberally than in any recent year. As conditions appear to favor further increases in livestock and poultry and a continuation of liberal feeding, the total increase in feeding as compared with last season will probably be greater than the increase in feed production.

The aggregate hay and forage crop of 1941 was either the largest or one of the largest ever produced. There was also a large tonnage of hay carried over from the big crop of 1940 and the heavy growth of feed on western ranges and southwestern wheat pastures and the mild weather of November combined to permit a late use of pastures which has tended to reduce hay requirements to date. The quantity of hay and forage used for feeding during the remainder of the feeding period will probably be very large if weather conditions are about average. The number of units of hay-consuming livestock to be fed, although slightly less than in the winter of 1933-34 appears to be larger than in any other winter since that of 1922-23. Price conditions also favor the liberal feeding of hay for the average price of hay is close to the lowest on record in comparison with the prices of cattle, milk and sheep and wool and it is also low compared with the price of grain.

Mississippi River was so damaged in the fields or in the stacks by the heavy rains that its feeding quality is lower than usual.

Supplies of hay are very unevenly distributed this season. Supplies are low and prices high in portions of the Atlantic Coast States and in parts of California. On the other hand, supplies are large and the price low in most of the western half of the country. The production of all tame and wild hay combined totaled 94 million tons, almost as much as in 1940 and above production in other years since 1927. In addition to hay there was a record crop of 15 million tons of sweet sorgo forage or "cane" used as hay in much of the Southwest. This was 2 million tons more than production in 1940 and about 10 million more than production in any year prior to 1938. The quantity of grain sorghum cut for forage was also large.

The 1941 fruit crop seems likely to be the largest yet produced. Allowing for oranges and other citrus fruits that are now on the trees but will not be picked for some time, but excluding non-commercial apples, the total tonnage of fruit seems likely to be 5% above production last season but only 2 to 3% above the big crops of 1937 and 1939. Larger than average crops of peaches, pears, grapes, cherries, plums, figs, and olives have been harvested and there was about an average crop of commercial apples but there was less than the usual production of prunes and apricots. Citrus fruit production is now expected to be only about 3% below the record tonnage of the 1940-41 crop, but production is still largely dependent on possible losses from freezing or other unfavorable conditions. Combined production of tree nuts is well above average, with large crops of English walnuts, filberts, and pecans more than offsetting an unusually small California almond crop.

Commercial vegetable production, estimated at 111/2 million tons was about 7% larger than in any previous year. This favorable showing was due chiefly to the excellent yields of crops grown for canning and processing. The total acreage of these was only just slightly above the former peak (1937) but the production, close to 5 million tons, was a million tons greater than in any previous year; peas, sweet corn, and tomatoes, which together are 5/6 of this year's total tonnage for canning or processing, all set new records for production as a result of record or near-record acreages and yield per acre. In 1941 the tonnage of vegetables for marketing fresh was from 2 to 3% less than in the three preceding years, all rather favorable seasons, but exceeded production in years prior to 1938.

The aggregate production of the six principal grass and clover seeds sown for hay production was substantially less in 1941 than in any of the three preceding seasons but still exceeded production in any year prior to 1938. After 3 years of very large supplies a return to the closer utilization formerly practiced may be necessary and there may be some shifting between kinds. The lespedeza seed crop is the second largest that has been harvested and constitutes more than a fourth of the total grass and clover seed produced. Red clover seed, next in tonnage, is much above the usual production prior to 1938. The seed production of alfalfa, alsike clover, and sweet clover are each close to what was usually produced prior to 1938. Timothy, less in demand than formerly, shows reduced production. Seed supplies for other hay and pasture plants (most of which, except sudan, are sown on smaller acreages) appear quite generally ample. The sudan and orchard grass seed crops are each the largest in 10 years. Crimson clover, formerly largely imported, and white clover both show large increases over last year and the highest seed production on record. Kentucky bluegrass and redtop seed production was about average. The production of sorgo or "cane" seed was much larger than in 1940 and appears

Corn

Estimates based on season end surveys place the 1941 production of corn for all purposes at 2,672,541,000 bushels, the highest in 9 years. The 1940 crop was 2,460,624,000 bushels, the 10-year (1930-39) average 2,307,452,000 bushels. The estimates of corn production for all purposes include the grain equivalent for silage, forage, pastured and hogged off corn, as well as that husked and picked for grain. The production of corn for grain, estimated at 2,429,054,000 bushels, represents a high percentage, 91% of total production. The 1940 grain production of 2,209,583,000 bushels represented 90% of the total; the average is 87%.

The total acreage of corn harvested for all purposes in 1941 was 86,089,000 acres, the smallest since 1894, when only 80,069,000 acres were harvested. The harvested acreage in 1940 was 86,738,-000 acres, the 10-year average, 98,049,000 acres.

The total acreage of corn planted in 1941 was 87,164,000 acres compared with 88,563,000 acres planted in 1940. Abandonment of the planted acreage this year was only 1.2%, the lightest in a decade.

The 1941 yield per harvested acre of 31.0 bushels compares with the 1940 yield per acre of 28.4 bushels, the 10-year average of 23.5 bushels, and has been exceeded in the 75 years of record only the 1906 yield per acre of 31.7 bushels.

The 1941 season in the Corn Belt was marked by more than the usual variation. A good stand, early plantings except in Minnesota, Nebraska, and Kansas, warm dry weather in late June following an earlier period of wet weather, and clean fields made possible by an increased use of mechanized equipment, resulted in excellent prospects on July 1 over much of the Belt. The crop made further improvement through mid-July and pollination was largely com-pleted ahead of the drought and heat wave which developed in late July and continued through the first two weeks of August, when it was broken by rains and moderating temperatures. An exception was South Dakota where the drought and heat wave were more prolonged and more intense and resulted in irreparable damage. Coincident with drought and heat injury, severe damage from grasshoppers occurred in that State.

By September 1, it was apparent that the large acreage of hybrid corn, 62% of the Corn Belt's total, had withstood the drought and heat remarkably well. Ample moisture and warm weather during September favored full development of the late crop, of which there was a larger acerage than usual in Minnesota, Nebraska, and Kansas, and enabled it to mature with practically no frost damage. Heavy rains throughout October and most of November, especially in the central and western part of the Belt, kept the moisture content of corn high and made fields so soft that husking operations were seriously hampered. In Illinois, 35% of the crop was still in the field on Dec. 1. In Minnesota where a medium for savings, since we tap individual savings at their large tonnage of hay and sorghum forage produced west of the Over most of the Corn Belt, weather damage to forage both in the

relatively heavier than damage to the grain.

In the Northeast, both yields per acre and quality of the 1941 crop were considerably above average. In the area south of the Potomac and Ohio Rivers and east of the Mississippi, the entire season from planting to harvest time had less than the usual amount of rainfall but yields and quality, nevertheless, were above average. Aside from frost damage to one-third of the corn acreage in Wyoming, and to lesser injury in a few other mountain States, the 1941 season was the best in many years, in some States the best in history.

Corn silage amounting to 34,026,000 tons was produced on 4,-083,000 acres in 1941. In 1940 a production of 34,173,000 tons was harvested from 4,671,000 acres. The 10-year average acreage is 5,202,000 acres, the production, 32,919,000 tons. The 1941 forage acreage of 3,975,000 acres compares with 5,271,000 acres in 1940.

Wheat

The 1941 production of all wheat was 945,937,000 bushels, the largest crop since 1919. The crop was favored by ample moisture for seeding the full intended acreage last fall in the principal winter wheat States by small winter loss in most of the important wheat in favor of a union shop will reareas, and by the rare occurrence in the same year of nearly optimum weather conditions everywhere for growing and maturing of both winter and spring wheat. The crop would have been even larger but for excessive rains that interfered with harvesting and caused losses of matured grain in the winter wheat States of the southern Great Plains, the northern hard red spring wheat States, and the Pacific northwest. The much higher than average yields contributed more to the heavy production than did the moderate increase

in harvested acreage. The production of winter wheat is estimated at 671,293,000 bushels, not a record crop, but higher than last year's 588,802,000 bushels, and considerably above average. Winter wheat was seeded last fall on 45,663,000 acres, compared with 43,216,000 acres in the preceding fall. With smaller than usual nation wide winter loss the harvested acreage now stands at 39,547,000 acres, about 10% above 1940, but only slightly above average. There was heavy winter loss of this year's wheat acreage in the Missouri River States hit by the November freeze, but in other important producing States winter damage was light. The effects of timely and well distributed rains everywhere are evident in the harvested yield of 17.0 bushels per acre, which is a half bushel higher than the 1940 yield, and well above average. But much matured grain was lost by excessive rains that delayed harvest in Texas and Oklahoma, and there was some curtailment from early expectations in yield and quality in southwestern Kansas and southeastern Colorado. Although the heavy plant growth and moisture conditions caused considerable apprehension that rust would develop, there was no widespread infestation, and damage from that cause was relatively unimportant.

The production of all spring wheat is estimated at 274,644,000 bushels, which has not been equaled in any year since 1928. This large crop is the result of the exceedingly high yields, attaining new high records in some States, produced by ample spring and summer moisture over all the spring wheat belt. Even with the very low abandonment the harvested acreage at 16,284,000 was below the preceding year and below average. The 16,741,000 acres seeded to spring wheat in 1941 was less than the 18,248,000 acres seeded in 1940, partly because ample fall moisture permitted full realization of winter wheat seeding intentions in the Northwestern States.

The production of durum wheat is estimated at 41,800,000

bushels, which is far above average and a fourth larger than last year's 33,479,000 bushel crop. The high yields this year account for the large crop because the 2,546,000 harvested acreage is lower than either last year or average. The harvested yield of 16.4 bushels per acre, which is better than 5 bushels above the 1940 yield and 7 bushels higher than average, was heavily influenced by North Dakota's record high yield of 17.0 bushels per acre. In this case also, heavy, prolonged rains at harvest curtailed the yield from early expectations and materially lowered the quality of the wheat long exposed to the adverse weather.

Th production of 232,844,00 bushels of spring wheat other than durum is nearly a fourth larger than the 1940 crop and well above the country's 150 million bushel average. This larger crop was harvested from 13,738,000 acres, which is down from the 14,162,000 acres harvested in 1940, and a little under average. Both yields went to the new high level of 16.9 bushels per acre, 3.5 bushels above the 1940 yield and about 6 bushels above average. In the entire spring wheat belt the rainfall throughout the growing season was right to promote maximum growth. But continuation of the rains through harvesting time, lowered yields below what other-wise would have been realized, and damaged quality of the grain, particularly in North Dakota.

The estimates of wheat production by classes of wheat show increases over last year for each of the classes. The increase is relatively greatest for hard red spring, next for hard red winter. Durum wheat production exceeds last year by about the same rate as the hard red wheats. Both the hard red and durum wheat production is approximately one-fourth larger than last year. White wheat is 6% above last year. The smallest increase is in soft red winter, which is only about 3% above last year.

Oats

The production of oats in 1941 of 1,176,107,000 bushels is about 6% less than the 1940 production of 1,246,050,000 bushels but 17% larger than the 10-year (1930-39) average of 1,007,141,000 bushels. The decline in production, compared with last year is due to sharply lower yields per acre in the Corn Belt States. The acreage harvested this year is larger than in 1940 in nearly all of the important

producing States. The acreage harvested for grain in 1941 is placed at 37,972,000 acres, the largest since 1935 and about 7% over last year's acreage. The 1930-39 average harvested acreage is 36,487,000. Compared with 1940 all major groups of States, except the South Central which decreased slightly, show a larger area harvested. In the Corn Belt States the increase is between 9 and 10%, the largest for any area but the North Atlantic States increased around 3% and

the South Atlantic States, 8%. The area seeded for harvest in 1941 also was larger than in the previous year, being estimated at 39,363,000 acres against 37,- in 1940. The acreage not harvested for grain is 3.5% of last year. diverted or abandoned also was relatively light. This season kentucky, North Dakota, Idaho, Wyoming, Colorado, Utah, Washheavier acreage losses took place in the South Central group of

shock and on the standing stalk was much heavier than usual and Arbitration Board Orders Union Shop In "Captive" Coal Mines: Fairless Dissents

The three-man board appointed by President Roosevelt to arbitrate the "captive" coal mine dispute handed down its decision on Dec. 7 ruling in favor of the demands of the United Mine Workers of America (CIO) for a union shop in the mines owned by the major steel companies. The decision, which the companies had agreed in advance to accept, was by a two to one majority, with Dr. John R.

Steelman, who took a leave of absence as Director of the United, requesting the union shop in the States Conciliation Service to head the arbitration panel, voting with John L. Lewis, President of the union. Benjamin F. Fairless, President of the United States Steel Corporation, who was the other member of the board, filed a dissenting opinion. The ruling quire about 2,500 non-union miners to join the U. M. W. organization. Of the 53,000 miners working in the "captive" coal mines, about 95% had been union members before the controversy arose.

The steel companies operating 'captive" coal mines affected by the ruling are: United States Steel Corp., Wheeling Steel Corp., Republic Steel Corp., Bethlehem Steel Corp., Crucible Steel Corp., Youngstown Sheet and Tube Co., National Steel Corp. and the Woodward Coal and Iron Co. The decision also applied to the Semet-Solvay Co., operators of bituminous coal mines in West Virginia. The Carter Coal Co., also operators of commercial mines in West Virginia, had declined in advance to be bound by

Dr. Steelman, in explaining his opinion, pointed out that the union had already organized 95% of the employees in the "captive" mines and added: "It is evident that in this instance the union is

normal course of its development. Whatever may be the facts in other labor disputes, I find no basis for the charge that the union here is attempting to take advantage of the present national emergency for organizational pur-

"On the contrary," he continued, "confining myself to the narrow facts of this case, I feel that to grant the union shop in these few mines may well serve the national emergency by con-tributing to unity and assuring continuity of maximum coal production.

In his dissenting opinion, Mr. Fairless said, referring to the long-existing open shop principle, that "there is no possible justification for a change in this basic labor relationship at a time of national crisis" and stated that the decision "further imposes an unregulated labor monopoly upon the entire bituminous coal indus-try." In dissenting from the de-In dissenting from the decision of the majority members of the Board of Arbitrators Mr. Fairless also said:

That decision does not confer one single benefit or the work-ers in the "captive" coal mines. Their wages, hours or working conditions are in no way improved. The only beneficiary s the already powerful United Mine Workers of America, whose membership already embraces about 95% of the workers in the bituminous coal in-

That decision violates the fundamental right of the American worker to a job regardless of membership or non-mem-

bership in any organization.
That decision violates the freedom of choice by the American worker of his own representatives in collective bargaining, a freedom which the Congress has taken great pains

to protect.
That decision runs counter to the statement publicy made by President Roosevelt on November 17, 1941, when he said:

"I tell you frankly that the Government of the United States will not order, nor will Congress pass legislation order-ing, a so-called closed shop. It is true that by agreement between employers and employees in many plants of various industries the closed shop is now in operation. This is a result of the legal collective bargaining, and not of Government compulsion on employers or employees. It is also true that 95% or more of the employees in these particular mines belong to the United Mine Workers Union. The Government will never compel this 5% to join the union by Government decree. That would be too much like the Hitler methods toward labor."

In my judgment, that decision will give great and renewed impetus to the closed shop controversy throughout American industry and will cause unnecessary labor unrest and agitation, with the consequent curtailment of production of various materials vitally needed for national defense.

In view of the constitution of this Board of Arbitration and the appointment of its members by the President of the United States, that decision is bound to be considered as the imposition of a closed shop by Government action.

In my opinion, the Congress in these days of national emergency should alone undertake to change a long-established open shop into a closed shop, or a closed shop into an open shop. In a statement regarding the ecision Mr. Fairless also said:

I do not agree with the decision of the majority of this Board of Arbitration and I have filed a dissenting opinion. That opinion speaks for itself. How-ever, I want it understood that notwithstanding my dissent taken in my capacity as a member of this Board of Arbitration, the "captive" coal mining subsidiaries of United States Steel Corporation, in accordance with their acceptance of arbitration in this matter, will make the decision here recommended by the majority of the Board effective in agreements with the United Mine Workers of Amer-

The union shop was the only point involved in the dispute which the Board had been deliberating since Nov. 26. Appointent and the events le these columns Nov. 27, page 1248. The agreement giving the UMW a union shop in the "captive" mines was signed at Washington on Dec. 15 by John L. Lewis, President of the United Mine Workers (CIO) and Harry Moses, head of three large "captive" coal company subsidiaries of the U.S. Steeel Corp. The agreement will expire March 31, 1943. Associated Press advices Dec. 15 said:

Today's signing did not include the Tennessee Coal & Iron Co., a U. S. Steel subsidiary which, officials said, would sign separately.

Mr. Moses is President of the H. C. Frick Coke Co., the National Mining Co. and the U.S. Coal and Coke Co.

States, but in other areas losses were lighter than a year earlier. The 1941 yield by States generally was lower than last year but 1940 was an unusually favorable season for this crop. For the Nation, the yield per acre was 31.0 bushels compared with 35.2 in 1940 and the average of 27.3 bushels. In the important oats States, yields ran 5 to 15 bushels lower than last year, but in the West and South Atlantic States, higher yields were obtained.

As a whole, the crop matured early, before widespread and serious damage resulted from hot, dry weather. However, rust and hot weather caught oats in the critical filling stage in some of the West North Central States, resulting in considerable varia-tion in quality and test weights. Adverse wet weather conditions also interfered with threshing in some areas in North Dakota and Minnesota, with some injury to quality. In the Western States weather conditions were favorable and yields exceeded those of last year in all States except California. In the Eastern Corn Belt conditions were generally favorable but yields were not as high as in the exceptionally favorable season of 1940.

Barley

Production of barley set a new record in 1941. The crop is estimated at 358,709,000 bushels which exceeds the previous record of 328,351,000 bushels produced in 1928 by 30,358,000 bushels. As a result of increased acreage harvested and better than average yields, production exceeds the 1940 output by almost 16% and is 59% larger than the 1930-39 average. Comparing production with 1940 in the important North Central States, huge crops in Nebraska, North Dakota, South Dakota, and Kansas more than offset smaller crops in Minnesota, Wisconsin, Iowa, Michigan, Illinois, Missouri, and California.

The acreage of barley harvested in 1941 was 14,049,000 acres which is 4% above the previous record of 13,526,000 acres harvested in 1929. The seeding of 15,080,000 acres was slightly larger than the peak acreage sown in 1940. In Minnesota, Iowa, and California the acreage seeded was much less than in 1940. There were but appreciable increases in other States, particularly in the Great Plains Area.

The yield in 1941 was 25.5 bushels per acre, the highest since ment of the Board by the Presi-1928. This compares with 23.0 bushels in 1940 and 1930-39) average of 20.6 bushels. Yields were equal or above the controversy were detailed in those of 1940 in all leading States except Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, and California. In the Great Plains States, 1941 yields were from 3 to 14 bushels above average. The 1941 barley crop east of the Rocky Mountains is lower in quality than the high quality crop of 1940 but is above average. The western barley crop is of fair quality but also below that of last year.

The 1941 rye crop of 45,191,000 bushels is 10% larger than the 1940 crop of 41,149,000 bushels and 17% larger than the 10-year (1930-39) average production of 38,472,000 bushels. This year's crop is not a large one, however, as rye production has equaled or exceeded 50 million bushels in 11 of the last 25 years. A record high production of 100,896,000 bushels was obtained in 1922.

The area harvested in 1941-3,498,000 acres-is 9% larger than in 1940. The yield of 12.9 bushels per acre is slightly higher than

Life Insurance Company Assets Estimated At \$32,550,000,000; 10% Of National Wealth

Total admitted assets of all United States legal reserve life insurance companies at the end of 1941 were estimated at \$32.550.000. 000 by Elbert S. Brigham, President of the National Life Insurance Co., of Vermont, in presenting the results of a nation-wide survey of life insurance investments at the 35th Annual Convention of The Association of Life Insurance Presidents in New York on Dec. 12.

Mr. Brigham also reported that net investment earnings of life insurance companies dropped from a rate of 5.03% in 1930 to 3.44% in 1940. He based this statement on records of 49 United States legal reserve companies having 92% of the total admitted assets of all such companies.

In discussing the asset total, the

speaker said:

Lately there has been some apprehension lest these \$32,500,-000,000 of assets represent a concentration of economic power detrimental to the welfare of our country. This sum, great though it is, represents but 10% of our total national wealth. Are first claims upon 10% of our national wealth a proportion too great to secure the contracts of 66,000,000 American policyholders? Where is the concentration of economic power when these assets are of such a nature that their managers have practically no au-thority in the direction of the affairs of their borrowers?

The decline in interest earnings has meant that during the 10 years, 1931 to 1940, inclusive, the net investment income of all United States legal reserve life insurance companies was \$2,400,-000,000 less than it would have been at the 1930 level, according to Mr. Brigham, while for 1940 alone, net investment income was \$425,000,000 less than it would have been at the 1930 rate. The income reduction for 1940 is a sum nearly equal to the dividends actually paid and credited to policyholders and is a sum greater by \$105,000,000 than was paid for initial premiums for new insurance, he stated.

The speaker attributed the decline in the rate of earnings on life company assets to the influx of capital seeking refuge in the United States because of disturbed conditions abroad, to the degree of control over money rates exercised by the Government, and to competition for the reduced supply of high-grade se-curities. Although expressing apprehension as to the rates to be earned by life insurance investments in the future, Mr. Brigham

We may reasonably expect ultimate withdrawal of foreignowned refugee capital, with consequent stiffening of interest rates, once peace has come, but how effective pressure by the Government to keep interest rates low will be, we cannot with any certainty forecast.

The outlook is not promising as to the volume of high-grade investments, he added, continu-

Such investments are, in a sense, the by-product of venture capital. After the successful ventures have been established, securities of life insurance grade have been issued. A system of taxation which takes away the lion's share of the profits, if the venture is successful, and leaves the venturer to absorb the losses, if unsuccessful, cannot fail hamper that progress which has made our country great and to restrict risk-taking which, in turn, when successful, ultimately has produced satisfactory outlets for the investment of life insurance funds.

Mr. Brigham reported that the total admitted assets of the life insurance companies are apportioned roughly as follows:

roads, public utilities and certain industrial enterprises. The relatively small amount of stocks included is composed, for the most part, of guaranteed and preferred stock issues.

More than one-quarter is in government bonds, principally domestic obligations of Federal,

State and local governments.

Nearly one-fifth is in first mortgage real estate loans within a conservative percentage of the property value. Such loans are principally on

non-farm real estate.

Less than one-tenth represents loans to policyholders, within the surrender value of their policies.

About one-sixteenth represents home and branch office property and real estate acquired in satisfaction of debt.

The remainder, about onesixteenth, represents miscel-laneous assets, including cash. Government, State and munici-

most other States.

pal bond investments of the 49 companies will approximate \$8,-199,000,000 or 27.5% of total admitted assets at the end of this year, according to the survey. About two-thirds of this amount, or \$5,815,000,000, represents obligations of the United States Government; about \$1,735,000,000 bonds of domestic State, county and municipal governments; and about \$642,000,000, bonds of Canada and its political subdivisions. In discussing policy loans, Mr. Brigham said:

At the end of 1931, policy loans represented 16.3% of total admitted assets. This ratio was then on an uptrend which continued through 1932, reaching a peak of 17.9%, more than double the present percentage of 8.7 at the end of this year. This decline has resulted from repayments, from the passing of the period of financial distress among policyholders and from the practice of banks in making loans, especially of the larger amounts, secured by life insur-ance policies. It should be em-phasized that whenever interest rates stiffen, many of these loans probably will be called by the banks, and the companies stand ready at all times to meet the loan requirements of policyholders under the provisions of

ment has been sharply curtailed because of the war. It is also true, however, that this season's flue-cured tobacco yield of 889 pounds per acre is about 13% less than the 1940 yield. The rather low yield per acre appears to have resulted primarily from heavy rains in July over much of the flue-cured belt which caused quick, rank growth of tobacco, followed by hot, dry weather which caused the tobacco to rive to result when the result of the season's flue-cured because of the season's flue-cured belt which caused the tobacco to rive the season's flue-cured to the season's flue-cured tobacco yield of 889 pounds per acre is about 13% less than the 1940 yield. The rather low yield per acre appears to have resulted primarily from heavy rains in July over much of the flue-cured belt which caused quick, rank growth of tobacco, followed by hot, dry weather which caused

the tobacco to ripen prematurely.

A decline of about 29% in the acreage of dark-fired tobacco this year was partially offset by an increase of about 2% in yield per acre with the result that a dark-fired tobacco crop of about 75,783,000 pounds was produced this season compared with 103,793,-000 pounds in 1940. Loss of foreign markets and change in domesconsumption requirements in recent years have contributed to a definite downward trend in production of dark-fired tobacco, but this year's crop is even smaller than the 1938 crop which was un-

this year's crop is even smaller than the 1938 crop which was unusually small because of serious wildfire damage.

It is estimated that 357,400 acres of Burley tobacco with a yield of 983 pounds per acre produced 351,232,000 pounds of Burley tobacco this season. In the 1940 season 360,800 acres produced 375,-975,000 pounds of Burley tobacco at a yield of 1,042 pounds per acre. The 1941 crop made its growth under varied and unusual conditions. Much of the acreage was not planted until late in the spring and this tobacco grew under rather dry conditions. The portion of the crop that was planted early was subjected to heavy and prolonged rains and made quick growth but when the hot, dry weather came later, the tobacco fired badly and most of it was harvested early in August. The tobacco from the early cuttings apparently cured out fairly light, but the late harvested tobacco made good weight and the yield per acre for the entire crop is only about 6% less than the 1940 all time high yield of 1,042 pounds per acre.

A tobacco crop of 29,822,000 pounds in southern Maryland is indicated for 1941. This is a decrease of nearly 9% from the 1940 production and is accounted for by a yield 13% lower than last season. The 1941 acreage of tobacco in Maryland is 5% above that harvested last year. The prospects for Maryland tobacco appeared quite bright early in the season, but declined as the season progressed. Moisture was plentiful during the early stages of growth but considerable fertilizer was leached from the soil so that later plants lacked adequate food for proper development.

The 1941 acreage of dark air-cured tobacco was 25% less than in 1940, but this was offset somewhat by an all time high dark aircured tobacco yield this year of 954 pounds per acre. The net result, however, is an indicated current dark air-cured tobacco crop of 34,150,000 compared with 42,518,000 pounds last year and the 10-year average of 41,715,000 pounds. The record breaking yield per acre is the result of a combination of factors including unusually good growing conditions and the fact that farmers growing dark aircured tobacco this year were probably above the average in ability

and have farms above average in productivity.

A 1941 cigar tobacco production of 138,280,000 pounds or about 4% less than in 1940 is estimated on the basis of post-harvest indications. Weather conditions were above average in most cigar tobacco producing sections during the season, and fall weather was favorable for harvesting and curing the crop. As a result the yield per acre this year of 1,365 pounds in well above the 10-year average of 1,232 pounds although slightly less than the 1940 yield of 1,381

pounds per acre.

The 1941 rye crop is lower in quality than the 1940 crop particularly in the northern States of the North Central area, but compares favorably with the average quality of the crops from 1934 Buckwheat

(Continued from Page 1683)

ington, and Oregon, while they were near the 10-year average in

Of The U. S. Department Of Agriculture

General Crop Report, December, 1941,

The 1941 buckwheat crop of 6,070,000 bushels is about 6% smaller than the 1940 harvest of 6,493,000 bushels, and about 17% smaller than the 10-year (1930-39) average. The 1941 acreage was reduced 13% from the 1940 harvest with over half of the de-

crease taking place in New York.

The yield per acre of 17.9 bushels exceed the 1940 yield of 16.7 bushels and is about 2 bushels larger than the 10-year average. Yields averaged about 2 bushels above 1940 in the North Atlantic States but about one and a half bushels below 1940 in the North

Central States.
In New York and Pennsylvania the crop matured and was harvested under very favorable conditions. In 1941 these two States produced 70% of the United States total. In the Central States rains interfered with harvesting and caused some reduction in yield and quality.

Cotton

Production of cotton in 1941 was 10,976,000 bales compared with 12,566,000 bales ginned in 1940 and 13,246,000 bales the 10year (1930-39) average. The indicated lint yield per acre for the United States of 235.4 pounds compares with 252.5 pounds in 1940 and 205.4 pounds, the 10-year (1930-39) average.

Harvested acreage is estimated at 22,376,000 acres, which is 6.2% less than the 23,861,000 acres harvested in 1940. Allowing for the estimated abandonment of 3.8%, the cotton acreage in cultivation on July 1 is indicated to have been 23,250,000 acres. estimate of abandonment makes allowance for acreage removed by farmers after July 1 for compliance with terms of the Agricultural Conservation Program.

During much of the 1941 season, growing conditions were favorable in the Mississippi River delta, and in Virginia, North Carolina, Oklahoma, and west Texas. Yields in these areas were considerably above average, with new record high yields established for Missouri and Tennessee. In the area from South Carolina and Georgia to east and central Texas frequent showers during the growing season resulted in serious losses from boll weevils. These losses were most severe in South Carolina, Georgia, Florida, Louisiana, and east Texas, where yields per acre were much below average.

An unusually large proportion of the crop in Texas and Oklahoma, and the Far Western States was still unharvested on Dec. 1. In other States harvesting on that date was almost completed.

Tobacco

The after-harvest estimate of tobacco production, all types combined, places this year's crop at 1,279,872,000 pounds or only about 3% less than was forecast on July 1 this year. In the 1940 season 1,455,802,000 pounds of tobacco was produced in this country and the 10-year (1930-39) average production is 1,394,839,000 pounds. The decrease from 1940 is accounted for by a reduction of about 4% in acreage and of about 8% in yield per acre. All classes of tobacco except Maryland tobacco and cigar wrappers showed decreases from last year's acreage with dark-fired and dark-aircured tobacco acreages showing the sharpest percentage decreases. However, higher yields were secured by the latter classes of tobacco whereas all other classes except cigar filler show lower yields in 1941 than in 1940.

Potatoes

Potato production in the United States in 1941, estimated at 357,783,000 bushels, was below average and compares unfavorably with the 378,103,000 bushels produced in 1940. Production in 1939 was 341,484,000 bushels. The estimates for these three years have been revised to a level based on the 1940 Federal Census and other

available checks on potato production.

(Most of the revision was in the 30 late potato States where the census revealed a further sharp decrease in the number of farms growing potatoes. This decrease had not been sufficiently reflected in the unrevised estimates.) The estimates for the years between 1934 and 1939 have not been revised, hence the above estimates are on a level moderately lower than those previously published for this period. The revised estimate of 1939 potato production is 6% below the estimate previously published. When the 10-year (1930-39) average production, now estimated at 370,045,000 bushels, is revised to a level comparable with the revised estimates for 1939 and years following, it will probably be about 2% lower. The estimates which are given subsequently for groups of States have also been revised on the same basis as described above for both acreage and production.

Most of the decrease in production between 1940 and 1941 was in the 18 surplus late States which produce about two-thirds of the United States potato crop. In this group production in 1941 is estimated at 242,217,000 bushels compared with 258,593,000 bushels in 1940 and 258,389,000 bushels, the 10-year (1930-39) average. The 1941 crop was significantly smaller compared with 1940 in the States of Minnesota, North Dakota, Nebraska, Idaho and Colorado where reduced plantings, disease and other adverse seasonal influences, together with early September frost, curtail production. The crop was moderately larger in Michigan and Wisconsin, with other States showing little change. In the 3 Eastern late States (included with 18 late) smaller crops in New York and Pennsylvania were offset by a Maine crop 3 million bushels larger and the total for the group was 92,961,000 bushels in 1941 compared with 91,219,000 bushels in 1940 and 98,226,000 bushels, the 10-year average.

Production in the 7 intermediate States is placed at 29,935,000 bushels compared with 33,572,000 bushels in 1940 and 33,089,000 bushels, the 10-year (1930-39) average. In the Eastern Shore District of Virginia, Delaware, and Maryland which last year accounted for about 40% of the potatoes produced in this group, the crop was about 4 million bushels smaller and below average due to dry weather which resulted in low acre yields. Yields were also low in other eastern States in this group but were above average in Missouri and Kansas.

Production in the 12 early States was maintained at a high level again this year with a crop of 47,317,000 bushels against 48,984,000 bushels in 1940 and 38,929,000 bushels, the 10-year average. The average yield per acre in 1941 was lower than in 1940 but the acreage harvested was considerably larger.

The acreage of potatoes harvested in the United States in 1941 is estimated at 2,733,400 acres compared with 2,865,400 acres in 1940, A flue-cured tobacco crop of 650,605,000 pounds is indicated for this total is held in corporate securities, chiefly bonds secured by first liens on the property of railtrend in recent years as a result of increased use of certified seed and

better growing practices.

The 18 surplus late States harvested 1,647,000 acres in 1941 compared with 1,788,200 acres in 1940, 1,762,400 acres in 1939 and 2,129,-800 acres, the 10-year average. The 30 late States harvested 1,973,-000 acres in 1941 and 2,127,400 acres in 1940. This decrease continued the down trend that has been under way in recent years. Yield per acre in the 18 surplus late States was 147.1 bushels in 1941 compared with 144.6 bushels in 1940 and 121.8 bushels, the 10-year average. year average.

Acreage harvested in the 7 intermediate States totaled 263,900 acres in 1941 compared with 263,300 acres in 1940 and 318,300 acres, the unrevised 10-year average. Yield per acre in 1941, at 113.4 bushels, was low compared with the 127.5 bushels secured in 1940. In the 12 early States, the acreage harvested in 1941 at 496,500 acres was the largest of record and continued the up trend of the last few years. In 1940 the acreage totaled 474,700 acres and the 10-year average 432,300 acres. Yields in this group in 1941 were not outstanding at 95.3 bushels compared with 103.2 bushels in 1940 but were above the 10-year average.

Harvest of the 1941 potato crop progressed with difficulty in a number of the late crop northern and western States where frequent and excessive September and October rains made harvest at the usual date difficult or impossible. States experiencing this difficulty were Michigan, Wisconsin, North Dakota, Nebraska, Colorado, and Idaho. Delayed harvest also resulted in some loss from freezing in the ground and yields on late fields in most of these States were curtailed from earlier expectations by the early September frost, which stopped tuber development. This resulted in a considerable number of small potatoes, but in general quality is fair to good. Harvest weather was favorable in Maine, New York, and Pennsylvania. An unusually large portion of the New York crop was produced on Long Island this year. Yields in Washington and Oregon were above average and harvest progressed about as usual.

Sweetpotatoes

Production of sweetpotatoes in 1941 was 63,284,000 bushels, about 18% more than the 53,811,000 bushels harvested in 1940, but 14% smaller than the 10-year (1930-39) average of 73,208,000 bushels. In 1941 sweetpotatoes were harvested from 759,000 acres compared with 664,000 acres in 1940, — an increase of 14%. By States, the 1941 harvested acreage was larger than for 1940 from Virginia and Kentucky south, and west to Texas and Oklahoma except for Arkansas. In Arkansas, New Jersey, Delaware, Maryland, and California acreage was the same as last season. Greatest acreage changes were recorded in Georgia, Florida, Alabama, Mississippi, and Texas where increases ranged from 25 to 29%.

The 1941 average yield for the United States was 83.4 bushels per acre, compared with 81.0 bushels in 1940, and the 10-year average yield of 83.0 bushels per acre. Yields for the current season were below average in the Atlantic States from New Jersey to Georgia, and in Alabama and Louisiana. In the Atlantic Seaboard States, particularly in the commercial areas of New Jersey, Delaware, and Virginia, lack of adequate moisture limited yields; in Louisiana the crop was curtailed by excessive rains. Yields were larger than usual in all other States except Kentucky and

Tennessee, where they were about average.

Portland Cement Statistics For November, 194

The portland cement industry in November, 1941, produced 14,931,000 barrels, shipped 13,724,000 barrels from the mills, and had in stock at the end of the month 17,624,000 barrels, according to the Bureau of Mines, U. S. Department of the Interior. Production and shipments of portland cement in November, 1941, showed increases of 17.3 and 32.3%, respectively, as compared with November, 1940. Portland cement stocks at mills were 13.4% lower than a year ago.

The statistics given below are compiled from reports for November, received by the Bureau of Mines from all manufacturing

In the following statement of relation of production to capacity the total output of finished cement is compared with the estimated capacity of 157 plants at the close of November, 1941, and of 160 plants at the close of November, 1946.

Subscription And Allotment Figures On Recent Treasury Bond Offering lowing telegram from the Chinese

Secretary of the Treasury Morgenthau announced on Dec. 16 the final subscription and allotment figures with respect to the cash of-fering on Dec. 4 of \$500,000,000 of 2% Treasury Bonds of 1951-55 and of \$1,000,000,000 of 21/2% Treasury Bonds of 1967-72. An aggregate of \$11,707,092,100 of subscriptions were received of which allotments totaled \$1,602,420,650, including \$103,500 of the $2\frac{1}{2}\%$ bonds allotted to Government investment accounts.

For the 2% bonds, total subscriptions received were \$4,727,898,150 and total allotments amounted to \$532,717,850. For the 21/2 % bonds, subscriptions were \$6,979,193,950 and allotments \$1,069,702,800.

Of the subscriptions of \$5,000 and less, where the subscriber spe cified that delivery be made in registered bonds 90 days after the issue date, \$13,800,850 was subscribed and allotted for the 2% bonds and \$26,043,450 for the 21/2% bonds.

The details of this offering were given in our issue of Dec. 11

Subscriptions and allotments were divided among the several Federal Reserve Districts and the Treasury as follows:

	-2% Bonds	of 1951-55— Total		is of 1967-72-
	Subscriptions	Subscriptions	Total Subscriptions	Total Subscriptions

Increase In Active Spindles In November

The Bureau of the Census announced Dec. 19, that according to preliminary figures 24,210,898 cotton spinning spindles were in place in the United States on Nov. 30, 1941, of which 23,069,146 were operated at some time during the month, compared with 23,043,310 for October, 22,963,944 for September, 23,029,066 for August, 23,028,082 for July, 22,994,980 for June, and 22,685,622 for November, 1940.

The aggregate number of active spindle hours reported for the month was 9,901,356,642. Based on an activity of 80 hours per week the cotton spindles in the United States were operated during November, 1941, at 129.4% capacity. This percentage compares on the same basis, with 125.8 for October, 123.7 for September, 125.3 for August 123.0 for July, 121.5 for June, and 105.7 for November, 1940. average number of active spindle hours per spindle in place for the month was 409.

The total number of cotton spinning spindles in place, the number active, the number of active spindle hours, and the average hours per spindle in place by States, are shown in the following statement:

A STATE OF THE PARTY OF THE PAR	Spinni	ng Spindles		Average
State-	In place Nov. 30	Active during November	Total	per spindle in place
United States	24,210,898	23,069,146	9,901,356,642	409

Pledges Are Exchanged By United States With Great Britain, China and Philippines

The State Department made public in Washington on Dec. 12 mesages exchanged between President Roosevelt and King George VI of Great Britain pledging cooperation and expressing confidence in victory against the "common enemy."

On the same day (Dec. 12) the Department also issued the messages exchanged between the President and Generalissimo Chiang Kai-shek of China and Manuel D. Quezon, President of throughout a world purged of

the Philippine Commonwealth. The exchange between King George and President Roosevelt

follows: London, Dec. 10, 1941

The President:

My thoughts and prayers go out to you and to the great peeople of the United States at this solemn moment in your history when you have been treacherously attacked by Japan. We are proud indeed to be fighting at your side against the common enemy. We share your inflexible determination and your confidence that with God's help the powers of dark-ness will be overcome and the four freedoms established tyranny.

GEORGE R. I. Dec. 11, 1941

His Majesty King George VI, London:

Thank you most deeply for Our two nayour message. tions are now full comrades-inarms. The courage which your people have shown in two long years of war inspires us as we join the struggle. The forces which have plunged the world in war, however strong, cannot prevail against the indominitable strength of free people fighting in a just cause. May God guide us through whatever trials are yet to come and speed the day of victory.

FRANKLIN D. ROOSEVELT

or contribute to the december of the center to

The exchange between General-issimo Chiang Kai-shek and President Roosevelt included the fol-Generalissimo:

Chungking, Dec. 9, 1941 In this tragic hour when you too are assailed by the treacherous aggressor the people of China renew their gratitude to the people of the United States for the understanding and help that have been given us.

To our now common battle we offer all we are and all we have to stand with you until the Pacific and the world are freed from the curse of brute force and endless perfidy.

CHIANG KAI-SHEK

The text of the President's message to Generalissimo Chiang Kai-shek said:

Dec. 9, 1941 Japan first treacherously attacked and then declared war upon the United States. Congress has declared the existence of a state of war between the United States and Japan.

In the valiant struggle of existence which China has carried on for four and a half years against the invading forces of a predatory neighbor, China has been made aware of this country's sympathy principle and in practice. China is now being joined in her resistance to aggression by a host of other nations that have been menaced by Japan and the movement of conquest in which Japan is a major participant.

The struggle cannot be easily or quickly brought to a suc-cessful end. It will demand of all who are entering it, as it has demanded and will demand of you and your courageous people, concentrated effort and intensive devotion to the common cause of vanquishing the enemy and thereafter establishing a just peace. I take pride in my country's association with you and the great nation which you lead. I am wholly confident that the struggle in which we are engaged in common with other gallant nations will forge stronger the bonds of traditional friendships and will result inevitably in complete elimination of the lawless forces against which your effort, our effort, and the efforts of our associates are now individually and collectively directed.

FRANKLIN D. ROOSEVELT

The exchange between the President of the Philippine Commonwealth and the President of the United States follows:

I have just arrived from Baguio, the Summer capital of the Philippines, where I was when the war between the United States and Japan was declared. I have covered the country by automobile and I am happy to report that everywhere the people are loyal to America and determined to stand by her in testimony of their gratitude to you, to the Government of the United States and to the American people and because of their devotion to the caues of democracy and freedom. I am proud therefore that the reiterated assurance I have given to you to the effect that you can count upon us was no empty word.

MANUEL L. QUEZON Dec. 9, 1941

Your renewed assurances of the devotion and loyalty of the Philippine people to the United States and to democracy are particularly appreciated in this grave hour. The hearts of all Americans are deeply touched by the fortitude and gallantry being shown by your people in this present ordeal. We are at one with you in our faith in the ultimate triumph of our com-

FRANKLIN D. ROOSEVLT Dec. 11, 1941

they have been so far. It is equally obvious that as the de-

mands increase, so also does the responsibility. The Government

can't do this job alone. It can

chart the program, set the

sights, put up the money and

coordinate the various efforts-

but the actual job of getting

Private Enterprise And Hitler's Defeat Keynote Addresses At NAM Convention

Donald M. Nelson, Executive Director of the Supply Priorities and Allocations Board, told leaders of business and industry on Dec. 3 that they "need to do more rather than less than they have been doing to adjust themselves to this (defense) program," and warned that "production volume must be doubled." Speaking before the 46th Congress of American Industry, held by the National Associa-

Transaction on Wednesday, Dec. 10, by Barnes & Lofland, Phil-

tion of Manufacturers in New York, Mr. Nelson called for a defense production pace geared at the rate of \$40,000,000,000 of munitions and other war materials a year. Mr. Nelson said in part:

The big outstanding fact before us today is that our defense production effort, huge as it is, is not big enough.

We have talked a good deal about an "all-out" effort. In the very nature of the case it has got to be all-out. We are not playing for marbles; we are engaged in a life-or-death contest which is being conducted on a basis of winner take all. We are today making military expenditures at a rate of approximately \$1,750,000,000 a

15

month. Considering the fact that this program got started less than 18 months ago, that is an amazingly fine achievement; yet it unfortunately remains true that production at the rate won't beat Hitler. It won't even keep Hitler from beating everybody else. I believe that at the very least that production volume must be doubled-

Obviously, if we undertake to double current armament production—as I am convinced we must do—and set ourselves to turn out military goods at a rate of better than \$40,000,000,-000 a year, the future demands on American industry are going

mocracy of the American people. Speaking on the subject "Stockholders in Civilization, Inc," Dr. Sproul said the threat to our form

to be ever so much greater than

the goods out must be done by industry itself. At the annual banquet of the Congress, held the evening of Dec. 5, Dr. Robert G. Sproul, President of the University of California, declared that failure to meet the challenge of dictatorships will not only leave a "sick-and dying country," but worse than that a "sick and dying faith in the greatest principle that man has evolved in his long struggle upwards from savagery"—the de-

> of Government is one that "we must accept or reject." He added: The decision cannot be made with an eye solely to the convenience of the generation now in the saddle, or to the safety of the skins of our youth. Perhaps we could live in a world dominated by Hitler a few years, or even long enough for you and me to die peacefully in our beds. But what comes after that? What do we leave to our children? I tell you we shall not only leave a sick and dying country, we shall leave worse than that, a sick and dying faith in the greatest prin-ciple that man has yet evolved in his long struggle upward from savagery.

The other principal speakers at the dinner were Thurman W. Arnold, Assistant Attorney-Gen-eral of the United States, and K. T. Keller, President of the Chrysler Corporation.

Mr. Arnold who asserted that illegitimate labor practices cost America's consumers "a tribute" of more than \$1,000,000,000 a year, said that the nation's labor problem was twofold—to insure against tie-ups in defense production and, secondly, to protect consumers and business men against "extortion" through unfair practices.

In his address, Mr. Kellar said that in a little more than a year, the United States, under a free competitive enterprise system, has "reached a production stage that it took German industry, under a dictatorship, from three to five years to reach." He also stated:

By getting the defense job done at this critical time, industry will demonstrate once again that the free enterprise principle under which it de-veloped its ability and willingness to do the job is the key to the preservation of the American way of life.

I believe, too, that having done this job well, industry can face with confidence what is perhaps its greatest task—that of giving leadership as well as cooperation in the reconstruction to follow.

Sunta At the Dec. 5th afternoon session of the Congress; Dr. Edwin G. Nourse, Director of the Institute of Economics of the Brookings Institution, told the industrialists that the one real change of preserving the private enterprise system in for businessmen to act daringly and in concert in meeting the problems of the post-war period. Discussing the "Nature and Future of Private Enterprise, Dr. Nourse said that industry's leaders must discard the tendency toward defeatism in meeting this challenge. Otherwise, he warned, the private enterprise system may be swept away by the pent-up opposition of those who cherish memories of its past shortcomings or are dazzled by the prospect of some quick and easy road to abundance.

If the American people are successful in overthrowing. Hitler they will have to persuade all the "passive, disgruntled and disillu-

S per Lot

stand what we are attempting to possible to get them." do, Demaree Bess, European correspondent for the Saturday Eve- that 1942 production should be ning Post, told the Congress on at least 3,500,000,000 pounds (82,-Dec. 5. Speaking on "Europe as I Saw It," Mr. Bess said there is every indication that a majority of the American people are agreed we should do whatever is necessary to defeat Hitler, but that creases over the estimated 1941 "Europeans don't trust us because production of 20% for evaporated they think we are too dumb, so far as European affairs are concerned, to understand exactly what we are doing." He added:

Hitlerism is a specific and concrete scheme which now exists not only on paper but in cold reality. In order to overthrow it, Hitlerism's opponents must produce a scheme for Europe which is equally spec'fic and concrete. Only when we have done that can we convince many Europeans that we offer anything better than European chaos as an alternative to Hitlerism. The only precise scheme which the anti-Hitler coalition has produced to the present time is the Soviet system worked out in Russia—a system which is theoretically capable of indefinite expansion.

Drastic controls are necessary if inflation and runaway prices, attributable to a war-economy, are to be prevented, Representative Albert Gore (Democrat, Tenn.), author of the bill for an overail ceiling on prices which was de-feated by the House, told the N. A. M. convention on Dec. 3. Representative Gore said that the Administration price control bill, contemplating placing of ceilings on a selected basis, was "more inflationary than deflationary in character." His criticisms of the bill are that it "invites and encourage prices to rise to the restricted levels written into the that "it encourages, augments an manufactures the inflationary psychology," and that "the selective method encourages speculation." Representative Gore also stated:

One fundamental difference between the over-all and piecemeal method is that the selective or piecemeal method leaves the general price level free to rise, whereas the application of a general over-all celing would call a halt to the rise of general prices. Inflation does not come about because of selected price rises. It is the product of a general price level runaway and if inflation is to be prevented, we must call a halt to the rise of general prices.

Dairy Products Goals By Agriculture Dept.

Estimated totals of cheese. evaporated milk and dry skim needs in 1942, and plans for the expansion of processing facilities to produce them, were announced on Dec. 22 by the Department of Agriculture. In connection with plant expansion, the Department made known that it is prepared to extend assistance, in obtaining priorities and in financing, to cooperatives which want to increase their facilities and which are anproved by the Agricultural Marketing Administrator, Assistance on a similar basis will be given privately-owned plants with respect to priorities and tax amortization. Secretary Wickard said:

"Our 1942 milk production goal of 125,000,000,000 pounds provides for an increase of 8,000,000,000 pounds over 1941 and 14,000,000,-000 pounds over 1940. This production can provide for increased use of milk and its products by our civilian population and armed forces, and also take care of the supplies of dairy products we have promised to send to Great Britain under the Lend-Lease

sioned" Europeans that we under- nounced today should make it

The Department has estimated 000,000 cases) of evaporated milk; 525,000,000 pounds of dry skim milk for human consumption; and 900,000,000 pounds of American cheese. This will represent inmilk, 46% for dry skim milk, and for American cheese. From the Department's announcement we also quote:

Since expanded purchase operations started in mid-March this year, the Department has bought approximately 140,000,000 pounds of cheese, 14,500,000 cases of evaporated milk, and 33,000,000 pounds of dry skim milk. Purchases are continuing at a substantial rate. The British alone have requested about 22,000,000 cases of evaporated milk, 250,000,000 pounds of American cheese, and 200,000,000 pounds of dry skim

Officials of the Department say that it will apparently be impossible to obtain all of the needed increases in production from present plants, many of which have already been stepped up to peak pro-duction. Enlarged plant plant facilities must be provided in areas where additional milk can be made available for the production of the needed products.

Department representatives say that it is possible that the

desired plant expansion can be brought about in many cases without direct financial assistance from the Government. In such cases the Department is prepared to assist, whether the plant is operated by a farmers' cooperative or by private capital, after a showing has been made of ability to expand, with no serious interference with existing flow of raw materials, and ability to inaugurate or expand production promptly. This assistance will include: (1) certifying necessity for the expansion and assisting in obtaining priorities for equipment, (2) expanding tax amortization

The Department is prepared to assist approved farmers' cooperatives (within the general definitions of the Capper-Volstead Act) by providing financing where it is necessary. The cooperatives will obtain from the District Banks for Cooperatives of the Farm Credit Administration or from the Farm Security Administration temporary loans to build a plant or add equipment to an existing plant. The Department will then purchase the plant or equipment financing the operation with Lend-Lease funds and lease it to the cooperative for the production of Lend-Lease dairy products for sale to the Department.

Secretary Wickard has designated the Agricultural Marketing Administrator to administer the program for expansion of processing facilities.

"Invisible" Sugar Stocks

The Department of Agriculture on Dec. 17 issued its summary of data on "invisible" supplies of sugar in the United States for the third quarter of 1941, together with a record of receipts and deliveries. The report on the second quarter was issued Sept. 11 (see issue of Oct. 9, page 525). The data for the third quarter report were obtained by the Sugar Division of the Agricultural Adjustment Administration from schedules received from 1,506 manufacturers, wholesalers and retailers. The following table summarizes the data:

STOCKS OF SUGAR HELD BY 1.506 MANUFACTURERS, WHOLESALERS, RETAILERS, &c., ON SPECIFIED DATES, TOGETHER WITH RECEIPTS AND DELIVERIES OF SUGAR, THIRD QUARTER, 1941†

	(Short	Tons)	1		
	No. of	Stocks	Receipts July 1-	Deliveries or Use	Stocks
Total	Firms Reporting 1,506	June 30, 1941 613,986	Sept. 30, 1941 1,203,765	July 1- Sept. 30, '41 1,207,011	Sept. 30, 1941 1610,740
Comparable data for third- quarter, 1940 Comparable data for third	1,302	389,229	892,549	906,800	374,978
quarter, 1939 Comparable data for third	1,383	290,747	1,139,010	1,077,100	352,657
quarter, 1938	1,321	239,809	750,456	755,803	234,462

*Approximately 28,000 distribution outlets are represented by the 149 retailers reporting for this period. †The third quarter receipts by the 1,506 firms reporting for this period were approximately 56.6% of the total deliveries of sugar by refiners, processors, and importers for the period July 1 to Sept. 30, 1941. Comparable figures for the corresponding period of the three preceding years were: 1938, 1,321 firms, 39.6%; 1939, 1,383 firms, 46.9%; 1940, 1,302 firms, 46.3%. ‡Does not include sugar in transit, amounting to 111,346 tons, on Sept. 30, 1941.

milk needed to meet war-time Agricultural Department Report On Winter Wheat And Rye Acreage Sown For 1942 Grop

The Crop Reporting Board of the United States Department of Agriculture made public on Dec. 19, its report showing the acreage and condition of winter wheat and rye for the crop of 1942 as follows.

Winter Wheat

The acreage of winter wheat seeded this fall was reduced materially below the 1940 seeded acreage. The acreage seeded for harvest in 1942 of 39,318,000 acres is 14% less than the 45,663,000 acres seeded in the fall of 1940 and 18% below average. Reductions were cept in a i w minor S age is in line with the reduced 1942 wheat acreage allotments of the farm program. The decline in acreage in the soft red wheat area was augmented somewhat because of the dry soil at the usual time for plowing for wheat, followed by heavy rains and wet fields at seeding time. In some areas, however, the open fall made it possible to continue seeding operations to a later date than usual after fields dried out sufficiently to be worked.

In spite of the difficulties experienced in getting the seed in the ground this fall, the Dec. 1 condition of 87% is unusually high. A year ago it was 84%, and that was the highest since the December, 1930 condition of 86%. The generally excellent condition of the crop is attributed to ample moisture and warm, open weather which has continued the growth until a later date than usual. The early sown wheat, which in places was handicapped by insufficient moisture, made good growth after rains came, and much of the late sown wheat has had a longer than usual late growing season. There program. Processing facilities to is some apprehension that top growth is too abundant to withstand turn out the needed quantities of certain dairy products must be however, are for the abandonment of only 6.6% of the seeded acremade available, however, and the program which is being an- 10-year average of 18.6%.

Factors affecting production which are measurable in the fall. such as reported condition, rainfall and temperature to date, related to yields in past years, indicate a 1942 wheat crop of approximately 631 million bushels. This production would be about 6% less than the 1941 production of 671,293,000 bushels, but about 12% larger than the average production. The yield indicated by condition and weather factors is 16.0 bushels per seeded acre, compared with 14.7 bushels in 1941 and the average of 11.8 bushels. This 16.0 bushel yield would be the highest yield per seeded acre since 1931.

Rye

The acreage of rye seeded in the fall of 1941 is estimated at 6,289,000 acres, an increase of 2% over the 6,182,000 acres seeded a year earlier and 3% over the 10-year (1930-39) average fall seedings. These estimates include the acreage seeded for pasture, soil improvement, etc., as well as acreage for harvest as grain. They also include an allowance for spring seedings in areas where rye is sown in the spring.

Increases over 1940 fall seedings are rather general in the Southern States, where scarcity of seeds of winter legumes resulted in some shift to rye. The acreage is higher also throughout most of the Ohio Valley, and in Michigan, Missouri, the Dakotas, Montana, Colorado, and Utah. In most other States the acreage sown is smaller than last year with substantial reductions in Minnesota, Wisconsin and Nebraska-each an important rye State.

The area seeded to rye in the fall of 1941 was affected by a number of conflicting factors. Dry weather delayed seeding operations in some of the eastern States and probably held the acreage below what would have been sown if more favorable conditions had prevailed. Reduced wheat allotments seem to have encouraged larger plantings of rye in some areas, while the incentive to increase production of feed grains in 1942 appears to have caused reductions in others.

The condition of rye on Dec. 1, 1941 at 87% of normal is higher than either the 83% reported a year earlier or the 10-year average of 75%. Condition of the crop is uniformly good, being above average in all States except Illinois, New Jersey, Delaware, Maryland, Virginia, North Carolina, and Georgia. In many of the more important rye States the crop is in the best condition in 10 years or more. Favored by ample supplies of soil moisture and mild fall weather, early seeded rye made a good growth and late seedings developd rapidly in all States except the Atlantic Coast States south of New York where continued fall drought delayed drilling and germination, as well as retarded plant development after

October Average Wages Highest On Record

The average weekly compensation of wage earnings in 25 manufacturing industries amounted to \$35.63 in October, as compared with \$35.10 in September, according to the Division of Industrial Economics of The Conference Board. The October average was the highest on record. The Board's study, issued Dec. 16, further said:

From January, 1938, when average weekly wages in these industries amounted to \$22.85, to November, 1940, when they were \$29.73, the rise was caused primarily by increased working time, which expanded from 32.2 to 39.6 hours per week. Since November, 1940, the rise has been caused primarily by increases in average hourly earnings, which began rising rapidly in December, 1940, so that in October, 1941, they amounted to 85.3 cents, as compared with 74.7 cents in November, 1940.

The increase in average hourly earnings since November, 1940, has been caused primarily by wage rate increases. Increased overtime payments have also been a factor, because hours of work expanded further to 41.7 per week in October, 1941. But the main cause has been wage rate increases.

Average hourly earnings amounted to 85.3 cents, the highest on record, in October, as compared with 84.5 cents in September. The largest increase was in the paint and varnish industry, where hourly earnings rose from 80.0 to 83.4 cents. Hourly earnings in the hosiery and knit goods industry rose from 57.2 to 59.9 cents in consequence of wage rate increases of 10% to 18% at several mills. Hourly earnings of employees of miscellaneous foundries increased from 86.6 cents to 89.3 cents.

Hourly earnings were higher in October than in September in all but four of the other industries. In the iron and steel, lumber and millwork, and meat packing industries they were unchanged. In the electrical manufacturing industry they amounted to 93.6 cents as compared with 93.9 cents in September.

The largest increase in average weekly earnings was in the automobile industry, where they amounted to \$45.82 in October, as compared with \$42.14 in September. This increase was caused mainly by a seasonal increase in hours from 36.8 to 39.6 per week. In the iron and steel industry the average hours per week increased from 37.8 to 40.0, so that average weekly earnings increased from \$37.16 to \$39.32. In the paint and varnish industry, average weekly earnings rose from \$33.24 to \$34.53, although hours per week decreased from 41.6 to 41.4. In the hosiery and knit goods industry weekly earnings rose from \$21.38 to \$22.56, although there was only a slight increase in hours per week. The increase in hourly earnings in miscellaneous foundries caused an increase in weekly earnings from \$39.66 to \$40.47, although hours of work declined from 45.8 to 45.3. Weekly earnings were lower in October than in September in nine of the 25 industries, and in all but one of the nine the decreases were caused by shorter working

Average hours worked per week in the 25 industries were only 1/10th of an hour greater in October than in September, despite the urgency of the defense program. They amounted to 41.7 as compared with 41.6 in September. They were lower than in September in 15 of the 25 industries, and in three other industries they were unchanged. As in September, the longest work week was in the machine and machine tool in-

dustry, where it averaged 50.2 hours, as compared with 50.4 hours in September. Nine industries operated less than 40 hours per week per employe. The largest decrease was in the northern cotton mills, where average hours fell from 40.5 to 38.8. The largest increases were in the automobile and iron and steel industries.

Wickard Says U. S. Has Record Food Supplies

In a statement bearing on the National food situation, issued on Dec. 17, Secretary of Agriculture Wickard declared that "we have on hand the largest total supplies of food in the history of the United States." "In addition," he said, "we have large supplies of feeds in our Ever-Normal Granary and the productive capacity on our farms to add to our food supply on an unprecedented scale. We have plenty for our own people, including the armed forces, and enough more to help feed our Allies." Secretary Wickard further said:

The war gets underway at a time when farmers have just completed a record production year and are now planning another record next year. The fact that we still have time to revise our production goals for 1942 before planting begins makes it possible for us to make increases where necessary. We are now studying these goals very carefully in the light of actual war and will plan increased production in any commodity or product where an increase appears advisable.

There is little excuse for any substantial increase in the price of agricultural commodities at this time and we will do everything in our power to check speculative increases.

Mr. Wickard is also reported as saying that the war had greatly reduced oceanic shipment of food supplies to this country. Outgoing ships, he said, are mostly loaded with defense materials, including food, while incoming ships are loaded with crude rubber, tin and other strategic materials. In the Associated Press he is quoted as saying:

"Some special arrangements" had been made, he said, however, to assure the United States of imports of specific agricultural products, such as a guarantee of space for Cuban sugar and fixed maximum ocean freight rates for cocoa and coffee from Latin America.

A summary of Secretary Wickard's food report is given as follows in the same advices:

Grains—The wheat supply is ample for two years, while corn and barley supplies are the largest in 20 years.

Meats — Commercial production in 1942 is expected to set a new record. The number of livestock on farms is increasing and is expected to be 5% larger than this year.

Poultry Products—Egg production is at a record level and further increases are expected next year. The production of chicken meat is expected to be 14% larger next year.

Dairy Products—The production of milk and manufactured dairy products likewise is at a record level.

Vegetables — The production of vegetables for processing in 1941 was of record proportions. Larger production is planned in 1942.

Edible Fats and Oils—Increased supplies of lard and oil from peanuts and soybeans are expected next year.

Fish—The annual catch could almost immediately be increased from 4,443,000,000 to 4,628,000,000 pounds, and later to 6,200,000,000.

higher for men's cotton clothing and felt hats; for women's wash frocks, rayon dresses and silk hose; and for shoes. Only scattered price rises were reported for wool clothing and in some cases lower prices were reported for men's and women's coats. The kinds of wool clothing on the market change with the seasons and winter price levels are usually established by Oct. 15. On Nov. 15 this year, however, the total clothing budget was more than 2% higher than on Oct. 15 in 6 of the 21 cities from which the Bureau obtained clothing prices.

Housefurnishings

Prices for electrical and cooking equipment continued to rise this month and were largely responsible for the increase of 0.8% in housefurnishings in large cities. The higher prices reported for electrical goods and gas stoves reflected the new defense excise taxes on retailers' stocks purchased since Oct. 1. The decline shown for New York City is accounted for by the change in the city sales tax from 2 to 1%.

Percentage Change in Average Prices Paid for Specified Housefurnishings by Wage Earners and Lower-Salaried Workers in Large Cities of the United States.

*No change.		

Miscellaneous Goods and Services

Prices for tires and tubes continued to rise in most cities. Soap prices also continued their earlier advances. Five of the 21 cities reported lower gasoline prices. In St. Louis, this decline was enough to cause an 0.4% drop in the cost of miscellaneous goods and services in spite of the increases which occurred in prices of other commodities included in this group.

Living Costs In Large Cities Advanced 0.7% From Mid-October To Mid-November

Living costs of moderate-income families rose 0.7% from mid-October to mid-November, Secretary of Labor Perkins reported on Dec. 17. "The greatest increases were in food and clothing costs with smaller advances in all other major groups," she said. "No reports are yet available on changes in living costs since the entry of the United States into the war. From the outbreak of the war in Europe to Nov. 15, the average increase in living costs was 11.8%.

"The index of the cost of goods purchased by wage earners and lower-salaried workers for Nov. 15, 1941 was at the highest point since December, 1930. Higher prices for goods and services were responsible for a rise of 9.7 above the 1935-39 average and defense excise taxes levied in 1940-41 accounted for an additional 0.5 of 1%." Secretary Perkins further reported:

Food

Retail food costs advanced 1.3% between mid-October and mid-November, continuing the rise which began about a year ago. The largest price advances were reported for eggs and fresh fruits and vegetables, such as apples, bananas, carrots and green beans, which generally rise during the late fall and early winter. The price increases for oranges, spinach, and onions reflected relatively short market supplies. Other foods showing substantial price gains were fresh milk, coffee and fresh fish. The average cost of cereals and bakery products remained unchanged. Meat prices declined considerably as is usual at this time of year, when beef and pork are marketed in large quantities.

Rent

Rents in the large cities increased on the average by 0.4% between mid-October and mid-November. Higher rentals were reported for relatively few dwellings. Of the 21 cities included in this survey, only one city showed an increase of as much as 1% in the total rental bill, when rents which remained unchanged or decreased are averaged with those which rose.

Fuel, Electricity and Ice

Slightly higher prices were reported for coal and wood in a few cities. Two cities, Minneapolis and New York, reported that fuel oil prices were lower in mid-November than in mid-October.

Clothing

Clothing customarily purchased by families of wage earners and lower-salaried clerical workers cost 1.4% more on Nov. 15 than on Oct. 15. November prices were reported as being much

MARK

President Roosevelt Says U. S. Will Not Lay Down Arms Until World Liberty Is Secure

President Roosevelt pledged on Dec. 15 that the United States would not lay down its arms "before liberty is once again secure in the world we live in." In a nation-wide radio address commemorating the 150th anniversary of the ratification of the Bill of Rights, the President said that the issue of the war is the "attempted revival of barbarism, this proposed return to tyranny, this effort to impose

again upon the peoples of the world doctrines of absolute obedience, and of dictatorial rule, and of the suppression of truth and of the oppression of conscience which the free nations of the earth have long ago rejected." He con-

What we face is nothing more or less than an attempt to overthrow and to cancel out the great upsurge of human liberty of which the American Bill of Rights is the fundamental document; to force the peoples of the earth, and among them the peoples of this continent, to accept again the absolute authorand despotic rule from which the courage and the reso-lution and the sacrifice of their ancestors liberated them many, many years ago.

Speaking of the influence exerted by the "basic principles of freedom of man and freedom of mankind" enacted in the American Bill of Rights, President Roosevelt said that, with the exception of Germany, Italy and Japan, probably four-fifths of the peoples of the world support "its principles, its teachings and its glorious results.'

The President further said that since 1933 a "small clique of ambitious and unscrupulous politicians" in Germany have as their entire program and goal "nothing more than the overthrow, throughout the earth, of the great revolution of human liberty of which our American Bill of Rights is the mother charter." He added that the truths which were self-evident to six generations of Americans were "hateful" to Hitler and his fellows and that the inalienable rights of life, liberty and the pursuit of happiness were "empty words which they pro-posed to cancel forever."

Mr. Roosevelt went on to relate the propositions advanced by the Nazi politicians, explaining in de-tail Hitler's ideal of the people, the government and the church. He concluded his address by declaring that the attempt to overthrow the principles embodied in the American Bill of Rights could only succeed "if those who had inherited the gift of liberty had lost the manhood to preserve it.

The text of the President's talk

follows:

No date in the long history of freedom means more to libertyloving men in all liberty-loving countries than the 15th day of December, 1791. On that day, 150 years ago, a new nation, through an elected Congress, adopted a declaration of human rights which has influenced the thinking of all mankind from one end of the world to the

There is not a single republic on this hemisphere which has not adopted in its fundamental law the basic principles of freedom of man and freedom of mind enacted in the Americ Bill of Rights.

There is not a country, large or small, on this continent which has not felt the influence of that document, directly or

indirectly. Indeed, prior to the year 1933, the essential validity of the American Bill of Rights was accepted at least in principle. Even today, with the exception of Germany, Italy and Japan, the peoples of the world—in all probability four-fifths of them
—support its principles, its
teachings and its glorious re-

But in the year 1933 there

American bill of human rights as valid: A small clique of ambitious and unscrupulous politicians whose announced and admitted platform was precisely the destruction of the rights that instrument declared. Indeed, the entire program and goal of these political and moral tigers was nothing more than the overthrow, throughout the earth, of the great revolution of human liberty, of which our American Bill of Rights is the mother charter.

The truths which were selfevident to Thomas Jeffersonwhich have been self-evident to the six generations of Americans who followed him-were to these men hateful. The rights to life, liberty and the pursuit of happiness which seemed to Jefferson, and which seem to us, inalienable, were, to Hitler and his fellows, empty words which they proposed to cancel forever.

The propositions they advanced to take the place of Jefferson's inalienable rights were

That the individual human being has no rights whatever in himself and by virtue of his humanity;

That the individual human being has no right to a soul of his own, or a mind of his own, or a tongue of his own, or a trade of his own; or even to live where he pleases or to marry the woman he loves:

That his only duty is the duty of obedience, not to his God, and not to his conscience, but to Adolf mitler; and that his only value is his value, not as a men, but as a unit of the Nazi state.

To Hitler the ideal of the people, as we conceive itthe free, self-governing and responsible people—is incomprehensible. The people, to Hitler, are "the masses" and the highest human idealism is, in his own words, that a man should wish to be-come "a dust particle" of the order "of force" which is to shape the universe.

To Hitler, the government, as we conceive it, is an impossible conception. The government to him is not the servant and the instrument of the people, but their absolute master and the dictator of their every act.

To Hitler the Church, as we conceive it, is a monstrosity to be destroyed by every means at his command. The Nazi church is to be the "national church," "absolutely and exclusively in the service of but one doctrine, race and nation.

To Hitler, the freedom of men to think as they please and speak as they please and worship as they please is, of all things imaginable, most hateful and most desperately to be

feared. The issue of our time, the issue of the war in which we are engaged, is the issue forced upon the decent, self-respecting peoples of the earth by the aggressive dogmas of this at-tempted revival of barbarism, this proposed return to tyranny, this effort to impose again upon the peoples of the world doctrines of absolute obedience, and of dictatorial rule, and of the suppression of truth, and of the oppression of conscience, which the free nations of the earth have long ago rejected.

What we face is nothing more nor less than an attempt to overthrow and to cancel out the great upsurge of human liberty of which the American Bill of Rights is the fundamental document: to force the peoples of the earth, and among them the peoples of this continent, to accept again the absolute authority and despotic rule from which the courage and the resolution and the sacrifices of their ancestors liberated them many, many years ago.

It is an attempt which could succeed only if those who have inherited the gift of liberty had lost the manhood to preserve it. But we Americans know that the determination of this generation of our people to preserve liberty is as fixed and certain as the determination of that earlier generation of Americans

to win it.

We will not, under any threat, or in the face of any danger, surrender the guaranty of liberty our forefathers framed for us in our Bill of Rights.

We hold with all the passion of our hearts and minds to those commitments of the human

We are solemnly determined that no power or combination of powers of this earth shall shake our hold upon them.

We covenant with each other before all the world, that having taken up arms in the defense of liberty, we will not lay them down before liberty is once again secure in the world we live in. For that security we pray; for that security we finished and unfinished gasoline was several million barrels higher

than the total on hand a year ago.

The production and stock figures for kerosene, residual fuel oil, and lubricating oil for October, 1941, indicate sizeable gains in total demand over a year ago, but the unseasonable weather appears to have effected a decline for distillate fuel oil.

According to the Bureau of Labor St tistics the price index

According to the Bureau of Labor St tistics, the price index for petroleum and products in October, 1941, was 61.7 compared with 61.7 in September and 49.0 in October, 1940.

The crude-oil capacity represented by the data in this report was 4,600,000 barrels, hence the operating ratio was 89%, compared with 89% in September and 82% in October, 1940.

October Crude Oil Output Sets New High-Runs To Stills Again Show An Increase

Daily average crude-oil production exceeded the 4,000,000-barrel mark in October, 1941, for the first time, it is reported by the Bureau of Mines, U. S. Department of the Interior. The total output in October was 126,145,000 barrels, the daily average of 4,069,200 barrels being 87,700 barrels higher than in September.

The Bureau's report further states: The major part of the gain in production in October was in Texas with small gains in California, Kansas, Louisiana, and other States outweighing a material decline in Oklahoma. Illinois' daily production declined 400 barrels to 422,700 barrels; this small decrease was significant as it was the first drop since May. Coastal Louis-

iana, Kansas, and Mississippi were again the record breakers.

The gain in crude-oil production in October outweighed an increase in crude runs to stills; exports of crude oil showed little change and the net result was a smaller withdrawal (about 2,000,-000 barrels) from crude-oil inventories in October than in September.

Refined Products Daily average crude runs to stills increased for the seventh successive month, the October record of 4,089,000 barrels being

40,000 barrels above the average in September. Because of the lack of import and export data (the Commerce Department has not yet clarified its recent order relating to the publication of such figures), the customary domestic demand for motor fuel for October cannot be obtained. However, estimating the comparatively small imports, the total demand was about 61,000,000 barrels, or 9% above a year ago. This gain was less than "normal," probably because of curtailment in the eastern States. came to power in Germany a political clique which did not in stocks of over 2,000,000 barrels. As stocks declined materially in accept the declarations of the October, 1940, the total for Oct. 31, 1941 of 82,303,000 barrels of

November Chain Store Sales At \$419,578,777

According to a compilation made by Merrill Lynch, Pierce, Fenner & Beane, 30 chain store companies, including two mail order companies, reported an increase of 20.0% in sales for November, 1941, relative to those for November, 1940. Excluding the two mail order organizations, 28 other chain store companies reported an increase in sales of 20.6%.

Sales for the 30 companies showed an increase of 21.1% for the first 10 months of 1941, relative to those for the same period in 1940. Excluding the two mail order organizations, 28 other chains reported an increase in sales of 18.0%

President Roosevelt Warns Other Countries Nation Is United Behind Foreign Policy

President Roosevelt on Nov. 29 warned foreign nations that the country is united behind the Administration's foreign policy, declaring that statements of conflicting opinion should not be taken by persons abroad as an indication of lack of cohesion. "While there have been expressions of different views in regard to our foreign policy, I have always felt that those differences were of degree

but not of principle," the President said. Mr. Roosevelt made these remarks in reply to a letter from Senator Gillette, Democrat of Iowa, a consistent opponent of

vices" in carrying out the policy which the majority had laid down. In writing to the President, Senator Gillette said:

the Administration foreign policy.

Senator Gillette had informed the President that, while he had not

changed his convictions, he was offering his "support and ser-

"I have been unable to give my support to several of these (Administration) enactments because of my deep and sincere convic-tions as to the unwisdom of the courses proposed. I have not sur-rendered these convictions now, and I would by word or vote reassert them should the same or similar questions properly come before the Congress for review.

But, Mr. President, the ma-jority of the Congress held other views with reference to these proposals than were entertained by me, and these conflicting views have found expression in the enactment of the various proposals into law.

Within the past few days, a majority decision was reached in the passage of the revising and repealing paragraphs of a proposal pertaining to the theretofore existing Neutrality Act. In my opinion, the action thus taken on this proposal removes entirely from the realm of debate our present policies of relationship to the aggressive activities of the nations adhering to the so-called Tripartite Pact.

As one who opposed the action the Congress has taken, and as one who recognizes the need for the present unified mobilization of all our national strength and resources for a victorious attainment of the goals for which we are now committed, I am taking the liberty of addressing this letter to you as President of my country and Commander in Chief of her forces, tendering my support and service in any capacity or activity where I can be of assistance in the work which we have before us to do and for the purpose of enlisting myself and all that I have in service for the duration of the emergency. The President replied:

I have received your very frank letter of Nov. 21. It is indeed gratifying to have your statement of willingness to serve in this period of emer-gency when the challenge to the destiny of our country is so strong.

The people of your State elected you to represent them in our national councils and I would be reluctant to interrupt that duty, but if the occasion should warrant it, I would not hesitate to ask you to place your abilities at the disposal of your country in some other capacity

As you have written, questions of national policy are decided in our Democratic way. That there is debate, or that there are statements of conflicting opinion prior to the decision should not be taken by persons abroad as an indication of lack of cohesion among our people, though that mistake is some times made. While there have been expressions of different views in regard to our foreign Livestock Forest products policy, I have always felt that those diferences were of degree but not of principle.

I have been confident that we coal by .213 and miscellaneous by .548.

Americans believed in the defense of our country and that Retail Food Costs Advanced 1.3% Further Between Mid-October And Mid-November

Retail food costs advanced 1.3% between Oct. 14 and Nov. 18, continuing the rise which began in November, 1940, Acting Com-missioner Hinrichs of the U. S. Bureau of Labor Statistics reported on Dec. 16. Costs of all important groups of food advanced during the month except for cereals, bakery products, and meats. In indicating this the Department said:

The largest advances were reported for eggs and fresh fruits and vegetables such as apples, bananas, carrots, and areen beans, which generally rise seasonally during the late fall and early winter. Relatively short market supplies were reflected in contra-seasonal price increases for oranges, spinach, potatoes and onions. Other staple commodities showing substantial price gains were fresh milk, coffee, and fresh fish. The average cost of cereals and bakery products remained unchanged. Meat prices declined considerably, as is usual for this time of year when beef and pork are marketed in large quantities.

Preliminary reports on 18 foods in 19 cities as of Dec. 2 indicated further declines in prices of meats, lard, and butter, and a reduction in prices of eggs, with continued advances in other food prices. No reports are yet available on changes in food prices since the entry of the United States into the war.

The Bureau's announcement goes on to explain: On Nov. 18, the last date for which the Bureau will have indexes of food costs while the United States was formally at peace, the Bureau's index of retail food costs was 113.1% of the 1935-39 average, the highest level reached in nearly 11 years. Since August 1939, just prior to the outbreak of the European War, total retail food costs have risen 21%, with the most outstanding increases reported for eggs (61%), fresh and canned fish (36%), dairy products (30%), dried fruits and vegetables (29%), and fats and oils (26%).

Since November of last year retail food prices have been advancing continuously. The net increase in total food costs for the year was 17.9%, with advances amounting to 30% for pork, 34% for fresh vegetables, and 25% for fresh fruit. The foods showing the largest price increases over a year ago are lard, 63%; shortening in cartons, 55%, and cheese, coffee, evaporated milk, eggs, canned pink salmon, canned peaches, navy beans, shorten-

ing in tin or similar containers, and oleomargarine, 24 to 31%.

Between Oct. 14 and Nov. 18, advances in retail prices of milk ranging from one-half to about 21/2 cents per quart occurred in 11 cities, while moderate increases in prices of white bread were reported from 15 cities. At the same time, average bread were reported from 15 cities. At the same time, average bread prices declined .8 cents per pound in Chicago, .3 cents in Dallas, and .1 cents in Pittsburgh. Since last April increases in milk prices have been reported in 46 of the 51 cities covered by the Bureau's survey, while bread prices on Nov. 18 were higher than on July 15 in 45 of those cities. Increases in prices of bread and milk have been attributed largely to increased costs of production. Flour prices at wholesale advanced 23.5% between November, 1940, and November, 1941.

All of the 11 cuts of meat priced by the Bureau declined in price between mid-October and mid-November, offsetting to a considerable extent the price increases reported for 30 other foods of the 54 included in the Bureau's index. Lard prices also were reduced about 4% following the recent heavy marketing of hogs. Butter prices declined again this month in an irregular movement, as a result of increases in supplies. Only two other commodities, lettuce and sweet potatoes, were lower in price on Nov. 18 than on Oct. 14. All of the 54 foods were higher in price on Nov. 18 than a year earlier.

The continuous upward trend in retail prices of food for the past 12 months has followed marked advances in wholesale market, resulting from Government policies with regard to purchases under the Lend-Lease Act, and loans on basic farm commodities, together with increased consumer demand, slightly smaller supplies of some foods, and speculative activities in some

Changes in prices from Oct. 14, to Nov. 18, and since Novem-1940, for the more important foods were as follows:

ber, 1940, for the more import	ant loods were as lonows.
November, 1941, compared with	November, 1941, compared with
Oct., 1941 Nov., 1940	Oct., 1º41 Nov., 1940
(Percentage (Percentage	(Percentage (Percentage

Coffee + 1.9 + 29.8	White bread 1.1 +10.3
Oranges + 1.6 + 34.2	Rib roast 2.2 + .3
Ailk, fresh (average) + 1.4 + 15.3	Roasting chickens - 2.2 + 8.6
Theese + 1.2 + 31.0	Round steak 2.7 + 4.2

The Bureau also reports that there were increases of 2% or more in total food costs to moderate income families for 11 cities between mid-October and mid-November. The largest increases were for Denver (3.0%), Little Rock (2.8%) and Boston (2.8%). Greater than average advances in prices of dairy products, fruits and vegetables, and fats and oils contributed to the large increases in these three cities. Food prices declined in six cities, with the greatest decreases in Atlanta (1.0%), Washington D. C. (4%), and Richmond 4%). The lower prices in these three cities were due to reductions in prices of fruits and vegetabls, and greater than average declines in prices of meats.

Index numbers of food costs by commodity groups for the current period and for Oct. 14, 1941, Sept. 16, 1941, Nov. 12, 1940, and Aug. 15, 1939 follow:

DIVIDENDS

Dividends are grouped in two separate tables. In the first we bring together all the dividends announced the current week. Then we follow with a second table in which we show the dividends previously announced, but which have not yet been paid. Further details and record of past dividend payments in many cases are given under the company name in our "General Corporation and Investment News Department" in the week when de-

The dividends announced this week are:

Air Investors, Inc.-65-Cent Dividend-

The directors have declared a dividend of 65 cents per share on the \$2 non-cumulative convertible preferred stock, payable Dec. 29 to holders of record Dec. 24. A distribution of \$1 was paid on this issue on Dec. 27, last year. The previous payment was 60 cents on Dec. 23, 1936.—V. 153, p. 540.

Alabama Power Co. - Plans Bond Redemption-\$80,000,000 Bond Issue Filed With SEC-

Company plans to retire all its outstanding mortgage debt under a proposed financing program submitted to the Securities and Exchange Commission Dec. 22.

The company will offer \$80,000,000 of new bonds, maturing in 1972,

The company will offer \$80,000,000 of new bonds, maturing in 1972, through competitive bidding.

The net proceeds from the sale of the bonds, together with the proceeds of bank loans aggregating \$12,000,000 and treasury funds, will be applied to the retirement of the company's entire outstanding mortgage debt as follows:

(a) \$10,036,950 to the redemption on March 1, 1942, at 105, of \$9,559,000 5% first mortgage 30-year gold bonds, due 1946;

(b) \$18,142,500 to the redemption on June 1, 1942, at 102½, of \$17,700,000 5% first mortgage lien and refunding gold bonds, due 1951;

(c) \$5,558,140 to the redemption on May 1, 1942, at 101½, of \$5,476,000 5% first mortgage lien and refunding gold bonds, due 1956;

(d) \$48,315,370 to the redemption, at 101, of \$47,837,000 4½% first and refunding mortgage gold bonds, due 1967;

(e) \$15,450,000 to the redemption, at 103, of \$15,000,000 5% first and refunding mortgage gold bonds, due 1968;

(f) \$1,840 to the redemption of \$1,600 of 6% Electric Light System refunding bonds, due serially to July 1, 1945, of the Town of Headland (assumed);

(g) \$17,350 to the redemption of \$10,000 of 7% 30-year funding

(assumed);
(g) \$17,350 to the redemption of \$10,000 of 7% 30-year funding bonds, due 1952, of City of Ozark (assumed).—V. 154, p. 1589.

Algoma Central Terminals Ltd.—Bond Plan Approved The proposals affecting the debenture stock and bonds of this company, which were approved by extraordinary resolutions of the holders of the debenture stock and bonds at the meeting held Nov. 20, 1941, have now become operative and binding.

The attention of the holders is directed to the following effects of

have now become operative and binding.

The attention of the holders is directed to the following effects of the proposals:

(1) The instalment of interest originally due on Dec. 31, 1932, is payable, with simple interest thereon at the rate of 5% per annum, on Dec. 31, 1941.

Each half-yearly instalment of interest originally due, or to become due, half-yearly after Dec. 31, 1932, up to and including Dec. 31, 1950, will be payable with simple interest thereon nine years after its original due date. Each instalment of interest originally to become due on June 30, 1951, and half-yearly thereafter, will be payable with simple interest thereon on Dec. 31, 1959.

(2) The Algoma Central & Hudson Bay Ry. has the right to purchase, with any moneys from time to time found available therefor by the joint committee constituted under the proposals, debenture, stock and (or) bonds of Algoma Central Terminals, Ltd., either in the market or by tender; or alternatively the right to cause the Terminals Co. to redeem with such available moneys the said debenture stock and (or) bonds, or any part or parts thereof, in accordance with the provisions for redemption attaching thereto, except that such debenture stock and (or) bonds shall be redeemable at 125%, which price shall constitute full satisfaction of all rights whatsoever in respect of the debenture stock and (or) bond so redeemed, whether arising thereunder or otherwise howsoever, other than any unpaid instalment of interest that may have become payable as stated above.

The instalment of interest payable Dec. 31, 1941, will be paid as follows:

Checks will be mailed on Dec. 29, 1941, in England, to debenture

Checks will be mailed on Dec. 29, 1941, in England, to debenture stock holders on the London Register, and in Canada to those on the

Montreal Register.

In the case of bonds Coupon No. 3 will be paid on Dec. 31, 1941, at the chief office of the Bank of Montreal in London, England, in Sterling, or at the holders' option at the chief office of the Bank in Montreal, Canada, in Canadian dollars at the rate of exchange of \$4.8665 to the pound. Company will not pay interest on coupon after Dec. 31, 1941.

The accrued interest payable with the coupon will be 45% of the ce amount.

face amount.

All payments in London will be subject to deduction of 10 shillings on the pound for British income tax. Payments to debenture stock holders resident in Canada registered on either register will be subject to 5% deduction for national defense tax.—V. 144, p. 4164.

Alleghany Corp.—Suit Filed-

A motion for summary judgment was filed Dec. 22 in Federal Court at Indianapolis by George A. Ball, Muncie, Ind., defendant in a \$5,000,000 damage suit involving disposition of Alleghany's stock. Plaintiffs in the suit are Robert R. Young and Allan P. Kirby and the Seaboard Co., Ltd., of Nassau, the Bahamas.

The suit charged Mr. Ball "artificially and illegally" raised the market value of Alleghany shares \$5,000,000 before selling to the plaintiffs in 1937.

mariest value of Alleghany shares \$5,000,000 before selling to the plaintiffs in 1937.

The motion asks the court to rule that the plaintiffs are precluded from recovering damages on 1,200,000 shares of stock which were left in the hands of the George and Frances Ball Foundation as collateral for a \$2,375,000 note given as partial payment for the stock.—V. 154, p. 1145.

Aluminum Co. of America—Stock Offered—Blyth & Co., Inc. offered after the close of the stock market Dec. 22, 2,000 shares of common stock (no par) at \$95 a share, with a concession of two points to members of NASD.—v. 154, p. 1628.

American Manufacturing Co.-\$1.50 Common Dividend

The directors have declared a dividend of \$1.50 per share on the common stock and the regular quarterly dividend of \$1.25 per share on the preferred stock; both payable Dec. 31 to holders of record

On Oct. 1, last, a distribution of 75 cents per share was made on the common stock, which compared with 50 cents on July 1 and 25 cents in preceding quarters.—V. 154, p. 1528.

American Optical Co.—Pays Extra Dividend—

The company on Dec. 15 paid an extra dividend of 50 cents per share on the common stock to holders of record Dec. 6. The regular quarterly dividend of 25 cents per share has been declared on this issue, payable Jan. 1 to holders of record Dec. 20.

An extra of 50 cents was paid on Dec. 14, 1940, and one of 25 cents

on Dec. 15, 1939.-V. 151, p. 3385.

American Service Co.—Accumulated Dividend-

The company on Dec. 23 paid a dividend of \$5.50 per share on account of accumulations on the \$3 cumulative preferred stock to holders of record Dec. 11. This compares with \$2 paid on Dec. 23, 1940, and \$3 on Dec. 20, 1939, and on Dec. 23, 1938.—V. 151, p. 3225.

American Steel Foundries-Year-End Dividend-

The directors have declared a year-end dividend of 50 cents per share on the common stock, payable Dec. 29 to holders of record Dec. 23. This compares with 25 cents paid on Dec. 15, last; 75 cents on Sept. 15, last; 25 cents in each of the two preceding quarters;

75 cents on Dec. 16, 1940, and 25 cents on March 30, June 29 and Sept. 30, 1940. The previous payment was 25 cents on March 31, 1938.—V. 154, p. 1100.

American Water Works & Electric Co., Inc.—Output— Output of electric energy of the electric properties of the company for the week ending Dec. 20, 1941, totaled 73,792,000 kwh., an increase of 17.65% over the output of 62,721,900 kwh. for the corresponding

Comparative table of weekly output of electric energy for the last five years follows:

w	eek End.	- 1941	1940	1939	1938	1937

V.	154, p.	1589.				a constant

Arkansas Natural Gas Corp.—Accumulated Dividend—

The directors have declared a dividend of 60 cents per share on account of accumulations on the 6% cumulative preferred stock, par \$10, payable Dec. 29 to holders of record Dec. 24. A distribution of 30 cents was made on March 31, last.

Total payments on the preferred stock will amount to 90 cents per share, the same as in 1940. Arrearages on Oct. 1, 1941, totaled \$2.70 per share.—V. 153, p. 980.

Associated Gas & Electric Co.—Weekly Output—

The Atlantic Utility Service Corp. reports that for the week ended Dec. 19 net electric output of the Associated Gas & Electric group was 128,440,502 units (kwh.). This is an increase of 14,662,151 units or 12.9% above production of 113,778,351 units a year ago.—V. 154,

Atchison Topeka & Santa Fe Ry.-\$1 Dividend-

The directors have declared a dividend of \$1 per share on the common stock, payable March 2 to holders of record Dec. 31, out of accumulated surplus for the 12 months ended June 30, 1941. A similar payment was made on Sept. 2 and on Dec. 1, last, and on Dec. 27, 1940. The previous payment on this issue was \$2 on Sept. 1, 1937.—

Baltimore & Ohio RR .- Carloadings-

This company handled 59,514 cars of freight during the week ended Dec. 20, 1941. Of this total, 37,760 cars were loaded on line and 21,754 were received from connections. This was an increase of 8.741 cars over the same period of last year, when the total was 50,773, consisting of 32,628 loaded on line and 18,145 received from connections.

During the preceding week (the week ended Dec. 13) the total was 59,079, including 38,236 loaded on line and 20,843 received from connections. For the same week of 1930 the total was 48,108, comprising 32,413 loaded on line and 15,695 received from connections.—V. 154,

Bond Stores, Inc.—Common Stock Offered—Offering of 50,000 shares common stock (par \$1) was made after the close of the market Dec. 23 by a group headed by Lehman Brothers and Wertheim & Co. The price was \$18.25, closing price of the stock on the New York Stock Exchange. The shares being offered are outstanding shares owned by Benjamin J. Friedman, President of Bond Stores, Inc., and none of the proceeds from the sale of the stock goes to the corporation.

The business of Bond Stores consists principally of the retail sale of men's and students' clothing at 59 stores located in 48 cities and the manufacture of most of the clothing sold at these stores. The corporation also sells at retail men's haberdashery, furnishings and hats. In the past five years, the number of stores has increased from 34 to 59 stores. Manufacturing plants of the corporation are located at Rochester, N. Y., and at New Brunswick, N. J.

Underwriters—The names of the principal underwriters and the maximum number of shares of common stock which each may purchase, are as follows:

	Shares		Shares
Lehman Brothers	7,500	Emanuel & Co	1,500
Wertheim & Co	7,500	G. MP. Murphy & Co	1,500

Border City Mfg. Co.-Year-End Dividend-

The company on Dec. 24 paid a year-end dividend of 50 cents per share to stockholders of record Dec. 18. Previously the company paid \$1 on Nov. 15, last; 50 cents on Aug. 13, last, and 25 cents each on Feb. 11 and May 14, 1941.—V. 154, p. 1260.

Boston Terminal Co.—Petition Denied—

Attorney Bartholomew A. Brickley recently presented to Judge Francis J. W. Ford of the U. S. District Court at Boston a petition of the company seeking to have set aside the court order enjoining the company from filing a plan of reorganization. Judge Ford denied the petition.—V. 154, p. 1145.

Calamba Sugar Estate-Dividend Ruling-

tribution declared on the common stock to be payable on Dec. 24, 1941, to stockholders of record Dec. 16, 1941 (at San Francisco), were mailed on Dec. 23, 1941.

The Committee on Security Rulings of the New York Curb Exchange

ruled that said common stock be quoted "ex" the above referred to cash distribution of \$4 per share on Dec. 29, 1941, and that all due bills for said distribution covering deliveries after Dec. 12, 1941, in settlement of transactions made prior to Dec. 29, 1941, must be redeemed on Dec. 30, 1941.—V. 154, p. 1591.

California Oregon Power Co.—Accumulated Dividend The directors have declared quarterly dividends of \$1.75 per share on the 7% preferred stock, \$1.50 per share on the 6% preferred stock, and \$1.50 per share on the 6% preferred stock, series of 1927, all payable on account of accumulations on Jan. 15 to holders of record Dec. 31. Like amounts were distributed on the said stocks on Jan. 15, April 15, July 15, Oct. 15 and Nov. 15, last.—V. 154, p. 1490.

Canadian Bronze Co., Ltd. - Extra Dividend Of 50 Cents-

The directors have declared an extra dividend of 50 cents per share in addition to the regular quarterly dividend of $37\frac{1}{2}$ cents per share on the outstanding 80,000 shares of common stock, no par value, both payable Feb. 2 to holders of record Jan. 9. An extra of 50 cents per share was also paid on the common stock on Feb. 1, 1940 and 1941. The directors also declared the regular quarterly dividend of \$1.25 per share on the outstanding 7,500 shares of preferred stock, payable Feb. 2 to holders of record Jan. 9.—V. 151, p. 3883.

Bonds Called-

-V. 154, p. 1629.

J. P. Morgan & Co. Incorporated, as sinking fund trustee, is notify-J. P. Morgan & Co. Incorporated, as sinking fund trustee, is notifying holders of C. & O. Ry. refunding and improvement mortgage 3½% bonds, series E, due Aug. 1, 1996, that \$90,000 principal amount of these bonds have been drawn by lot for redemption as of Feb. 1, 1942, at 102½% of their principal amount. The drawn bonds will be redeemed at the office of the sinking fund trustee upon presentation and surrender on and after Feb. 2, 1942. No interest shall accrue on the bonds after the redemption date.

On Dec. 22, 1941, \$12,000 principal amount of the bonds previously drawn for redemption had not been presented for payment.—V. 154, p. 1261.

Chicago Burlington & Quincy RR .- \$2 Dividend-

The directors have declared a dividend of \$2 per share on the common stock, payable Dec. 29 to holders of record Dec. 19. A similar distribution was made on this issue on Dec. 24, 1940; Dec. 26, 1939; Dec. 27, 1938, and Dec. 28, 1937.—V. 154, p. 1300.

Chicago Milwaukee St, Paul & Pacific RR. - Cars Loaded Increase-

Week Ended— o. of cars loaded_ nections during the period were:

Dec. 1 to 21, 1941—96,249 cars (18 loading days).

Dec. 2 to 22, 1940—88,359 cars (18 loading days).

Nov. 1 to 22, 1941—102,016 cars (18 loading days).—V. 154, p. 1491.

Chicago Rys.—Six Months Interest—

Interest for the six months ended Aug. 1, 1941, in the amount of $2\frac{1}{2}$ % on the reduced face value of \$750 will be paid to holders of record at the close of business Dec. 27, 1941, of certificates of deposit for first mortgage 5% gold bonds due Peb. 1, 1927.—V. 154, p. 1375.

Chicago Rock Island & Pacific Ry. - Court Orders Show Cause Why Reorganization Should Not Be Ap-

Judge Michael L. Igoe of the Federal District Court at Chicago Dec. 9 entered an order directing all parties interested in the reorganization of the company to show cause on or before Dec. 31, 1941, why the reorganization program drawn up by the Interstate Commerce Commission should not be disapproved and referred back to

merce Commission.

This Federal District Court order was entered as a sequence to the action by the Circuit Court of Appeals, which reversed District Court and IOC approval of reorganization plans for the Chicago Milwaukee St. Paul & Pacific RR., on the ground that in drafting its program the ICC had failed to establish findings on the valuation of the property on which to determine value of outstanding securities.

In the case of the Rock Island the program of the ICC as modified would reduce capitalization to \$268,127,410 from \$458,000,000 and eliminate common and preferred stock equity, whose holders have claimed that almost \$300,000,000 would be wiped out under the proposed revamping. Objections to the plan also were voted by holders of \$32,000,000 of convertible bonds on the ground that the equity of their holdings should be reconsidered in the light of higher earnings.

Judge Igoe also directed interested parties in the Rock Island proceeding to "set forth upon what points findings by the Commissionare necessary in order to comply with the principles stated by the Circuit Court in its opinion."

Car Loadings-

Week Ended— Cars loaded——V. 154, p. 1529. Dec. 13,'41 Dec. 6,'41 Dec. 14,'40 28,277 27,355 25,181

Cincinnati & Lake Erie RR.—Plan Operative—

The plan of reorganization of the company has been declared operative by the U. S. District Court for the Southern District of Ohio, Western Division, and the cash and securities for exchange and distribution under the plan are now available at Ohio National Bank, 30 East Town St., Columbus, Ohio, the depositary appointed by the court for purposes of distribution.—V. 152, p. 2545.

Collyer Insulated Wire Co.-50-Cent Dividend-

The directors have declared a dividend of 50 cents per share on the common stock, no par value, payable Dec. 27 to holders of record Dec. 22. A like amount was paid on Oct. 1, last, which compares with 30 cents each on April 1 and July 1, 1941; 50 cents on Dec. 28, 1940; 30 cents on Oct. 1, 1940; 20 cents on July 1, 1940, and 10 cents in previous quarters. An extra of 20 cents was also paid on Dec. 27, 1939.—V. 154, p. 538.

Commonwealth Edison Co.—Weekly Output—

Last week's electricity output of the Commonwealth Edison group of companies, excluding sales to other electric utilities, showed a 6.9% increase over the corresponding period of 1940.
Following are the kilowatt hour output totals of the past four weeks and percentage comparisons with last year:

	Kilowatt H		
Week End.—	1941	1940	% Inc.
Dec. 20	168,275,000	157,437,000	6.9
Dec. 13	170,216,000	153,000,000	11.3
Dec. 6	165,469,000	151,555,000	9.2
Nov. 29	161,255,000	152,012,000	6.1
-V. 154, p. 1593.			

Commonwealth & Southern Corp .- Weekly Output-The weekly kilowatt-hour output of electric energy of subsidiaries of this corporation adjusted to show general business conditions of territory served for the week ended Dec. 18, 1941, amounted to 206,907,293 as compared with 185,635,673 for the corresponding week in 1940, an increase of 21,271,620, or 11.46%.—V. 154, p. 1593.

Connecticut Light & Power Co. — Registers 336,088 Shares of Preferred Stock

A registration statement covering 336,088 shares of new cumulative preferred stock (no par) was filed with the Securities and Exchange Commission Dec. 24. The stock has a stated value of \$50 per share.

The shares registered comprise \$2.25 cumulative preferred stock in the amount of 136,088 shares to be offered to holders of the 68,044 presently outstanding 5½% preferred shares (\$100 par), on the basis of two shares of new stock in exchange for each old share, and \$2 cumulative preferred stock for sale to the public, consisting of 200,000

shares plus an additional amount equal to twice the number of 5½% preferred shares not exchanged for new stock.

Putnam & Co., Chas. W. Scranton & Co., and Estabrook & Co. are named in the registration statement as the principal underwriters.

The amount of net proceeds to the company and specific application thereof will be revealed in amendments to the registration statement. When the company announced approval of its financing program by stockholders earlier this month it stated that the new shares would be issued to retire all presently outstanding 5½% preferred stock and to obtain new funds for expansion of present facilities. The company plans to acquire or redeem all the 5½% preferred stock outstanding by March 1, 1942.

The \$2.25 preferred stock to be offered in exchange for the 5½% shares outstanding will be redeemable in whole or in part by lot at \$57.50 per share on or before March 1, 1947, and thereafter at \$56 per share, plus accrued dividends in each case. The redemption features of the \$2 preferred stock to be offered publicly will be supplied by amendment to the registration statement.—V. 154, p. 1491.

plied by amendment to the registration statement.-V. 154, p. 1491.

Consolidated Edison Co. of New York, Inc.—Output-The company announced production of the electric plants of its system for the week ending Dec. 21, 1941, amounting to 165,700,000 kwh. compared with 164,800,000 kwh. for the corresponding week of 1940, an increase of 0.5%.—V. 154, p. 1593.

Continental Oil Co. (Del.)—Debentures Called—

All of the outstanding 10-year 2¾% convertible debentures due Dec. 15, 1948, have been called for redemption as of Feb. 4, 1942, at 102 and interest. Payment will be made at the office of J. P. Morgan & Co. Incorporated, 23 Wall St., N. Y. City. The conversion privilege will terminate at the close of business Feb. 4, 1942, the redemption date. There are said to be outstanding at present \$21,071,600 of these debentures.

It was announced last November that it had been decided to call at least \$11,000,000 of the debentures.

To finance the above operation the company has arranged to borrow \$10,000,000 on five-year serial bank loans and the remainder will be taken from treasury cash.—V. 154, p. 1262.

Davega Stores Corp.—To Pay 40-Cent Dividend-

The directors on Dec. 22 declared a dividend of 40 cents per share on the common stock, payable Dec. 30 to holders of record Dec. 26. This compares with 30 cents per share paid on this issue on March 25, last; 25 cents on March 25, 1940; 15 cents on March 25, 1939, and 37½ cents on Jan. 3, 1938.—V. 154, p. 1190.

Denver & Rio Grande Western RR.—Missouri Pacific RR. Wants to Retain Voting Power After Reorganization

Counsel for the road on Dec. 16 asked the Interstate Commerce Commission to specify that any plan of reorganization for the Denver & Rio Grande Western RR. retain voting power in its common stock. H. H. Larimore, St. Louis. attorney for the Missouri Pacific, told the Commission as it began hearings on reorganization plans that the MOP, which now held 50% of the D. & R. G. W. common stock, should be afforded opportunity to purchase a similar amount under the reorganization if it contained voting power.

Two plans were before the Commission, submitted by Examiner M. S. Jameson, after hearings in Denver. One would call for consolidation of the D. R. G. W. with the Denver & Salt Lake Ry., the other would not.

without discussing merits of consolidation Mr. Larimore contended that a general distribution of reorganization securities among several railroads would result in lack of stabilization.

The Missouri Pacific, he told the Commission, had an \$11,500,000 investment in Denver & Rio Grande property, \$10,000,000 of it in commission.

Mon stock.

W. B. Campbell, Denver, attorney for the D. & R. G. W., argued in favor of a complete reappraisal of the road's physical property before acceptance of any reorganization plan.

George D. Gibson, Richmond, Va., attorney for insurance companies helding D. & R. G. W. securities, protested the plan to consolidate with the Denver & Salt Lake, contending that the amount to be paid for the latter line was exorbitant.

John B. Marsh of New York, speaking for trustees under one of the liens on the Rio Grande, urged that distribution of securities be made on a cash basis.—V. 154, p. 1376.

Easy Washing Machine Corp.—121/2-Cent Dividend-

The directors have declared a dividend of $12\frac{1}{2}$ cents per share on the class A and class B stocks, rayable Dec. 30 to holders of record Dec. 24.

class A and class B stocks, rayable Dec. 30 to holders of record Dec. 24. This compares with 25 cents plan of the 20, 1815, and with 12½ cents per share in each of the four quarters of 1940.

The New York Curb Exchenge has received notice from the corporation that the record date of Dec. 19 specified in its original notification is in error, and that said notification should have specified that the class B dividend will be paid to stockholders of record on Dec. 24 instead of Dec. 19. Accordingly, announcement of the Exchange declaring the class "B" stock "ex-dividend" as of Dec. 18, 1941, has been canceled. Based on the corrected record date of Dec. 24, the stock was quoted "ex-dividend" 12½c. per snare of Dec. 24, the stock was quoted "ex-dividend" 12½c. per snare of Dec. 23, and transactions in the stock to and including Dec. 22 were on a "dividend-on" basis.—V. 154, p. 243.

Ebasco Services, Inc.—Weekly Input—

For the week ended Dec. 18, 1941, the System inputs of client operating companies of Ebasco Services Inc., which are subsidiaries of American Power & Light Co., Electric Power & Light Corp. and National Power & Light Co., as compared with the corresponding week during 1940, were as follows:

	Inous	ands of Kill

Net income	\$452,343	\$363,13	4

Note—No provision has been considered necessary for excess profits tax, under the Excess Profits Tax Act of 1940, for the periods covered by this statement. The company has joined with others in a consolidated return for the year 1940 which indicated no tax liability and will similarly join in a consolidated return for the year 1941. It is estimated that the 1941 consolidated return will show no tax liability.— V. 153, p. 1129.

Erie RR.—Distribution of New Securities-

The reorganization managers announce that distribution of the new securities and payments of cash provided for in the company's plan of reorganization has been authorized by the U. S. District Court for the Northern District of Ohlo, Eastern Division.

Accordingly, New York & Erie RR. second and third mortgage bonds will be paid in cash, with interest to Dec. 26, at the New York office of the Erie RR.

of the Eric RR.

To carry out the specified exchanges, the following bonds should be deposited at the New York office of Chemical Bank & Trust Co.: Eric RR. prior lien 4s, 1996; general lien 4s, 1996; general mortgage convertable 4s (an series); 1.555; retunning and improvement 5s (both series); Eric & Jersey RR. 6s, 1955, and Genesee River RR. 6s, 1957. Deposits of first preferred, second preferred and common stock, or of certificates of deposit for such stock, should be made at the New York office of J. P. Morgan & Co. Incorporated.

Released From Bankruptcy-

Federal Judge Robert N. Wilkin on Dec. 20 signed an order releasing the line from bankruptcy at midnight.

Noting that Erie's financial overnauling was completed in slightly less than four years, the Judge termed this "an outstanding record of expedition for such cases," and continued:

expedition for such cases," and continued:

"We have seen an incapac tated unit of our national economy restored to a position of health and usefulness—and at a time of great need. This court now vests in the reorganized company the railroad and all its rolling stock, with the final war-time admonition, 'keep 'em rolling.'"

Judge Wilkin commented, "While it cannot be denied that the reorganization has entailed loss to certain investors, yet it must be conceded that such loss is much less than the total loss which all investors would have suffered had reorganization not been effected... If charges based on the general mortgage income bonds are included, the savings in the annual fixed charges amounts to about \$9,380,000. This has been accomplished mainly by termination of leases on other railroads, on certain coal and other properties which had proved unprofitable, and the acquisition of the property of the Cleveland & Mahoning Valley RR."

Acquisition of Properties Authorized-

The SEC on Dec. 13 authorized the acquisition by trustees of the Eric of control by purchase of stock of the New York, Lake Eric & Western Coal & RR. and of the West Clarion RR.

The sale to and purchase by the Eric kat. or its successor in reorganization, of the properties of the Buffalo, Bradford & Pittsburgh RR., Columbus & Eric RR., Eric & Wyoming Valley RR., Jefferson RR., Moosic Mountain & Carbondale RR., New York, Lake Eric & Western Coal & RR., Tioga RR. and the West Clarion RR. was also approved and authorized.—V. 154, p. 1630.

Florence Stove Co.—\$1.50 Year-End Dividend—Pays Shares of Preferred Stock—

The directors have declared a year-end dividend of \$1.50 per share on the common stock, payable Dec. 30 to holders of record Dec. 22. This compares with 50 cents per share paid on March 31, June 30 and Sept. 30, last; \$1.50 on Dec. 31, 1940, and 50 cents in each of the three preceding quarters.

The directors on Dec. 15 voted to pay Christmas bonuses of \$60 to employees of more than a year's service and \$30 to those employed for five months. More than 2,000 employees in the company's plants at Gardner, Mass., and at Kankakee, Ill., will participate—V. 154, p. 907.

offering of \$4,000,000 3% sinking fund debentures due Dec. 1, 1956 was made Dec. 24 by Kidder, Peabody & Co. and Mitchum, Tully & Co. as underwriters. The Debentures were priced at 100 plus interest. The issue has been oversubscribed.

Of the net proceeds to be derived by the company from the sale of the debentures, \$3,000,000 is to be applied to the repayment of bank loans, \$2,100,000 of which were incurred for the redemption on Nov. 26, 1941, of the 4\%\(\phi\) cumulative convertible preferred stock of the company. The balance of the net proceeds will be added to the company's general funds and used from time to time for corporate purposes. Upon completion of the present financing, the outstanding funded debt of the company will consist solely of the \$4,000,000 of 3\%\(\phi\) sinking fund debentures due 1956 now offered, while outstanding share capitalization will consist of 426,676 shares (\$10 par) common stock.—V. 154, p. 1595.

Harris, Hall & Co. — 75-Cent Common Dividend— Preferred Stockholders Receive \$2 Extra—

Preferred Stockholders Receive \$2 Extra—
The directors recently declared a dividend of 75 cents per share on the common stock and a dividend of \$2 per share on the preferred stock, both payable Dec. 27 to holders of record Dec. 20. The last dividend on the common stock, amounting to \$2 per share, was paid on Dec. 27, 1940, and the last regular quarterly dividend of \$1.25 on the preferred stock was paid on Oct. 1, 1941. Total payments on the preferred will amount to \$7 in 1941, the same as in 1940.
The usual quarterly dividend of \$1.25 per share on the preferred stock was also declared, payable Jan. 2 to holders of record Dec. 20.
The preferred stock is entitled to cumulative dividends at the rate of \$5 annually, but whenever a dividend is paid on the common stock it is entitled to an additional \$2.—V. 150, p. 3976.

Hilton-Davis Chemical Co.-Financing Completed-Company has completed arrangements for a 12-year mortgage loan for \$850,000 at 4% from The Equitable Life Assurance Society of the U.S. (the present 5% loan from the Equitable to be retired) and a 5-year term loan for \$250.000 at 2\% for two years and 3\% thereafter, in which the First National Bank of Cincinnati, the Marine Midland Trust Co. of New York, and the Continental Bank and Trust Co. of New York are equal participants. The loans were negotiated through Distributors Group,

The stockholders of company approved the financing on Sept. 9,

The loan made to the company by the banks is repayable \$50.000 at the end of the first year and the balance in 16 equal quarterly installments.

Installments.

The loan made to the company by Equitable is secured by a first mortgage upon the property of the company located on Langdon Farm Road, Cinn., Hamilton County, Ohio, consisting of approximately 72½ acres of land and the hulldings, machinery, fixtures, equipment (except automobiles and trucks) tools and furniture and by a chattel mort-

Company has agreed that principal shall be repaid to the Equitable annually at follows: First year, \$30,000; second year, \$35,000; third year, \$40,000; fourth year, \$45,000; fifth year, \$50,000; sixth year to the twelfth year, \$60,000.

Company further agrees that it will further amortize the loan of \$850,000 from the Equitable to the extent of 40% of net income, which (net income) for this purpose shall be defined as the net income remaining after the payment of all proper accounting charges, including interest, Federal taxes, amortization of all funded debt, preferred dividends at their cumulative rate and common dividends not to exceed 80 cents per share. Excess amortization so paid is to be credited against final amortization giving the company the right to call for the use of these credits against compulsory amortization in any year in which compulsory amortization has not been earned.

The purpose of the company in incurring these loans, aggregating \$1,100,000 is to refund the previous mortgage authorized by the stockholders of the company in the amount of \$450,000 at 5%, the unpaid balance of which amounts to \$397,500. Up to \$200,000 of the balance of the proceeds of these loans may be expended for fixed assets. The balance, plus any portion of the \$200,000 on to used for fixed assets, will be used to refund a portion of current borrowings and to provide additional working capital.—V. 154, p. 334.

Loew's, Inc.-Arranges \$18,000,000 Financing-Company completed Dec. 23 arrangements for the sale of \$13,000,000 3% 15-year debentures to nine insurance companies and for the borrowing of \$5,000,000 in the form of a $2\frac{1}{4}\%$ five-year loan from First National Bank of Boston. The debentures will be sold to Massachusetts Mutual Life Insurance Co., John Hancack Mutual Life Insurance Co., Sun Life Assurance Co., Penn Mutual Life Insurance Co., New England Mutual Life Insurance Co., State Mutual Life Assurance Co., Union Central Life Insurance Co., Continental Casualty Co. and Continental Assurance Co. tinental Assurance Co.

Proceeds of the financing will be used to retire \$10,500,000 outstanding 3½% sinking fund debentures, due in 1946, and 136,022 shares of no par \$6.50 cumulative dividend preferred stock, being the entire amount of both issues. The company will utilize about \$7,000,000 of its large cash reserves in refunding these securities.

No amortization is provided for over the first five years of the 3% debentures. The rate of amortization over the following 10 years will be sufficient to retire 75% of the debentures prior to maturity.

The bank loan matures serially at the rate of \$1,000,000 a year for the next five years.

The bank loan matures serially at the rate of \$1,000,000 a year for the next five years.

The existing 3½% debentures will be called for redemption Feb. 16, 1942, at 102 and accrued int., or \$10,710,000, and the preferred shares will be called for redemption Feb. 15, 1942, at 105 and int., or \$14,-282,310, representing a total outlay of \$24,992,310.—V. 154, p. 1494.

Lowell Bleachery, Inc.—Annual Report—

Lester Watson, President states: Lester Watson, President states:
Since the last meeting of stockholders four distributions aggregating \$4.50 per share have been made, namely 50 cents per share on Jan. 11 and April 14, respectively; \$1 per share on June 25, and \$2 per share on Sept. 26, 1941. These distributions have been charged against

on Sept. 25, 1941. These distributions have been capital surplus.

The St. Louis Bleachery for the 12 months ending Sept. 30 showed net income, after depreciation charges, of \$202,887: This amount compares with \$90,071 in 1940 and \$124,954 in 1939. After deducting administrative expenses and reserves for Federal and Missouri income taxes, and after adding miscellaneous income, the net earnings of the company were \$138,964, or approximately \$5.67 per share.

New York Fire Protection Co .- Tenders-

The Chase National Bank of the City of New York, successor trustee, will until 12 o'clock noon, Jan. 6, 1942, receive bids for the sale to it of \$1,000 of first mortgage 4% gold bonds dated Aug. 1, 1905.—V. 152, p. 3033

New York Telephone Co.-Dividend Rate Reduced-

New York Telephone Co.—Dividend Rate Reduced—
The directors on Dec. 23 declared a fourth-quarter common stock dividend of \$1.50 per share, payable on Dec. 31 to holders of record as of that date. The total dividends declared for the year amount to \$7.50 per share as compared with \$7.00 for the year 1940.

The action of the directors was 'n keeping with a reduction in net profits, the principal factors of which were higher taxes and increased wages, the company's announcement said.

From 1910 to and including Sept. 30, 1941, the company paid quarterly dividends of \$2 per shar's, or at the rate of \$8 per share per annum. All of the common stock is owned by the American Telephone & Telegraph Co.—V. 154, p. 530.

Northern States Power Co. (Del.)-Preferred Div.-The directors have declared a regular quarterly dividend of \$1.75 per share on the 7% cumulative preferred stock and a regular quarterly dividend of \$1.50 on the 6% cumulative preferred stock, both payable Jan. 20 to holders of record Dec. 31. Like amounts were paid in each of the four quarters in 1941. Arrearages total \$2.62\forall on the 6% preferred and \$3.06\forall on the 7% preferred stock.

Weekly Output-Electric output of the Northern States Power Co. system for the week ended Dec. 20, 1941, totaled 37,215,000 kwh., as compared with 34.225,000 kwh. for the corresponding week last year, an increase of 8.7%.—V. 154, p. 1599.

New York New Haven & Hartford RR.-Court Rejects ICC Reorganization Plan - Old Colony and Boston & Providence Roads Discussed-

Judge Carroll C. Hincks of the U. S. District Court at New Haven on Dec. 9 issued an opinion on the plan of reorganization of the road as submitted by the Interstate Commerce Commission. When the opinion was handed down the court issued a brief summary of the opinion which covered 150 typewritten pages.

opinion was handed down the court issued a brief summary of the opinion which covered 150 typewritten pages.

Following is a more comprehensive summary of the document covering the important phases of the opinion:

Old Colony RR. Discussed—The first subject discussed is the proposal of the ICC that the New Haven be required to acquire the properties of the Old Colony RR. After discussing the proposed price and the cancellation of mutual claims, the Judge says:

"We start with the fact that on the basis of past earnings the Old Colony properties are productive only of deficits. As the Commission observed, these deficits were about \$2,500,000 in 1938 and over \$1,500,000 in 1939, and there is no evidence of operations without deficit at any earlier period.

"Thus we come to the underlying question: Assuming the existence of the power, can the court now approve a plan which compels the permanent investment by the New Haven contemplated for the acquisition of the Old Colony; that is to say, an investment of upwards of \$22,000,000 for an operating property heretofore productive only of deficits? If so, the approval must rest upon a factor or factors which offset or outweigh the record of operating deficits."

The court goes on to say that he doubts if the Commission considered the improvement of traffic arising out of the defense program as a factor and that he can find no evidence to justify that the improvement in revenue is sufficiently permanent to justify a capital investment of large dimensions. He discusses the present and possible future economies in the separation of the Old Colony and the cooperation of Massachusetts authorities. He states:

"And the history of these proceedings suggests that it was not until the public in eastern Massachusetts came to realize that its right to burdensome service and its power to impose taxes was subject to the practical limitation resulting from the dwindling state of Old Colony resources that the couperation which resulted in the economies listed above arose."

In conclus

burdensome service and its power to impose taxes was subject to the practical limitation resulting from the dwindling state of Old Colony resources that the cooperation which resulted in the economies listed above arose."

In conclusion the court states:

'I should consider a management improvident which paid \$12,-000,000 for a property producing a deficit of upwards of \$600,000, . . . and in the absence of convincing evidence that the deficits had been or would be permanently eliminated or were more than offset by other factors . . I should not feel justified in imposing an involuntary merger upon the parties upon the terms imposed."

Compromise Committee—Judge Hincks nowever does recommend that the report of the compromise committee which he appointed should receive consideration, and the report is annexed as an appendix to the court's opinion. This committee proposed (1) setting a limit to the fixed charges that the reorganized New Haven should pay in connection with the bonds of the Boston Terminal Co.; (2) assuring the reorganized New Haven against any doubt as to the power of the Commission and the court to limit passenger losses of Old Colony lines; (3) providing that passenger service on the Old Colony might be discontinued if passenger losses on those lines exceeded \$850,000 for any 12 months' period during the first two years and after the consummation of the plan and \$250,000 for any 12 months' period thereafter.

Boston & Providence—Judge Hincks disapproved of the proposal of the Commission for the merger of the reorganized New Haven with the Boston & Providence As a basis for his opinion the so-called segregation formula is accepted as fair and equitable as circumstances permitted. After discussing the valuation of the Boston & Providence on an earnings basis, the court says:

"The Commission gives some discussion to the situation which would result if the Boston & Providence should be abandoned. Granted that the Boston & Providence should be abandoned. Granted that the Boston & Pro

In conclusion he states:

In conclusion he states:

'On the present record I cannot find that the proposed price can be approved on the basis of abandonment value because there is no sufficient proof either of abandonment value or of market value.

'There will be many who object to the use of market value even as a limiting factor on the ground that it is not 'realistic' to view a splendid, seasoned railroad property like the Boston & Providence as an abandoned property and the fit subject of liquidation.

'Why should the New Haven pay a price predicted upon a contingency so remote that its fulfillment deserves no consideration?

'What then have we left? A magnificent piece of railroad property, yes. But a property productive of deficits which at least for the normal year can be converted into constructive earnings only on the theory of the 'earnings' which it 'contributes' to the New Haven.

"If any sound basis . . . can be found upon which the New Haven could properly assume the hazard of Boston & Providence deficits, I wish that a merger could be accomplished by negotiation, as distinguished from mandatory decree."

The above are the more important issues discussed by the court in his control of the court in the court of the c

his opinion.

his opinion.

Approves Two Mergers—He approves the merger of the Hartford & Connecticut Western and the Providence Warren & Bristol with the reorganized New Haven.

He sustains the objection of the Railroad Credit Corporation that its notes are not receiving treatment equivalent to its overdue claim.

As to the Reconstruction Finance Corporation, which received treatment similar to the Railroad Credit Corporation, the court finds in view of the fact that the company did not object he assumes it has consented to the plan.

As to the claims of the Rhode Island Hospital National Bank, the Merchants National Bank of Boston, and the Bank of Manhattan, the court concludes that the losses resulting from the inadequacy of their collateral, though regrettable, are a form of damage without injury.

"After all, the losses, though uncomfortably real to the banks, have been losses of fictitious values, as is demonstrated by the underlying record of fact."

record of fact. The court sustains the claim of the Housatonic and disapproves of

The court sustains the claim of the Housatonic and disapproves of the plan of the Commission for substituting bonds with an extended maturity carrying a lower interest rate.

Air Line Road—As to the Air Line Road the court finds that the treatment proposed cannot be justified, since the Air Line interests instead of supporting the proposed treatment have interposed objections. The court finds that the treatment of the Air Line by the Commission was too favorable and is disapproved.

The court approves the treatment of Harlem River & Port Chester P.P.

ter RR.

On the record the court does not find that the treatment of the Central New England was fair.

The court similarly held as to the New England and that the road The court similarly held should have better terms.

With reference to a reorganization committee which would seek to carry out the provisions of the plan, the court does not approve of the naming of trustees either by the debtor or the insurance group or the savings banks group. He consludes that it would be wiser to have trustees appointed by the concurrent orders of the Commission and

Silent on Shareholders—The court makes no finding with reference to the existence of any equity for the shareholders. His silence would indicate that he accepts the finding of the Commission that there is

In conclusion the court treats of Federal taxes and the effective date of reorganization

"In one other respect I have had some difficulty in judging the feasibility of the plan. Nothing has been said with respect to the effect of the plan on the liability of the reorganized debtor for Federal taxes. . . . I think the Judge, before approving the plan, should have affirmative assurance that its feasibility is not jeopardized by liability for taxes which may accrue upon its consummation. The problem seems somewhat dependent upon the effective date of the plan. Doubtless any future plan will set a new effective date. In my view, the date selected should be as close as feasible to that on which the plan is reported to the court."

Interest Aggregating \$15,000,000 Ordered Paid by Court-

Judge Hincks in the U. S. District Court at New Haven, Dec. 19, authorized the trustees to pay interest aggregating \$15,000,000 on certain bonds and debentures.

Funds will be available on and after Dec. 29, 1941, for the payment of interest for the periods and upon the issues shown below, to holders of record Dec. 19, 1941:

Loew's, Inc.—Arranges \$18,000,000 Financing—Company completed Dec. 23 arrangements for the sale of

\$13,000,000 3% 15-year debentures to nine insurance companies and for the borrowing of \$5,000,000 in the form of a 21/4% five-year loan from First National Bank of Boston. The debentures will be sold to Massachusetts Mutual Life Insurance Co., John Hancack Mutual Life Insurance Co., Sun Life Assurance Co., Penn Mutual Life Insurance Co., New England Mutual Life Insurance Co., State Mutual Life Assurance Co., Union Central Life Insurance Co., Continental Casualty Co. and Continental Assurance Co. tinental Assurance Co.

Proceeds of the financing will be used to retire \$10,500,000 outstanding 3½% sinking fund debentures, due in 1946, and 136,022 shares of no par \$6.50 cumulative dividend preferred stock, being the entire amount of both issues. The company will utilize about \$7,000,000 of its large cash reserves in refunding these securities.

No amortization is provided for over the first five years of the 3% debentures. The rate of amortization over the following 10 years will be sufficient to retire 75% of the debentures prior to maturity.

The bank loan matures serially at the rate of \$1,000,000 a year for the next five years.

The bank 19kii manufectures will be called for redemption Feb. 16, 1942, at 102 and accrued int., or \$10,710,000, and the preferred shares will be called for redemption Feb. 15, 1942, at 105 and int., or \$14,-282,310, representing a total outlay of \$24,992,310.—V. 154, p. 1494.

Lowell Bleachery, Inc.—Annual Report—

Lester Watson, President states:

Since the last meeting of stockholders four distributions aggregating \$4.50 per share have been made, namely 50 cents per share on Jan. 11 and April 14, respectively; \$1 per share on June 25, and \$2 per share on Sept. 25, 1941. These distributions have been charged against capital surplus.

The St. Louis Bleachery for the 12 months ending Sept. 30 showed net income, after depreciation charges, of \$202,887: This amount compares with \$90,071 in 1940 and \$124,954 in 1939. After deducting administrative expenses and reserves for Pederal and Missouri income taxes, and after adding miscellaneous income, the net earnings of the company were \$138,964, or approximately \$5.67 per share.

New York Fire Protection Co.-Tenders-

The Chase National Bank of the City of New York, successor trustee, will until 12 o'clock noon, Jan. 6, 1942, receive bids for the sale to it of \$1,000 of first mortgage 4% gold bonds dated Aug. 1, 1905.—V. 152, p. 3033.

New York Telephone Co .- Dividend Rate Reduced-

The directors on Dec. 23 declared a fourth-quarter common stock dividend of \$1.50 per share, payable on Dec. 31 to holders of record as of that date. The total dividends declared for the year amount to \$7.50 per share as compared with \$8.00 for the year 1940.

The action of the directors was in keeping with a reduction in net profits, the principal factors of which were higher taxes and increased wages, the company's announcement said.

From 1910 to and including Sept. 30, 1941, the company paid quarterly dividends of \$2 per share, or at the rate of \$8 per share per annum. All of the common stock is owned by the American Telephone & Telegraph Co.—V. 154, p. 1530.

Northern States Power Co. (Del.)-Preferred Div.-

The directors have declared a regular quarterly dividend of \$1.75 per share on the 7% cumulative preferred stock and a regular quarterly dividend of \$1.50 on the 6% cumulative preferred stock, both payable Jan. 20 to holders of record Dec. 31. Like amounts were paid in each of the four quarters in 1941. Arrearages total \$2.62\% on the 6% preferred and \$3.06\% on the 7\% preferred stock.

Weekly Output-Electric output of the Northern States Power Co. system for the week ended Dec. 20, 1941, totaled 37,215,000 kwh., as compared with 34.225,000 kwh. for the corresponding week last year, an increase of 8.7%.—V. 154, p. 1599.

New York New Haven & Hartford RR.-Court Rejects ICC Reorganization Plan - Old Colony and Boston & Providence Roads Discussed-

Judge Carroll C. Hincks of the U. S. District Court at New Haven on Dec. 9 issued an opinion on the plan of reorganization of the road as submitted by the Interstate Commerce Commission. When the opinion was handed down the court issued a brief summary of the opinion which covered 150 typewritten pages.

opinion was handed down the court issued a brief summary of the opinion which covered 150 typewritten pages.

Following is a more comprehensive summary of the document covering the important phases of the opinion:

Old Colony RR. Discussed—The first subject discussed is the proposal of the ICC that the New Haven be required to acquire the properties of the Old Colony RR. After discussing the proposed price and the cancellation of mutual claims, the Judge says:

"We start with the fact that on the basis of past earnings the Old Colony properties are productive only of deficits. As the Commission observed, these deficits were about \$2,500,000 in 1938 and over \$1,500,000 in 1939, and there is no evidence of operations without deficit at any earlier period.

"Thus we come to the underlying question: Assuming the existence of the power, can the court now approve a plan which compels the permanent investment by the New Haven contemplated for the acquisition of the Old Colony; that is to say, an investment of upwards of \$22,000,000 for an operating property heretofore productive only of deficits? If so, the approval must rest upon a factor or factors which offset or outweigh the record of operating deficits."

The court goes on to say that he doubts if the Commission considered the improvement of traffic arising out of the defense program as a factor and that he can find no evidence to justify a capital investment of large dimensions. He discusses the present and possible future economies in the separation of the Old Colony and the cooperation of Massachusetts authorities. He states:

"And the history of these proceedings suggests that it was not until the public in eastern Massachusetts came to realize that its right to burdensome service and its power to impose taxes was subject to the practical limitation resulting from the dwindling state of Old Colony resources that the cooperation which resulted in the economies listed above arose."

In conclusion the court states:

In conclusion he states:

'On the present record I cannot find that the proposed price can be approved on the basis of abandonment value because there is no sufficient proof either of abandonment value or of market value.

'There will be many who object to the use of market value even as a limiting factor on the ground that it is not 'realistic' to view a splendid, seasoned railroad property like the Boston & Providence as an abandoned property and the fit subject of liquidation.

'Why should the New Haven pay a price predicted upon a contingency so remote that its fulfillment deserves no consideration?

'What then have we left? A magnificent piece of railroad property, yes. But a property productive of deficits which at least for the normal year can be converted into constructive earnings only on the theory of the 'earnings' which it 'contributes' to the New Haven. In conclusion he states:

"If any sound basis . . . can be found upon which the New Haven could properly assume the hazard of Boston & Providence deficits, I wish that a merger could be accomplished by negotiation, as distinguished from mandatory decree."

The above are the more important issues discussed by the court in the court in the court of the cou his opinion.

The above are the more important issues discussed by the court in his opinion.

Approves Two Mergers—He approves the merger of the Hartford & Connecticut Western and the Providence Warren & Bristol with the reorganized New Haven.

He sustains the objection of the Railroad Credit Corporation that its notes are not receiving treatment equivalent to its overdue claim.

As to the Reconstruction Finance Corporation, which received treatment similar to the Railroad Credit Corporation, the court finds in view of the fact that the company did not object he assumes it has consented to the plan.

As to the claims of the Rhode Island Hospital National Bank, the Merchants National Bank of Boston, and the Bank of Manhattan, the court concludes that the losses resulting from the inadequacy of their collateral, though regrettable, are a form of damage without injury.

"After all, the losses, though uncomfortably real to the banks, have been losses of fictitious values, as is demonstrated by the underlying record of fact."

The court sustains the claim of the Housatonic and disapproves of

The court sustains the claim of the Housatonic and disapproves the plan of the Commission for substituting bonds with an extended

the plan of the Commission for substituting bonds with an extended maturity carrying a lower interest rate.

Air Line Road—As to the Air Line Road the court finds that the treatment proposed cannot be justified, since the Air Line interests instead of supporting the proposed treatment have interposed objections. The court finds that the treatment of the Air Line by the Commission was too favorable and is disapproved.

The court approves the treatment of Harlem River & Port Chester RR.

on the record the court does not find that the treatment of the Central New England was fair.

The court similarly held as to the New England and that the road should have better terms.

With reference to a reorganization committee which would seek to carry out the provisions of the plan, the court does not approve of the naming of trustees either by the debtor or the insurance group or the savings banks group. He consludes that it would be wiser to have trustees appointed by the concurrent orders of the Commission and the court

Silent on Shareholders—The court makes no finding with reference to the existence of any equity for the shareholders. His silence would indicate that he accepts the finding of the Commission that there is no equity.

In conclusion the court treats of Federal taxes and the effective date of reorganization

"In one other respect I have had some difficulty in judging the feasibility of the plan. Nothing has been said with respect to the effect of the plan on the liability of the reorganized debtor for Federal taxes. . . . I think the Judge, before approving the plan, should have affirmative assurance that its feasibility is not jeopardized by liability for taxes which may accrue upon its consummation. The problem seems somewhat dependent upon the effective date of the plan. Doubtless any future plan will set a new effective date. In my view, the date selected should be as close as feasible to that on which the plan is reported to the court."

Interest Aggregating \$15,000,000 Ordered Paid by Court-

Judge Hincks in the U. S. District Court at New Haven, Dec. 19,

authorized the trustees to pay interest aggregating \$15,000,000 on certain bonds and debentures.

Funds will be available on and after Dec. 29, 1941, for the payment of interest for the periods and upon the issues shown below, to holders of record Dec. 19, 1941:

Pennroad Corp.—Stockholders Win Suit-See Pennsylvania RR.—V. 154, p. 1150.

Pennsylvania RR.—Liable for Pennroad Loss—
The company was held liable Dec. 20 by Federal Judge George A.
Welsh at Philadelphia for losses of the Pennroad Corporation in a
decision on a suit by Pennroad stockholders who seek to recover \$95,000,000 from the railroad.
Two stockholders' groups, which filed the suit two years ago, charged
the losses resulted from investments by the Pennroad Corp. of more
than \$95,000,000 in several eastern railroads, in a freight forwarding
company and in the railroad's efforts to dominate the railroad situa-

company and in the railroad's efforts to dominate the railroad situation on the eastern seaboard in the early 1930s

tion on the eastern seaboard in the early 1930s.

The stockholders' suit charged that the Pennroad officers and directors at the time the action was filed used their interlocking positions in the Pennsylvania RR. to invest Pennroad funds. Most of the officers and directors, some still living and some dead, held posi-

the officers and directors, some still living and some dead, held positions with the railroad.

Judge Welsh ordered an audit be made to determine the exact loss.

In the only specific finding of loss, Judge Welsh held that the railroad was responsible for upwards of \$4,000,000 in the National Freight Forwarding Co.. which was organized by the Pennroad directors in March, 1929. In addition, he also ruled the railroad liable for all profits made from the freight firm while it was in existence for four years.

The decision excuerated nine officers and directors of Pennroad of The decision excnerated nine officers and directors of Pennroad of personal liability for the losses for two reasons: 1) While they made "improvident" investments of Pennroad funds for the benefit of the railroad, they did not profit personally and were innocent of "moral turpitude." (2) And that recovery against the officers and directors by Pennroad stockholders is barred by the statute of limitations.

Judge Welsh declared he was not holding the railroad liable for the full \$95,000.000 claimed by the stockholders but only for "excess" prices the Pennroad directors paid for the stocks of other railroads.

Plans Appeal In Pennroad Suit-Counsel for the Pennsylvania RR. said Dec. 22 that the company would appeal the decision of Federal District Judge George A. Welsh. He was unable to say whether the appeal would be filed before or after the accounting which Judge Welsh decreed the railroad must render to Pennroad stockholders.—V. 154, p. 1599. Philadelphia Co.-20-Cent Common Dividend-

The directors on Dec. 19 declared a quarterly dividend of 20 cents per share on the common stock, payable Jan. 26 to holders of record Dec. 31. This compares with 10 cents per share on April 25. July 25 and Oct. 25, last; 15 cents on Jan. 15, 1941; 10 cents in each of the three preceding quarters, and 25 cents on Jan. 25, 1940.—V. 154, p. 1599.

Philadelphia Electric Co.-Order Granting Application-

The SEC on Dec. 19 issued an order permitting to become effective company's application and declarations regarding the following transactions:

(1) The issue, as of Feb. 1, 1942, of not exceeding 280,058 shares

(1) The issue, as of Feb. 1, 1942, of not exceeding 280,058 shares of 4.40% preferred stock (cumulative, par \$100 per share) to be offered in exchange, share for share, to the holders of the presently outstanding 280,058 shares of \$5 dividend preferred stock (cumulative, no par); and the issue of interim receipts to those holders of the presently outstanding preferred stock who accept the exchange offer, said interim receipts to be exchangeable for the new preferred stock, conditioned upon the requisite authorization of said preferred stock by stockholders at a special meeting to be held on Jan. 31, 1942; said interim receipts, in the event that the new preferred stock is not authorized will entitle the holders thereof to \$110 for each share represented by such receipts, plus an amount of \$1.25 per share in lieu of dividends from Nov. 1, 1941;

(2) The exemption of said issue and exchange from competitive bidding;

(2) The exemption of said issue and exchange from competitive bidding;
(3) The redemption, on Feb. 1, 1942, of such shares of its presently outstanding 280,058 shares of \$5 dividend preferred stock as are not exchanged pursuant to said exchange offer;
(4) The incidental alteration of voting and other rights of the common stock of Philadelphia Electric Co.—V. 154, p. 1383.

Philadelphia Electric Power Co.—Bonds Called—

A total of \$227,000 first mortgage gold bonds, 5½% series, due 1972, have been called for redemption on Feb. 1, 1942, for sinking fund purposes, at 105½ and int. Payment will be made at the Fidelity-Philadelphia Trust Co., successor trustee, 135 South Broad St., Philadelphia Trust Co.

Certain of the first mortgage bonds, previously called for redemption on Feb. 1 and Aug. 1, 1941, have not yet been presented for payment.—V. 152, p. 4135.

Philadelphia & Western Ry.-Deadline Set For Plan-Philadelphia & Western Ry.—Deadline Set For Plan—Judge William H. Karkpatrick in U. S. District Court at delphia, Dec. 18, set Feb. 16, 1942, as the deadline for filing of a new plan of reorganization for the company, the affairs of which have been in the hands of the courts since July 3, 1934, when company filed for reorganization under section 77B of the Bankruptcy Act.

A plan for reorganization of the company was filed with the court in July, 1935, and was later amended. This modified plan was rejected last July by the Pennsylvania P. U. Commission, which charged that it was "neither fair nor in the public interest."

The court's latest action permits the company, the indenture trustee or any stockholder or creditor, except those whose claims have arisen since July, 1934, to present any plan or proposals for reorganization of the company—V. 154, p. 1383.

Poli-New England Theatres, Inc.—Tenders—

The New York Trust Co., corporate trustee, will until the close of business Jan. 19, 1942, receive bids for the sale to it of first mortgage bonds due Nov. 15, 1958, to an amount sufficient to exhaust the sum of \$118,158.22 at prices not in excess of the redemption price thereof. Bonds, the tender of which is accepted, must be surrendered to the trustee on or before Jan. 26.—V. 154, p. 249.

Prentice-Hall, Inc.—25-Cent Extra Dividend-

The company on Dec. 26 paid an extra dividend of 25 cents per share on the common and participating preferred stocks to holders of record Dec. 17. The last regular quarterly dividends of 70 cents on the common stock and of 75 cents on the preferred stock were paid on Dec. 1, last.—V. 146, p. 1256.

Plymouth Cordage Co.—Pays Extra Dividend and Increases Quarterly Rate—Wage Dividend — Changes in Personnel-

Personnel—

The company on Dec. 26 paid an extra dividend of \$2 per share to holders of capital stock and of employees' stock of record Dec. 3. A quarterly dividend of \$1.50 per share has also been declared on both issues, payable Jan. 20 to holders of record Dec. 31.

Previously the company paid regular quarterly dividends of \$1.25 per share, and on Dec. 27, 1940, paid an extra of \$1 per share.

There was paid on Dec. 23, 1941, to all employees of the company extra compensation amounting to 4% of their respective earnings during the fiscal year ended Sept. 30, 1941. A year ago extra compensation of 1% was paid.

August P. Loring Jr., formerly President, has been elected Chairman of the Board, and Ellis W. Brewster, formerly Treasurer and General Manager, has been elected President and Treasurer. Charles McKinnon, formerly Vice-President, becomes First Vice-President and Clerk. Three new Vice-Presidents were elected—Edwin G. Roos, Charles W. Leach and William P. Libby, and two Vice-Presidents were reelected—Francis R. Clark and Francis C. Holmes.

As of Sept. 30, 1941, the company had current assets of \$11,816.474.

Clark and Francis C. Holmes.

As of Sept. 30, 1941, the company had current assets of \$11,816,474, including cash, United States and Canadian Government bonds of \$4,540,519. Current liabilities totaled \$2,128,555, making net working capital \$9,687,919. This amount represented an increase of \$1,103,188 over the working capital of \$8,584,731 at the end of the previous

an interest rate lower than the debenture interest rate and giving the company the privilege of retiring the loan at any time at a reasonable premium. As a result of the refinancing interest charges were reduced and company secured the additional advantage of a satisfactory loan maturing 1/10 each year over the next ten years.

During the past year directors adopted a peasion or annuity plan, and made arrangements with the John Hancock Mutual Life Insurance Co. that will provide for annuities for employees upon the retirement age of 65 years. The cost of this plan is paid in part by the employee and a larger part by the company. To provide for those who have been in its employ over a long period of years, company has purchased additional annuities for them based on past service, the entire cost of which will be borne by the company. Employées have had a group life insurance plan since 1925, and they also receive vacations with pay each year, after one year's service.

During the year an amount of \$1,330,000 was spent on additions and improvements to the plant.

Reo Motors, Inc.—Listing of VTC-

*Due serially from May 1, 1943 to May 1, 1951 .- V. 154, p. 661.

The New York Stock Exchange has authorized the listing of voting trust certificates representing 500,000 shares of capital stock (\$1 par) in substitution for outstanding voting trust certificates.

The voting trustees at a meeting held on Aug. 5, 1941, adopted an amendment to the articles of incorporation providing for an authorized capital stock of 500,000 shares in place of 2,000,000 shares which was formerly authorized. New Voting trust certificates will be exchanged with the holders of the present voting trust certificates and no new consideration will be received. The reduction in capital stock liability resulting from the amendment will be added to the capital surplus account.

account.

The original basis for the voting trust provided by the plan of reorganization of the Reo Motor Car Co., the predecessor of Reo Motors, Inc., and the matter of providing a management satisfactory to the Reconstruction Finance Corporation was a condition of a loan of \$2,000,000 which was made to the company. The voting trust was to continue until the loan had been fully paid, but not latter than Oct. 1, 1949. There is still a balance of approximately \$195,000 unpaid on this loan, so that the voting trust must be continued.

National Defense Program and Priorities

For the nine months ending Sept. 30, 1941, approximately 9% of the company's sales were to the U. S. Government and directly connected with the National Defense Program. Approximately 18% of such sales were to customers who have defense orders. Foreign sales of trucks and parts approximated 10% of total business and about one-half of this business was British and Canadian. Production will be commenced on a major item of defense material in Dec., 1941, and, on the basis of truck business for 1942 remaining at the same level as 1941, it is anticipated that approximately 55% of total sales will be for national defense. Substantially all of the company's defense orders are covered by A-1-A priority ratings, with a few covered by A-1-D and A-1-F priority ratings assigned by the Office of Production Management.

Company is not able to predict the extent to which its business may be affected by further developments in the National Defense Program and by governmental regulations related thereto, including establishment of priorities in materials and products, but the company believes that it will continue to occupy an important position in the National Defense Program.

Since March 22, 1940, company has disposed of a number of its surplus properties, including service stations in Detroit and Lansing as well as certain properties which were once used for production. This disposition was in accordance with the Plan of Reorganization and the proceeds have been largely used in paying off the RFC loan. The latest sale covered three buildings containing over 1,090,000 square feet of floor space, which were sold to Defense Plant Corporation and are to be used for the manufacture of propellers and airplane parts. In addition other surplus space has been rented. Various Pederal agencies now occupy approximately 160,000 square feet of floor space is now being used in manufacturing operations.

Republic Aviation Corp.—Bonus To Employees—

Distribution of a profit-sharing bonus of 3% of a year's salary will be made to all employees of this corporation on Dec. 29, according to W. Wallace Kellett, Chairman. Mr. Kellett said all personnel of the company who have been with the organization for the full year prior to Nov. 30 will receive amounts considerably in excess of a week's base wages, while those employed for shorter periods will get proportionate amounts.—V. 154, p. 260.

Revere Copper & Brass, Inc.—New Records Set-

Speed in producing replacement parts for damaged ships may be an important part of the defense effort, C. Donald Dallas, President, said on Dec. 15 in announcing two new plant records.

"We received recently from the Navy," he said, "a rush order for 7,500 cupronickel condenser tubes for a damaged ship. Ordinarily the ship would have been held waiting in port from three to four weeks. The tubes were finished and ready for inspection in three days. The ship will be ready to sail within a week of the orginal order.

"On a 1,000-ton lease-lend order for strip cartridge brass, we were ready for Government inspection and first shipments in three days."

—V. 154, p. 1531.

Richmond, Fredericksburg & Potomac RR. - Extra Dividend-

The directors recently declared an extra dividend of \$2 per share on the common stock, in addition to the regular dividend of \$3 per share, both payable Dec. 24 to holders of record Dec. 20. A distribution of \$3 was also paid on this issue on June 28, last, as against regular semi-annual dividends of \$2 per share previously.

Total payments this year on the common stock amount to \$8 per share, as against \$4 in 1940.—V. 154. p. 1271.

Southern Railway-Liquidates Bank Loans-

The company on Dec. 15 liquidated its outstanding bank loans by the pre-payment of notes for \$1,500,000 due Feb. 15 and May 15, 1942. The payment was the balance of a loan of \$10,000,000 negotiated last May with proceeds applied to the elimination of the company's debt to the Reconstruction Finance Corporation. At their peak, loans from the RFC incurred during the depression amounted to \$31,405,000.

By exercising its privilege of anticipating any of the quarterly maturities of the bank loan the company paid off many months ahead of schedule the entire \$10,000,000 of debt. The loan agreement called for instalments beginning Aug. 15, 1941, and concluding May 15, 1944.

—Week Ended Dec. 14— —Jan. 1 to Dec. 14—

Period-Gross earnings ... -V. 154, p. 1600.

Springfield Fire & Marine Insurance Co. - Special Dividend-

The directors on Dec. 22 declared a special dividend of 25 cents per share and the regular quarterly dividend of \$1.12 per share, both payable Jan. 2 to holders of record Dec. 22.

A special distribution of 25 cents was also made each January, since and including the year 1936.—V. 152, p. 132.

Standard Gas & Electric Co.-Weekly Output-

Electric output of the public utility operating companies in the Standard Gas & Electric Co. system for the week ended Dec. 20, 1941, totaled 168,364,000 kwh. as compared with 142,571,000 kwh. for the corresponding week last year, an increase of 18.1%.—V. 154, p. 1600.

(A.) Stein & Co.-Year-End Dividend-

The directors recently declared a year-end dividend of 25 cents per share on the common stock, payable Dec. 27 to holders of record Dec. 19. The last regular quarterly payment on this issue was made on Nov. 14, 1941. Total distributions in 1941 will amount to \$1.25 per share, as against \$1 in 1940.—V. 151, p. 115.

Terre Haute Traction & Light Co.—Bonds Called— All of the outstanding first consolidated mortgage 5% gold bonds due May 1, 1944, have been called for redemption as of May 1, 1942, at 110 and interest. Payment will be made at the State Street Trust Co., Boston, Mass., at any time on or before redemption date, the holders to receive the redemption price and interest to May 1, 1942.—V. 152, p. 3039.

Thermoid Co. (& Domestic Subs.) - Sales-
